PRESS RELEASE

Into a networked future with V-ZUG-Home

Running a household is now becoming even more convenient and efficient: the new functions of the V-ZUG-Home app provide inspiration and keep users informed about the status of running programmes at the push of a button. Always up to date, networked appliances thus offer added value for everyday life.

Imagine you are sitting on the sofa with your guests and you receive a message on your smartphone when the entrecôte is ready to be served. Or you are doing the gardening and quickly check the remaining duration of your washing programme on your tablet. Thanks to V-ZUG-Home, selected appliances such as modern ovens, combi-steam cookers, washing machines, tumble dryers and dishwashers from V-ZUG are able to communicate and can easily be networked.

Always up to date

Upon request, the appliances send notifications to your smartphone or tablet. You will receive a start message if you have programmed a delayed start, for instance, and you will be notified once your dish is ready. But even without notifications, you can keep an eye on your appliances at all times: they provide information about their current status, the temperature inside the cooking space or the time remaining until your food will be ready to serve.

Inspiration at the push of a button

The app now also contains numerous recipes for inspiration. But it gets even better: the corresponding programmes can easily be transmitted to the appliance from the app to facilitate the preparation of your meal. The app also supports the user in making the right settings in a few easy steps. Those who are unsure about the best programme for a delicious gratin or perfectly cooked meat can breathe a sigh of relief because the app enables a simple search and transmission of EasyCook settings to the appliance.

Simple installation and configuration

You don't need to be a professional to install or operate V-ZUG-Home – in fact, it couldn't be simpler. If a software update is available, the appliance can simply be updated at the touch of a button and benefit from new functions and services as a result. For everything you need to know about installation, please visit home.vzug.com

Press release, 3 January 2018

About V-ZUG

V-ZUG is Switzerland's leading brand in household appliances and has its headquarters in Zug. For over 100 years, the company in the heart of Switzerland has been developing and producing innovative appliances for the kitchen and laundry room which make everyday life easier, as well as inspiring and exciting our customers – for a whole lifetime of enjoyment. V-ZUG has 10 exhibition and advisory centres as well as 16 service centres in Switzerland and enjoys international representation in 18 countries. Worldwide, the company employs around 1400 members of staff and trains over 70 apprentices. As a Swiss market leader, V-ZUG is committed to more than just its own business: it also plays an active role when it comes to the economy, society and the environment. The owner-operated company – together with its sister company Gehrig Group AG and subsidiary SIBIRGroup AG – is part of the Metall Zug Group.

About Metall Zug

Metall Zug is a Swiss industrial holding headquartered in Zug and offers a broad range of innovative, sustainable premium and precision products. The Group develops, produces and distributes technologically advanced appliances, machines and solutions for the household appliances, infection control and wire processing business units. V-ZUG Ltd, Gehrig Group AG (household appliances business unit), the Belimed Group (infection control business unit) and the Schleuniger Group (wire processing business unit) all form part of the Metall Zug Group. The industrial holding emerged from the Metallwarenfabrik Zug metalware factory founded in 1887 and is still primarily in the hands of the founding family today. The Metall Zug Group employs around 3600 members of staff worldwide and is listed on the SIX Swiss Exchange stock exchange.
