## PRESS RELEASE

### ZUGgate – is the name of the new building

At the end of January 2010, CEO Werner J. Rellstab named the building **ZUGgate** to the backdrop of a fantastic firework display that set the South facade in a whole new light.

**ZUGgate** is our symbolic "gate to the world" – a world that we want to conquer with our exports!

Starting from Zug, we are heading for all four corners of the globe, making availability and delivery capacity our top

priority.

Besides manufacturing innovative products, we are also setting new standards in terms of energy efficiency with the construction of the new ZUGgate. The energy concept for the energy-saving building combines various cost-effective systems, which includes exploiting waste heat, power regeneration, solar cells and rainwater.

Its compactness forms the basis of the energy-efficient construction. Designed to meet the very latest architectural, ergonomic and ecological norms, the building is also a symbol of our loyalty to Switzerland as a technology hub and workplace.
