## A SMART COMBINATION

WESCO basso II SL hob hood and  
V-ZUG FullFlex hob

## WESCO basso II SL hob hood

The WESCO basso II SL features two compact, powerful extractors in the base. This leaves plenty of space in the lower unit and ensures excellent vapour collection. In recirculation mode, the maintenance-free PlasmaMade® odour filter ensures ideal air quality. This easy-clean hob hood is especially quiet and is fitted flush with the hob to form a stylish ensemble.

## V-ZUG FullFlex hob

Do you enjoy having unlimited flexibility? The FullFlex induction hob provides this by completely dispensing with defined cooking zones. With its 48 state-of-the-art inductors, it is able to automatically detect the position and size of the cookware used. This means that you can place up to six pans on the elegant surface and move them wherever you like. With the large, intuitive full-colour graphic display, you can keep track of all settings and enjoy complete control at your fingertips. Experience numerous advantages such as the unique teppanyaki function.

To combine both products, please contact a kitchen designer of your choice.

- Separate power controls of each ventilation opening ensure efficient vapour collection
- The powerful, energy-saving extractors with EC motors are exceptionally quiet
- The stainless steel vents are placed at the sides to ensure free and unobstructed access to the hob
- Both of the stainless steel filter modules are removable for hassle-free cleaning in the dishwasher
- Space-saving and easy to plan – the extractor housing is integrated into the column base, meaning that standard units can be used
- An independent element – the hob hood is manufactured to match the size of the hob

- Cook using 4 to 6 items of cookware simultaneously
- Automatic detection of the position and size of the pan base
- Unique functions that make cooking easier including teppanyaki and ProfessionalMode
- With the easy-to-read full-colour graphic display and intuitive operation, you'll have everything under control
- Energy-efficient cooking thanks to the latest induction technology
- V-ZUG Home networking – the connection with the future
- Available in standard widths of 70 and 90 cm
