

Planning aid

International collection
Kitchen appliances
2022/2023

Note on content

Please note

This planning aid applies to the specified model numbers only. Older planning aids for earlier generation models may be requested in electronic form from our Customer Services.

This planning aid is not to be used as installation instructions! The regulations and instructions binding for the appliance installation are to be obtained from the installation instructions packed with the appliances. The installation instructions can also be downloaded from the internet from www.vzug.com/b2b.

Modifications

Text, diagrams and data correspond to the technical standard of the appliances at the time this planning aid went to press. The right to make technical modifications for the purpose of the further development of the appliances is reserved. The German, English, French and Italian versions are binding. V-ZUG accepts no liability for translations in other languages.

Symbols used

Denotes important safety precautions.

Failure to observe said precautions can result in injury or in damage to the appliance or fittings!

- Indicates an instruction.
- Indicates a list.

Information and precautions that should be observed.

Extraction

Recirculation

Supplementary documents

In this planning aid, occasional reference is made to supplementary documents. These documents can be requested from the Head Office in Zug by sending an e-mail to service-support@vzug.com.

1 Overview of connections, ranges and dimensions

Electrical connections must be carried out by qualified experts in accordance with the guidelines and standards for low-voltage installations and the specifications of the local electricity supply companies.

A plug-in appliance may only be connected to a socket outlet with earthing contact, installed according to specifications. An all-pole mains isolating device with 3 mm contact opening should be provided in the house wiring system. Switches, plug and socket devices, circuit breakers and fusible cut-outs which are accessible after installation and which have all-poles switching are permissible as isolating devices. Effective earthing and separately installed neutral and earth conductors ensure safe and fault-free operation. After installation, live parts and cables with basic insulation must not be accessible. Check old installations.

1.1 General operating conditions

Detailed information on the electrical connection data can be found at the beginning of each section.

Value	Nominal value	Minimum	Maximum
Voltage	230 V	207 V	253 V
Voltage	400 V	360 V	440 V
Frequency	50 Hz sinusoidal	49 Hz sinusoidal	51 Hz sinusoidal

- Short duration frequency variation in the mains: $\pm 5\%$
- Long duration frequency stability in the mains (for synchronous clocks): ± 10 ppm
- If used at an altitude of over 2,000 metres, a reduced performance must be expected.

1.2 Using residual current devices in house wiring system / fault current

High fault currents are inherently present in ovens and hobs. The values can be affected by various factors and vary widely. Fault currents of up to approximately 10 mA per appliance are permissible in accordance with the norm. The values are measured in the warm operating state.

If residual current devices (RCDs) are used in the house wiring system, we recommend that the above-mentioned appliances have their own RCD protection, separate from the power supply for the rest of the system. 30 mA or higher should be selected as the tripping current for the residual current device.

1.3 Validity

The model number corresponds to the first alphanumeric of the serial number SN (or FN) on the identification plate.

1.4 Positions of electrical connections

For EURO kitchens, allowance from the floor can vary. In this case, the electrical connection should be calculated using the dimension from the bottom edge of the appliance.

Oven above an oven

With this combination, an electrical connection should be provided for each appliance. Depending on the installation height and the type of combination, the connections may be located at different heights.

Wall hoods with telescopic casing

The electrical connection must pass between the exhaust air piping and the lagging sheets. The measurements given in the table ensure that this condition is met.

- 1 Oven/Steamer in base unit
- 2 Autarchic hob
- 3 Dishwasher/Refrigerator in base unit
- 4 Automatic built-in coffee machine / Microwave oven
- 5 Oven / Steamer / Microwave oven, also in combination
- 6 Refrigerator, winecooler in tall unit
- 7 Range hood
- 8 Drawers (warming drawer / vacuum drawer / system drawer)

- M1 Distance from centre to dishwasher/refrigerator connection in base unit
- M2 Distance from centre to connection for automatic built-in coffee machine / Microwave (option)
- M3 Distance from centre to range hood connection

 **Provide additional clearance for electrical connections if the installation niche has only the minimum depth.**

2.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The niche and gap dimensions given below must be observed to ensure proper ventilation.

2.2 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Model number	Country group ****	Mains connection	Fuse	Rated load	Mains cable
CombairSteamer V2000 60	23036	A, E, F	220– 240 V~ 50 Hz	16 A	3700 W	min. 1.8 m, with plug

Below second appliance

Above second appliance

Above warming drawer

X = Height of second appliance

Y = Niche height

W = Angle set K50572

For an installation depth of under 575 mm, it is recommended that the appliance be installed below other appliances for space reasons.

If installing with a second appliance in the same niche, use the angle set W (K50572).

Installation

Plumbing in

- 1 Hose clamp
- 2 Reinforced inlet hose 2 m, G 3/4"
- 3 Drain hose 3 m, internal diameter of connection 22 mm

On-site installations

- 4 Drain trap
- 5 Plinth panel
- 6 Hose fed through plinth
- 7 Cold water connection with stopcock

Drain

- Length of drain hose: 3 m. An optional 5 m drain hose (Art. no. 1012933) can be ordered if required.

The mounted drain hose must not be lengthened or shortened. The drop from the bottom of the appliance to the drain trap must be at least 50 mm. Install the drain hose without kinks and without any pressure or tension on it.

Cold water connection inlet

Operating pressure: 0.1–1.0 MPa (1–10 bar)

Only use if water hardness >3° French hardness (>1.7° German hardness).

Length of reinforced hose: 2 m

Observe local water authority regulations. Existing hoses that are defective must be replaced. The inlet hose must not be shortened or damaged. Should the flexible inlet hose not be long enough, then a rigid extension of the on-site installation is required. The stopcock must be accessible at all times.

3 Ovens

3.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The niche and gap dimensions given below must be observed to ensure proper ventilation.

3.2 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Model number	Country group *	Mains connection	Fuse	Connection cable	Mains cable
Combair V2000 45	21048	A, E, F	220– 240 V~ 50 Hz	16 A	3400 W	min. 1.8 m, with plug
Combair V4000 45/45P	21049, 21058

3.3 Excellence Line 60 cm

Oven

Combair V2000 60, Combair V4000/V6000 60/60P, niche height 600

Valid for the following models: 21043, 21045, 21047, 21055, 21057, 21068, 21073

Front dimensions of the appliances: Detail X/Y (see page 12)

Compact oven

Combair V2000 45, Combair V4000/V6000 45/45P, niche height 450

Valid for the following models: 21048-21050, 21058, 21059, 21067, 21070

Front dimensions of the appliances: Detail X/Y (see page 12)

3.4 Advanced Line 60 cm

Oven

Combair V600 60, niche height 600

Valid for the following model: 21126

Front dimensions of the appliances: Detail X/Y (see page 13)

4 Vacuum drawers, warming drawers & system drawers

4.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

4.2 Electrical connection data

Plan a separate inlet for the electrical connection for each appliance.

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Mains connection	Fuse	Rated load	Mains cable
Vacuum drawers	220–240 V~ 50 Hz	10 A	320 W	1.7 m, with plug
Warming drawers			810 W	

4.3 Vacuum drawers

The Angle set for combination possibilities and Anti-tip set for VacuDrawer V6000 (see page 141) are not included in the scope of delivery.
An Anti-tip set for VacuDrawer V6000 (see page 141) must be ordered if there is a **CoffeeCenter** or **no** appliance is installed above the vacuum drawer.

For installation next to warming drawer, order Trim kit (edge protection) (see page 140) at the same time.

For installation with a CombiSteamer with fixed water connection, an installation depth of ≥ 575 mm must be taken into CombiSteamer with fixed water connection (see page 17).

8 CookTop glass ceramic hobs

8.1 General notes

Induction hobs require adequate ventilation (see page 38).

If a drawer is installed directly underneath, a protective plate is recommended in the vicinity of the mains cable and to protect the ventilation openings. The ventilation protective plate set can be used for this purpose. Accessories (see page 142).

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The layout of the hobs to be installed may differ from the hobs illustrated here!

8.2 OptiGlass coating

Halogen or LED light bulbs are recommended for illuminating hobs with the OptiGlass coating. The use of fluorescent tube lighting to illuminate hobs with the OptiGlass coating causes the glass surface to shimmer.

8.3 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
CookTop Teppan Yaki I40	A, B, C, D, E, F	220–240 V~50–60 Hz	16 A	2800 W	1.7 m, without plug

* Country group (see page 2)

8.4 Ventilation

For installation of a V-ZUG induction hob, the following minimum requirements apply:

1. The hot air exhaust should be provided by a ventilation slit of $\geq 2 \text{ mm}$ at the front.
2. A space of $\geq 10 \text{ mm}$ in height is required beneath the appliance.
3. Not only exhaust air but also replacement air in the cabinet should be taken into account. There are different ways to do this, including :
 - a) The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation through the ventilation slits. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob. The lower plinth must not be hermetically sealed. This can be achieved through a shadow gap at the plinth panel or through the use of a ventilation grille.
 - b) Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet. In order that enough cold air can be drawn in, there must be a continuous circulation of fresh air that extends outside the cabinet. The lower drawer panel should therefore not hermetically seal the cabinet.

Recommendation

If the hob is being used at the power limit, a reduction in power after a certain amount of time is normal. All induction hobs available on the market can be observed to work in the same way. Should, through cooking behaviour, such an instance occur more often, performance can be improved by optimizing ventilation. To this end, the installation of a ventilation protective plate with seal is generally recommended (see page 55).

Ventilation protective plates only achieve the desired effect with the seal in place. The foam seals are available separately so that ventilation plates from other manufacturers can be retrofitted (see page 142).

8.5 Surface-mounted installation with «DualDesign»

The installation of a ventilation protection plate with seal is strongly recommended.

- Corner radii of cut-out, aim for ≤ 5 mm
- Corner radii of appliance 2 mm

9 Gas hobs

The distance from the appliance cut-out to the back wall must be ≥ 50 mm and to the side walls ≥ 200 mm. Parts such as side walls and reinforcing strips which protrude into the installation space under the cooking zone must be made of fire-resistant material.

The distance between the underside of the appliance tray and any part of the cabinet beneath that is made of combustible material must be ≥ 20 mm.

When a range hood is installed above the gas hob, the minimum distance given for the particular range hood must be observed.

Furthermore, the minimum distances illustrated must be strictly complied with even if a lower value is stated for the range hood.

A gas hob cannot be built in directly over another appliance due to the installation depth and the gas connection.

9.1 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
GAS411GSBZ, GAS421GSBZ, GAS641GSBZ, GAS731GKBZ, GAS951GSBZ	D	220–240 V~50–60 Hz	≥ 3 A	<20 W	1.7 m, with plug
GAS411GSAZ, GAS421GSAZ, GAS641GSAZ, GAS951GSAZ	A, B, E				1.7 m, without plug
GAS731GKBZ	B				1.7 m, with plug
GAS311GKBZ, GAS321GKBZ, GAS411GSBZ, GAS421GSBZ, GAS731GKBZ, GAS951GSBZ	C, F				

* Country group (see page 2)

9.2 Gas connection

The gas connection and the conversion to another gas type must be carried out by an authorized installer.

- ▶ The gas connection must be positioned so that the stop-cock and the supply connection point are accessible with the appliance installed.
- ▶ The gas connection must be positioned so that it does not get detrimentally hot during operation. In particular, the gas hose assemblies and the appliance's connection fittings must be clear of hot exhaust gases (e.g. from an oven).
- ▶ It must be ensured that the gas hose and the mains connection do not touch any hot parts of the appliance, otherwise the gas hose and the mains cable could become damaged through heat.
- ▶ A flexible connection lead (max. length 1.5 m) must be positioned so that it runs freely and does not come into contact with any movable parts of the kitchen cabinets (e.g. a drawer).

1/2-inch metric thread

The gas connection on the appliance has a 1/2-inch external thread in accordance with ISO 228/1. If the gas installation on site already has a corresponding counterpart, the gas appliance can be directly connected to it.

1/2-inch conical thread

If the gas connection has a conical thread, the transition piece and sealing ring must first be screwed onto the appliance. The transition piece has a conical external thread R 1/2-inch in accordance with ISO 7/11. In the case of a conical screw connection, the thread makes the seal, which is why the thread must be sealed with hemp or Teflon tape.

9.3 Ventilation

In order to guarantee minimum ventilation, a space of ≥ 20 mm height is necessary beneath the appliance.

- A** The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation through the ventilation slits. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob. The lower plinth must not be hermetically sealed. This can be achieved through a shadow gap at the plinth panel or the use of a ventilation grille.
- B** Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet. In order that enough cold air can be drawn in, there must be a continuous circulation of fresh air that extends outside the cabinet. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob. The lower drawer panel should therefore not hermetically seal the cabinet.

9.4 Setting up appliance to use local gas type

The appliance settings must match the local gas type and connection pressure. If the gas type and connection pressure have not been preset, the appliance has to be converted using the nozzle set supplied or other nozzle sets available as accessories. Information on the default gas setting as well as on the supplied and optional nozzle sets by country can be found in the catalogue. Conversion to another gas type is described in detail in the relevant installation instructions.

Overview of nozzle sets

Type	Country group *	Default gas setting	Nozzle set (supplied)	Additional nozzle sets available for country-specific combinations of gas type and connection pressure

10 Combined hob installation

10.1 Surface-mounted combination

The surface-mounted hob combination is currently only possible for electric hobs (up to max. hob size 40), gas hobs and hob hoods. The intermediate support 1014361 (stainless steel) or 1019199 (black) is required for this.

Intermediate supports 1014361 and 1019199 are not available in Germany.

Dimensions table for hobs

Combinations	Cut-out width C	Intermediate support position G1	Intermediate support position G2
30+30 cm	554 mm	277 mm	-
30+40 cm	657 mm	277 mm	-
40+40 cm	760 mm	380 mm	-
30+30+30 cm	838 mm	277 mm	561 mm
30+60 cm	844 mm	277 mm	-
40+60 cm	947 mm	380 mm	-

11 CombiCookTop induction hob with hood

11.1 Electrical connection data

 General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Type	Country group *	Mains connection	Fuse	Rated load	Mains cable
CombiCookTop V2000 I804 (31095)	A, E	380–415 V 2N~ 50–60 Hz	16 A	7400 W	1.7 m, without plug
CombiCookTop V4000 I804 (31096)	B, C, D, F	220–240 V~ 50–60 Hz	32 A		

* Country group (see page 2)

11.2 Dimensions

 All plastering, plasterboarding, wall papering and painting work is to be carried out prior to installing the appliance. Ensure that the material is sufficiently stable. For the recirculation mode, ensure sufficient ventilation so that moisture can escape. Plan in suitable material/wood.

11.3 Scope of delivery

- A** Hob
B Filter cassette with grease filter
C Potential-free switch contact (window contact switch)
Not included in the scope of delivery, but available for order as accessories:
D* Activated charcoal filter (recirculation operation only)
E* Telescopic connection for recirculation operation, unguided
F* Flat channels, elbow variants and transition pieces

11.4 Ventilation of the hob

For installation of hobs with integrated range hood, the following minimum requirements apply:

- The hot air exhaust should be provided by a ventilation slit of $\geq 2 \text{ mm}$ at the front.
- Not only exhaust air but also replacement air in the cabinet should be taken into account. There are different ways to do this, including :
 - The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation through the ventilation slits. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob. The lower plinth must not be hermetically sealed. This can be achieved through a shadow gap at the plinth panel or through the use of a ventilation grille.
 - Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet. In order that enough cold air can be drawn in, there must be a continuous circulation of fresh air that extends outside the cabinet. The lower drawer panel should therefore not hermetically seal the cabinet.

Extraction or recirculation operation with flat channel system

Recirculation operation without flat channel system

For recirculation operation without flat channel system, the exhaust air from the range hood and the ventilation (supply air for hob) must not mix in this installation variant. These areas must be kept separate (see supply air option 2b above)!

Inadequate ventilation will affect the performance of the appliance. Ventilation slit should extend across the entire width where possible.

11.5 Surface-mounted installation

The layout of the hob to be fitted may differ from the hob illustrated!

Model designation	H	Corner radius Ra/Ri
CombiCookTop V2000/V4000 I804	202 mm	5/2.0 mm

- H** Dimension from the top of the work surface to the underside of the hob
- S** Drawer
- K** Cable length 170 cm
- Ri** Corner radii of appliance
- Ra** Outer corner radii of cut-out

 **Ensure access from below for service and maintenance work across the entire width of the cabinet. Where an intermediate base is to be provided between the drawer and the appliance, it must be removable from below.**

Installation

- Create an accurate installation cut-out.
- Carefully put the appliance in the installation cut-out and press against the worktop with sufficient overlap.

 **Access to the appliance from below via the entire cut-out area must be guaranteed. For servicing purposes, the induction generator can be removed from below with the mounting plate. It must be possible to unscrew the contact-proof covers from below.**

11.6 Flush installation

The layout of the hob to be fitted may differ from the hob illustrated!

Model designation	C/D	H	Corner radius Ra/Ri
CombiCookTop V2000/V4000 I804	750/490	206 mm	5/2.0 mm

H Dimension from the top of the work surface to the underside of the hob

St Steel angle bonded or screw mounted

S Drawer

W Side panel

K Cable length 170 cm

Ri Corner radii of appliance

Ra Outer corner radii of cut-out

Ensure access from below for service and maintenance work across the entire width of the cabinet. Where an intermediate base is to be provided between the drawer and the appliance, it must be removable from below.

Installation

► Create an accurate installation cut-out.

- The mounting surface can be reamed out or created by installing wood/stone supports or using the steel angle set (see Accessories).

Access to the appliance from below via the entire cut-out area must be guaranteed. For servicing purposes, the induction generator can be removed from below with the mounting plate. It must be possible to unscrew the contact-proof covers from below.

- Prepare the cut-out and appliance in accordance with the specifications in the enclosed cementing-in instructions.
- Carefully cement the appliance in and leave the silicone sealant to dry for at least 24 hours.
- Connect to the electrical mains connection before inserting the appliance, if necessary.

11.7 Installation overview base unit

Observe local regulations on pipework RF1 (metal) and RF3 (plastic)!

Recirculation operation, unguided, with telescopic connection (E*)

Recirculation operation, unguided, long

Extraction or recirculation operation with flat channel system, plastic

Extraction operation with flat channel system, metal

** = Flush installation (surface-mounted installation: 202 mm)

Extraction or recirculation operation with flat channel system, extra deep

** = Flush installation (surface-mounted installation: 202 mm)

Information on total exhaust air length possible (see page 80).

Flat channels, elbow variants and transition pieces are not included in the scope of delivery, but are available for order as accessories. The individual components required must be taken into account during planning.

11.8 Flat channel systems made of plastic (RF3)

Plastic accessories are not made of non-flammable material.

11.9 Flat channel systems made of metal (RF1)

The duct spacers 1077495 prevent the narrowing or compression of the air duct. Hence the use of duct spacers is necessary if accessory 1046627/1046628 is embedded in concrete.

11.10 Recirculation mode

An air outlet of $\geq 500 \text{ cm}^2$ at the exhaust duct of the range hood is recommended. During operation, the air outlet from the exhaust duct of the range hood must not be obstructed. This can be achieved through a shadow gap at the plinth panel or the use of a ventilation grille.

Dedicated accessories that need to be fitted to operate the appliance in the recirculation mode: 1155757 long-life-Plus activated charcoal filter!

11.11 Extraction mode

There is a danger of toxic fumes developing if the range hood is operated at the same time as an ambient air-dependent firing system!

- If possible, only use pipes with a smooth inner surface for exhaust ductwork.
- Length of flat channel system to air outlet: 6 m channel section with six 90° elbows, 8 m with four 90° elbows or 10 m with two 90° elbows are realizable. If the exhaust duct is to be routed outdoors, we recommend installing a suitable wall box (accessory available for order).
- To achieve the greatest possible air extraction with the lowest noise levels, please observe the following:
 - Use 222 × 89 mm flat channel or pipe with $\geq \varnothing 150 \text{ mm}$ (accessory available for order)
 - The exhaust ducting should be as short and straight as possible and must not be kinked or compressed.
 - Only use connection elbows with large radii.
 - Ensure all pipe connections are secure and airtight.

Lateral exhaust air outlet via plinth

Lateral exhaust air outlet via plinth

Lateral exhaust air outlet

Rear exhaust air outlet with elbow

Rear exhaust air outlet straight without elbow

Any constriction of the airflow will reduce extraction performance and increase operating noise.

- If the exhaust duct is to be routed outdoors, we recommend installing a wall box (available as an accessory).
- If the exhaust air is to be ducted into a chimney flue, the intake piece must be aligned with the flow direction of the flue.
- If the exhaust duct runs through cool rooms, lofts, etc., there may be sharp variations in temperature in individual areas. Vapour and condensation is to be expected. This makes it therefore necessary to insulate the exhaust ducting / air duct.

Performance diagram: Exhaust air flow volume

12 Range hoods

Technical information on the range hoods can be found in document «TechInfo for range hoods» under J32836 (EN), 1007182 (IT), 1008408 (DE), 1008409 (FR).

12.1 General notes

If other firing systems are being used at the same time (e.g. wood, gas, oil or coal fired heating appliances), safe operation is only possible providing a room negative pressure of 4 Pa (0.04 mbar) is not exceeded at the location of the appliance.

Risk of toxic fumes! An adequate flow of fresh air must be guaranteed e.g. via non-closable openings in doors or windows and in combination with an air-intake/exhaust-air wall box or by other technical means. Local fire protection regulations must be observed. V-ZUG offers exhaust ducts made of plastic (construction material category RF3) and metal (construction material category RF1).

If the appliance has an options connection, it can be used to open and close an automatic exhaust air / supply air flap. See also Accessories: Control set option, for external roof ventilation fans, room fans and other applications.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

Minimum distance to the hob

If a V-ZUG appliance is being combined with a third-party brand (hob or range hood) and the stipulated minimum distance between the combined appliances is different, then the greater of the two must be observed. The minimum distance is measured between the bottom edge of the range hood and the bottom of the pot or pan.

If the appliance is installed over gas hobs, each cooking zone must be fitted with an ignition fuse.

Extraction mode

The extracted air must not be fed into a chimney which is used for exhausting fumes from appliances burning gas or other fuels.

Observe the local fire regulations.

Installation notes

- In addition to the correct dimensioning of the exhaust duct, it is also necessary to ensure a sufficient inflow of fresh air **to replace the air that is being extracted.**
- Avoid routing the exhaust duct to the side through the chimney casing.
- Planning features for non-destructive de-installation and maintenance of the appliance:
 - Do not route telescopic casing in suspended ceilings.
 - Avoid silicone joints between the telescopic casing and the appliance.
 - All plastering, plasterboarding, wall papering or painting work is to be carried out prior to installing the appliance.

12.2 Special hoods

Special hood type DSTS9 (64004) may not be used in combination with gas hobs.

Special hood type DSMS (64005) may only be operated in combination with a gas hob of V-ZUG gas hob type: GAS321x, GAS421x, GAS641x, observing the permitted combination installation variants. The content of the operating and installation instructions for the listed gas hobs must be observed! If operating a permitted gas appliance, the hob hood must be fitted with the dedicated gas deflector 1031218 (accessory)! Operating a gas appliance without the gas deflector is not permitted!

Scope of delivery

A	Drip tray frame	N	Mains cable length 1.8 m
E	Control unit	Q	Flat channel system
F	Metal grease filter	R	Frame
G	Appliance housing	T	Exhaust air duct
K	Control cable	U	Spacer profile
L	Ventilation outlet	V	Connecting elements
M	Fan motor	W	Plastic covers
		Y	Mounting angle (surface-mounted installation)

Accessories:

Recirculation box 1157470

The flat channel system **Q** (accessories) can be used for the installation. Flat channel systems made of plastic, fire protection class RF 3 (see page 148)

Gas deflector 1031218, required accessory when using a permitted V-ZUG gas hob. Operating a gas appliance without the gas deflector is not permitted!

Plastic accessories

Metal accessories

Combination installation

Flush installation

Flush-mounted installation with additional intermediate supports **K** requires the accessory **intermediate support set H63789** (contains two intermediate supports). Flush-mounted combination installation is described in document 1014381.

A WOK glass ceramic hob cannot be surface mounted!

Reason: Glass thickness is 6 mm.

F 507±1 mm

D 490±1 mm

I ≥41.5 mm

J ≥41.5 mm

Ra 5 mm

Ra Outer corner radii of cut-out

K Intermediate support

S Spacer plates

T Steel angle bonded or screw mounted

U Silicone joints

Combinations	Cut-out width E	Cut-out width C	Intermediate support posi- tion G1	Intermediate support posi- tion G2	Intermediate support posi- tion G3	Intermediate support posi- tion G4

Appliance selection and combination possibilities

1. Planning example: Two hobs

Air duct in base to left/right.

The WOK glass ceramic hob / gas hob **W** is **always** positioned on the opposite side of the exhaust air duct. Standard hob **S**.

A WOK glass ceramic hob and gas hob may not be combined! In general, the use of a gas wok, in any combination, is not permitted.

2. Example: Three hobs

Air duct in base on both sides to left/right.

The Teppan Yaki hob **P** (600 mm) is positioned in the middle. The WOK glass ceramic hob / gas hob **W** is **always** positioned on the opposite side of the exhaust air duct. Standard hob **S**.

3. Example: Three hobs

Air duct in base on both sides to outside.

The WOK glass ceramic hob / gas hob **W** (400 mm) is positioned in the middle. Standard hob **S**. Possible position of 2 fan motors **M**.

4. Example: Large hob positioned in the middle

Air duct in base on both sides to inside for space economy.

Allows standard hob **S** with ≤ 800 mm installation width to be positioned in the middle. The WOK glass ceramic hob / gas hob **W** can **not** be positioned in the middle. Possible position of 2 fan motors **M**.

For use with a gas appliance

The hob hood may only be used with the dedicated gas deflector 1031218 (accessory) with one of the gas appliances listed below. Operating the hob hood without the gas deflector is not permitted!

Permitted gas appliances for use with the hob hood:

V-ZUG gas hob type: **GAS321x**, **GAS421x**, **GAS641x**, observing the permitted combination installation variants.

Combining the hob hood with two gas hobs is not permitted!

Using another gas appliance type/model or manufacturer is not permitted and can cause lasting damage to the hob hood.

Failure to observe the above instruction can cause lasting bodily harm and lasting damage to property and the appliance. In such a case, any and all liability, guarantee and goodwill claims will be rejected, now and in the future!

Burns hazard!

The appliance and surrounding components get hot during operation! Allow the fan flap, gas deflector and other components to cool down before touching them.

Fire hazard!

Grease deposits can build up in the grease filter and catch fire. Clean the grease filter regularly. Only operate the appliance with the gas deflector.

Permitted installation variants (V-ZUG gas hob only)

As a variant may also be installed on either side of the appliance.

A Caution: Hot surface!

B Gas deflector correctly mounted.

The gas deflector 1031218 (required accessory) reduces the deflection/disturbance of the gas flame at the burner and prevents it being extinguished by a draft.

- Open fan flap **1**.
- Set the gas deflector **2** in the correct position relative to the gas appliance.
- Switch on hob hood **3**.

Installation variant for recirculation hob hood with «recirculation box»

Example: Recirculation mode with recirculation box

Flat flexible elbow **H**, article no. **1012786**, with flexible length (240–600 mm) easy installation/access to fan motor **M** and recirculation box **U**.

Plan in enough space for maintenance work and ensure access to the fan motor and the recirculation box (for replacing the activated charcoal filters)! Exhaust air outlet cross section: Plan min. 500 cm² for exhaust air in base area.

Dedicated accessories that need to be fitted to operate the appliance in the recirculation mode: article no. 1157470 recirculation box with activated charcoal filters!

Installation variant for extraction hob hood

Example: Extraction mode with flat channel (round channel also possible).

Plan in length of flat channel system to air outlet of **max. 7000 mm**. If the exhaust duct is to be routed outdoors, we recommend installing a telescopic wall box (accessory available for order).

Ensure enough space for maintenance work and access to the fan motor and flat channel system!

DSTS9 downdraft hood (64004)

Operating mode	Extraction/Recirculation
Noise level	49–69 dB (A)/43–76 dB (A)
Illumination	1 × 6 W
Motor	1 × 270 W
Surface-mounted installation variant	

Mains connection	220–240 V~ 50–60 Hz, 276 W
Fuse	10 A
Fan speeds	4
Weight	~35 kg
Flush installation variant	

Recommendation for hob type: GK46TIMPS..., GK47TIMPS...

- As an alternative, the motor housing may be planned and mounted to the range hood from the back, though access must be guaranteed from the front for service and installation.
- The exhaust connection can be positioned to point in one of four directions.
- If using recirculation box 1157470, a transition piece 1012782 or H42078 is needed for its installation. See Flat channel systems made of plastic, fire protection class RF 3 (see page 148).

Accessories:

Recirculation box with activated charcoal filters 1157470

or

Long-life activated charcoal filter 1012163

Exhaust air outlet cross section: Plan min. 500 cm² for exhaust air in base area.

12.3 Island hoods

Applicable to the following hoods:

- Telescopic casing (adjustable) is available in various basic heights.
- Mains connection directly above range hood, connection cable 1.2 m with plug.

AiroClearIsland V6000 (63020), DI Premira (63016)

Operating mode	Extraction/recirculation	Mains connection	220–240 V~ 50-60 Hz, 138 W
Noise level	38–63 dB(A) / 41–68 dB(A)	Fuse	10 A
Illumination	4 × 2 W	Fan speeds	4
Motor	1 × 130 W	Weight	~32/35 kg
Options connection	Max. 180 W		

Air outlet for recirculation air (detail Y)

Telescopic casing for extraction/recirculation:

Height is adjustable.
Available in 2 basic heights.

For recirculation air (see detail Y):
Air outlet left/right and front/back possible.

Minimum distance B above hob

For electric hob: 500 mm
For gas hob: 750 mm
Note on minimum distance (see page 82)

LB, CN, HK, SG, AU.

DIQS10 (63014)

Operating mode	Extraction/recirculation	Mains connection	220–240 V~ 50/60 Hz, 274 W
Noise level	52–69 dB (A)/69–76 dB (A)	Fuse	10 A
Illumination	4 × 1 W	Fan speeds	4
Motor	1 × 270 W	Weight	~32.7 kg
Options connection	Max. 200 W		

For recirculation air (see detail Y):
Air outlet left/right and front/back possible.

Air outlet for recirculation air (detail Y)

Telescopic casing for extraction/recirculation:

Height is adjustable.
Available in 2 basic heights.

Minimum distance B above hob:

For electric hob: 650 mm
For gas hob: 750 mm
Note on minimum distance (see page 82)

DIAS10 (63009)

Operating mode Recirculation
Noise level 54–70 dB (A)
Illumination 4 × 5 W, 12 V~
Motor 1 × 100 W

Mains connection 220–240 V~ 50/60 Hz, 120 W
Fuse 10 A
Fan speeds 4
Weight ~30 kg

**Minimum distance X above hob:**

For electric hob: 650 mm

For gas hob: 750 mm

Recommended maximum distance X: 1300 mm

Note on minimum distance (see page 82)

12.4 Wall hoods**Applicable to the following hoods:**

- Consider type of piping (straight or elbow).
- Telescopic casing (adjustable) is available in various basic heights.
- Mains connection above wall hood behind the chimney cover / telescopic casing.
- Connection cable 1.5 m, with plug (except for model 62021 = 1.2 m, with plug).

Positions of electrical connections

The specified dimensions are valid for straight exhaust air piping. If exhaust air piping with an elbow are used, the dimensions must be adapted accordingly.

Appliance	Connection from lower part of appliance	Connection from centre	Type of connection
AiroClearWall V6000	495 mm	80 mm	Flush power socket 230 V
DW Premira	495 mm	80 mm	

AiroClearWall V6000 (62028), DW Premira (62022)

Operating mode	Extraction/recirculation	Mains connection	220–240 V~ 50–60 Hz, 134 W
Noise level	38–63 dB (A)/41–68 dB (A)	Fuse	10 A
Illumination	2 × 2 W	Fan speeds	4
Motor	1 × 130 W	Weight	~25.5 kg
Options connection	Max. 180 W		

Air outlet for recirculation air (detail Y)

Use of stone cladding

20 mm thick wall panels (granite, marble)
are possible.

Telescopic casing for extraction/recirculation:

Height is adjustable.

Available in 2 basic heights.

LB, CN, HK, SG, AU.

Minimum distance B above hob:

For electric hob: 500 mm

For gas hob: 750 mm

Note on minimum distance (see page 82)

AiroClearWall V6000 (62029), DW Premira (62023)

Operating mode	Extraction/recirculation	Mains connection	220–240 V~ 50–60 Hz, 134 W
Noise level	38–63 dB(A) / 41–68 dB(A)	Fuse	10 A
Illumination	3 × 2 W	Fan speeds	4
Motor	1 × 130 W	Weight	~29 kg
Options connection	Max. 180 W		

**Air outlet for recirculation air (detail Y)****Use of stone cladding**

20 mm thick wall panels (granite, marble) are possible.

**Telescopic casing for extraction/recirculation:**

Height is adjustable.

Available in 2 basic heights.

LB, CN, HK, SG, AU.

**Minimum distance B above hob:**

13 Dishwashers

13.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

For work surfaces that are susceptible to moisture, use work surface protection W70163.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2,000 m above sea level.

Validity

Model designation	Type	Model number
AdoraDish V2000	AS2T	41108, 41109
AdoraDish V4000	AS4T	41110, 41112, 41114
AdoraDish V6000	AS6T	41115, 41118–41120, 41125

Dishwashers with heat pump (see page 121)

13.2 Electrical connection data / plumbing in

Example of connection

Designation		Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket 230 V
B	Cold water	600 mm	N = 170 mm	G $\frac{3}{4}$ "
C	Hot water *	600 mm	M = 70 mm	G $\frac{3}{4}$ "
D	Outlet	400 mm	L = 110 mm	ø56 mm
G1	Dishwasher in base unit	Connection in adjacent compartment left or right		
G2	Dishwasher in tall unit	Connection in max. 2 compartments left or right		
U1	Power socket	Yes		
U2	Connection cable	Length 1.50 m **		
V	Cold water connection	Yes		
W	Hot water connection *	Yes		
X	Drain hose	Length 1.55 m ** / internal diameter = 22 mm		
Y	Shut-off devices	Yes, $\frac{3}{4}$ "		
Z	Aquastop / water inlet with filter, G $\frac{3}{4}$ "	Length 1.55 m **		

* The hot water connection can be activated for a water flow temperature of at least 45 °C to maximum 60 °C. For the "No heating" function, a water flow temperature of 60 °C is recommended.

** If the standard connection length is not long enough, order the CS set with a longer connection length (AdoraDish (see page 155)).

Special lengths must be connected directly to the appliance. Lengthening the inlet and drain hoses is not permitted.

Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Model designation	Type	Model number	Country group *	Rated load	Mains connection	Fuse	Mains cable
AdoraDish V6000	AS6T	41115, 41118, 41120	A, E	3200 W	230 V~ 50 Hz	16 A	1.5 m, with plug
			F	3200 W	220–240 V~ 50 Hz	16 A	
			B	2200 W	230 V~ 50 Hz	10 A	
			C, D	2200 W	220–240 V~ 50 Hz	10 A	
		41119	A, E	3200 W	230 V~ 50 Hz	16 A	
		41125	A, E	3200 W	230 V~ 50 Hz	16 A	
			B	2200 W	230 V~ 50 Hz	10 A	
AdoraDish V4000	AS4T	41110	F	2200 W	220–240 V~ 50 Hz	10 A	1.5 m, with plug
		41112	A, B, E	2200 W	230 V~ 50 Hz	10 A	
		41114	A, E	3200 W	230 V~ 50 Hz	16 A	
			B	2200 W	230 V~ 50 Hz	10 A	
AdoraDish V2000	AS2T	41108	B	2200 W	230 V~ 50 Hz	10 A	1.5 m, with plug
			C, D, F	2200 W	220–240 V~ 50 Hz	10 A	
		41109	A, E	2200 W	230 V~ 50 Hz	10 A	

* Key (see page 2)

Plumbing-in data

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

Value		Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa	1.0 MPa
	Flowing	–	0.08 MPa	1.0 MPa
Water hardness		–	0.5 °fH	50 °fH
Water inlet temperature		–	5 °C	60 °C

13.3 Installation overview

Depending on niche height **H**, either standard or extra height appliances or only one of the two can be installed.

Niche height **H** in mm

	790	800	810	820	830	840	851	860	870	880	890	900	910	920	930	940	950	960

	67	77	87	97	107	117	127	137	147	157	167	177	2
	77	87	97	107	117	127	137	147	157	167	177	187	2
	87	97	107	117	127	137	147	157	167	177	187	197	2
	97	107	117	127	137	147	157	167	177	187	197	207	2
	107	117	127	137	147	157	167	177	187	197	207	217	5
	117	127	137	147	157	167	177	187	197	207	217	227	10
	127	137	147	157	167	177	187	197	207	217	227	237	15
	137	147	155	167	177	187	197	207	217	227	237	247	23
	145	155	165	175	185	195	205	215	225	235	245	255	30

The permissible weights of the front panel / decor panel system **1** depend on the design variant:

Decor system	Integrated Nero, white, ChromeClass	Design integrated mirror glass	Fully integrated
Minimum weight	5.5 kg	4 kg	5 kg
Maximum weight	9 kg	6.5 kg	7 kg
Maximum weight with strong springs (special set W84603)	Up to 12.5 kg	Up to 9 kg	Up to 10 kg

- The weight dimensions only apply to uniform decor panels up to 22 mm thick.
- For decor panels that are thick or uneven (e.g. frame constructions or bevelled glass plates), the CS set «Door hinge brake» (art. no. 1011228) can be used to provide additional stability to the appliance door when pushed open (see page 155).

For different dimensions / decor panel weights, check using the “Calculation of special decor panel for dishwashers” tool: <https://www.vzug.com/b2b/au/en/planningaid>

Base unit «extra height»

* From 926 up to max. 961 with a second runner only, can be ordered under W82930

** From 932 up to max. 967 with a second runner only, can be ordered under W82930

► Front panel / decor system (wood) 1 must be cut to the required dimensions.

«Extra height»	Integrated Nero, white, ChromeClass	Design integrated mirror glass
Operating panel B incl. compensator	124–146 mm	124–140 mm
Decor panel D	555–697 mm	561–697 mm

Niche height H in mm													Min. S in mm
Dimension A in mm ↑ Min. ↓ Max.	851	860	870	880	890	900	910	920	930	940	950	960	2
	23	32	42	52	62	72	82	92	102	112	122	132	2
	33	42	52	62	72	82	92	102	112	122	132	142	2
	43	52	62	72	82	92	102	112	122	132	142	152	2
	53	62	72	82	92	102	112	122	132	142	152	162	2
	63	72	82	92	102	112	122	132	142	152	162	172	2
	73	82	92	102	112	122	132	142	152	162	172	182	2
	83	92	102	112	122	132	142	152	162	172	182	192	2
	93	102	112	122	132	142	152	162	172	182	192	202	2
	103	112	122	132	142	152	162	172	182	192	202	212	5
	113	122	132	142	152	162	172	182	192	202	212	222	10
	123	132	142	152	162	172	182	192	202	212	222	232	15
	133	142	152	162	172	182	192	202	212	222	232	242	23
	141	150	160	170	180	190	200	210	220	230	240	250	30

The permissible weights of the front panel / decor panel system 1 depend on the design variant:

Decor system	Integrated Nero, white, ChromeClass	Design integrated mirror glass	Fully integrated
Minimum weight	5.5 kg	4 kg	5 kg
Maximum weight	9 kg	7 kg	7.5 kg
Maximum weight with strong springs (special set W84604)	Up to 10 kg	Up to 8.5 kg	Up to 9 kg

- The weight dimensions only apply to uniform decor panels up to 22 mm thick.
- For decor panels that are thick or uneven (e.g. frame constructions or bevelled glass plates), the CS set «Door hinge brake» (art. no. 1011228) can be used to provide additional stability to the appliance door when pushed open (see page 155).

For different dimensions / decor panel weights, check using the “Calculation of special decor panel for dishwashers” tool: <https://www.vzug.com/b2b/au/en/planningaid>

Tall unit «standard»

Can also be installed in base unit on plinth

**Tall unit «extra height»****C Slide plate ***

«Standard»	Integrated Nero, white, ChromeClass	Design integrated mirror glass
Operating panel B incl. compensator	124–146 mm	124–140 mm
Decor panel D	610–632 mm	616–632 mm
«Extra height»	Integrated Nero, white, ChromeClass	Design integrated mirror glass
Operating panel B incl. compensator	124–146 mm	124–140 mm
Decor panel D	675–697 mm	681–697 mm

* Slide plate conversion set for tall unit must be ordered from V-ZUG, see Accessories (see page 155).

14 Dishwashers with heat pump

14.1 General notes

It must be possible to pull the appliance out of the niche horizontally at any time without dismantling any part of the cabinet.

- Screws and fasteners must be countersunk in the niche. There should be no protruding parts, screw heads, brackets, etc., otherwise parts of the appliance could become damaged (risk of water damage).

⇒ Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

It must be ensured air gap remains in the shadow gap.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2,000 m above sea level.

Validity

Model designation	Type	Model number
AdoraDish V6000	AS6T	41121

14.2 Electrical connection data / Plumbing-in data

Connection example

Designation		Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket 230 V
B	Cold water	600 mm	N = 170 mm	G $\frac{3}{4}$ "
C	Hot water *	600 mm	M = 70 mm	G $\frac{3}{4}$ "
D	Outlet	400 mm	L = 110 mm	ø56 mm
G1	Dishwasher in base unit	Connection in adjacent compartment left or right		
G2	Dishwasher in tall unit	Connection in max. 2 compartments left or right		
U1	Power socket	Yes		
U2	Connection cable	Length 1.50 m **		
V	Cold water connection	Yes		
W	Hot water connection *	Yes		
X	Drain hose	Length 1.55 m ** / internal diameter = 22 mm		
Y	Shut-off devices	Yes, $\frac{3}{4}$ "		
Z	Aquastop / water inlet with filter, G $\frac{3}{4}$ "	Length 1.55 m **		

* The hot water connection can be activated for a water flow temperature of at least 45 °C to maximum 60 °C. For the "No heating" function, a water flow temperature of 60 °C is recommended.

** If the standard connection length is not long enough, order the CS set with a longer connection length (AdoraDish (see page 155)).

Special lengths must be connected directly to the appliance. Lengthening the inlet and drain hoses is not permitted.

Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Model designation	Type	Model number	Country group**	Rated load	Mains connection	Fuse	Mains cable
AdoraDish V6000	AS6T	41121	A, E	3200 W	230 V~ 50 Hz	16 A	1.5 m, with plug
			B	2200 W	230 V~ 50 Hz	10 A	
			C	2200 W	220–240 V~ 50 Hz	10 A	
			D	2200 W	220–240 V~ 50 Hz	10 A	
			F	3200 W	220–240 V~ 50 Hz	16 A*	

* If converting an appliance to connection type 230 V~ 16A, order set W85585 separately. Only qualified personnel are permitted to carry out the installation.

** Key (see page 2)

Plumbing-in data

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

Value		Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa	1.0 MPa
	Flowing	–	0.08 MPa	1.0 MPa
Water hardness		–	0.5 °fH	50 °fH
Water inlet temperature		–	5 °C	60 °C

14.3 Installation summary

Keep base compartment unobstructed, appliance stands on the floor.

		Nischenhöhe H in mm

Decor system	Fully integrated
Minimum weight	5 kg
Maximum weight	7 kg
Special set of strong springs W84603	Up to 10 kg

- The weight dimensions only apply to uniform decor panels up to 22 mm thick.
- For decor panels that are thick or uneven (e.g. frame constructions or bevelled glass plates), the CS set «Door hinge brake» (art. no. 1011228) can be used to provide additional stability to the appliance door when pushed open (see page 155).

For different dimensions / decor panel weights, check using the “Calculation of special decor panel for dishwashers” tool: <https://www.vzug.com/b2b/au/en/planningaid>

Tall unit

Cross-section of installation example

C Removable lower front panel
 (251)

Niche floor A

- Load-bearing capacity of niche floor **A**: 100 kg
- Given a load of 75 kg per appliance foot **G**, the niche floor may sag by a max. of 1 mm.

Installing extra-long decor panel

* A continuous soffit vent is recommended.

- E** Worktop
F Continuous soffit vent
G Decor panel
H Niche height

15 Refrigerators

15.1 General notes

Insufficient ventilation can cause a malfunction and shorten the life of the appliance.

Heavy door panel weights shorten the service life of the door hinges. Observe maximum permissible weight.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

In an open-plan kitchen and living room, higher noise emissions can be expected if the ventilation slits face into the room.

15.2 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Climate class	Mains connection	Fuse	Mains cable
Refrigerators				
CombiCooler V4000 (51086/51087)	SN-T	220–240 V~ 50 Hz	10 A	2.2 m, with plug
CombiCooler V4000 178NI (51108)	SN-T			
Prestige T (51081)	SN-T			
Jumbo 60i (51078)	SN-ST			2.1 m, with plug
Jumbo 60i T (51092)	SN-T			
Magnum 2 60i (51076)	SN-T			
CombiCooler V6000 Supreme (51096)	SN-T			2.2 m, with plug
Cooler V6000 Supreme (51098)	SN-T			
Winecoolers				
WineCooler V4000 90 (51102)	SN-ST	220–240 V~ 50 Hz	10 A	2.2 m, with plug
Winecooler UCSL 60i (51093)	SN-ST			2.1 m, with plug
WineCooler V6000 (51095)	SN-ST			2.1 m, with plug
WineCooler V6000 Supreme (51097)	SN-T			2.2 m, with plug
Freezers				
Iglu 60i (51077)	SN-ST	220–240 V~ 50 Hz	10 A	2.1 m, with plug

Freezer V6000 Supreme (51099)	SN-T			2.2 m, with plug
FoodCenter				
FoodCenter V2000 (52004)	SN-T	220–240 V~ 50 Hz	10 A	2.0 m, with plug

15.3 Ambient conditions

Condensate may form in the appliance in tropical conditions and this has to be taken into account in the planning.

Climate class	Minimum	Maximum
SN	+10 °C:	+32 °C:
N	+16 °C:	+32 °C:
ST	+16 °C:	+38 °C:
T	+16 °C:	+43 °C:

15.4 Niche ventilation

For trouble-free heat dissipation of the appliance, an air duct must be provided whose width is no greater than the width of the unit with an unobstructed passage of at least 200 cm² from the air inlet in the plinth area **A** to the air outlet at the back **B** and at the front at the top **C**.

If there are wall units the ventilation gap **x** must be selected according to the following table.

If, for design reasons, a smaller ventilation gap **y** is preferred for the front-facing air outlet at the top, then ventilation at the top must be possible across several unit widths. The dimensions for **y** are given in the following table.

If refrigerators/freezers are installed side by side, the cross-section requirements for the air duct are doubled (**width b**).

Dimensions per appliance	b (mm)	y (mm)	x (mm)	
	550–568	≥40	≥50	
	1100–1168	≥30	≥100	
	≥1650	≥20		

15.5 Refrigerators

For refrigerators with a niche width of 60 cm, a kitchen cabinet depth of 560 mm is recommended. Ensure there is a minimum distance of ≥ 50 mm to the back wall.

CombiCooler V4000 (51086/51087)

(integrable)

Maximum permissible weight of door panel:

17.5 kg (top) / 12 kg (bottom)

a Overlap, b Gap (≥ 4 mm)

Prestige T (51081)

(integrable)

Maximum permissible weight of door panel:

17.5 kg (top) / 12 kg (bottom)

a Overlap, b Gap (≥ 4 mm)

CombiCooler V4000 178NI (51108)

(integrable)

Maximum permissible weight of door panel:

17.5 kg (top) / 12 kg (bottom)

* = Recommendation: 560 mm.

Magnum 2 60i eco (51076)

(integrable)

Maximum permissible weight of door panel: 26 kg

* = Recommendation: 560 mm.

Jumbo 60i (51078), Jumbo 60i T (51092)

(integrable)

Maximum permissible weight of door panel: 26 kg

a Overlap, **b** Gap (≥4 mm) * = Recommendation: 560 mm.

CombiCooler V6000 Supreme (51096) (fully integrated)

Gross weight: 212 kg. Maximum permissible weight of door panel: 23 kg (top) / 11 kg (bottom).

Water connection: Length 2.5 m, a water outlet and Aquastop does not have to be provided.

Fixed water connection : 3/4" internal thread, the water connection must be accessible at all times.

Electrical connection cable: 2.2 m.

* = For niche height >2064, the height of door panel must be adjusted.

** = Chrome front grille can be replaced by kitchen cabinet front (for dimensions see installation instructions).

S Solo installation: Width of cabinet front 894 mm, dimension of gap 3 mm.

Side-by-side: Width of cabinet front 894 mm, dimension of gap 4 mm.

OT View without door panel, **MT** View with door panel, **L** Air inlet (at least 50% open), **M** Magnet for mounting.

Dimensions for ventilation grille and position of magnet:

A = 894, **B** = 215, **C** = 700, **D** = 200, **E** = approx. 10, **F** = 60, **G** = 15-30.

Installation accessories:

Chrome steel door panel set (incl. chrome designer handle) width: 894, height of fridge compartment: 1320, height of freezer compartment: 581.

Hinge left: Article no. **1090119**, hinge right: Article no. **1087155**.

For side-by-side installation: Lateral plastic connecting angle + lateral plastic cover strip (included in scope of delivery). Intermediate plastic cover strip (accessory available for order: article no. **1101167**).

Cooler V6000 Supreme (51098) (fully integrated)

Gross weight: 189 kg. Maximum permissible weight of door panel: 34 kg.

Electrical connection cable: 2.2 m.

* = For niche height >2064, drill holes in and height of door panel must be adjusted (see installation instructions).

** = Chrome front grille can be replaced by kitchen cabinet front (for dimensions see installation instructions).

S **Solo installation:** Width of cabinet front 894 mm, dimension of gap 3 mm.

Side-by-side: Width of cabinet front 894 mm, dimension of gap 4 mm.

OT View without door panel, **MT** View with door panel, **L** Air inlet (at least 50% open), **M** Magnet for mounting.

Dimensions for ventilation grille and position of magnet:

A = 894, **B** = 215, **C** = 700, **D** = 200, **E** = approx. 10, **F** = 60, **G** = 15-30.

Installation accessories:

Chrome steel door panel set (incl. chrome designer handle) width: 894, height: 1904.

Hinge left: Article no. **1090120**, hinge right: Article no. **1087157**.

For side-by-side installation: Lateral plastic connecting angle + lateral plastic cover strip (included in scope of delivery).

Intermediate plastic cover strip (accessory available for order: article no. **1101167**).

Winecooler V6000 (51095)

* = Recommendation: 560 mm.

Model	Installation type	Niche height H
51095	EURO 60	$1778^{+2/}_0$

WineCooler V6000 Supreme (51097) (integrable)

Gross weight: 153 kg. Maximum permissible weight of door panel: 34 kg.

Electrical connection cable: 2.2 m.

* = For niche height >2064, drill holes in and height of door panel must be adjusted (see installation instructions).

** = Chrome front grille can be replaced by kitchen cabinet front (for dimensions see installation instructions).

OT View without door panel, **MT** View with door panel, **L** Air inlet (at least 50% open), **M** Magnet for mounting.

Dimensions for ventilation grille and position of magnet:

A = 594, **B** = 215, **C** = 400, **D** = 200, **E** = approx. 10, **F** = 60, **G** = 15-30.

Installation accessories: Chrome steel door panel set (incl. chrome designer handle) width: 594, height: 1904.

Hinge left: Article no. **1090121**, hinge right: Article no. **1087156**.

For side-by-side installation: Lateral plastic connecting angle + lateral plastic cover strip (included in scope of delivery). Intermediate plastic cover strip (accessory available for order: article no. **1101167**).

Model	Installation type	Niche height H
51097	EURO 60	≥2064

15.7 Freezers

Iglu 60i (51077), Iglu 60i T (51091) (integrable)

Maximum permissible weight of door panel: 26 kg

$\geq 200 \text{ cm}^2$

a Overlap, * = Recommendation: 560 mm.

Side-by-side installation

Refrigerators **K** and freezers **G** can be installed left/right or vice versa. The appliances must be installed in separate cabinet units.

Freezer V6000 Supreme (51099) (fully integrated)

Gross weight: 153 kg. Maximum permissible weight of door panel: 34 kg.

Water connection: Length 2.5 m, a water outlet and Aquastop does not have to be provided.

Fixed water connection : 3/4" internal thread, the water connection must be accessible at all times.

Electrical connection cable: 2.2 m.

* = For niche height >2064, drill holes in and height of door panel must be adjusted (see installation instructions).

** = Chrome front grille can be replaced by kitchen cabinet front (for dimensions see installation instructions).

OT View without door panel, MT View with door panel, L Air inlet (at least 50% open), M Magnet for mounting.

Dimensions for ventilation grille and position of magnet:

A = 594, B = 215, C = 400, D = 200, E = approx. 10, F = 60, G = 15-30.

Installation accessories: Chrome steel door panel set (incl. chrome designer handle) width: 594, height: 1904.

Hinge left: Article no. **1090126**, hinge right: Article no. **1090125**.

For side-by-side installation: Lateral plastic connecting angle + lateral plastic cover strip (included in scope of delivery). Intermediate plastic cover strip (accessory available for order: article no. **1101167**).

15.8 FoodCenter

FoodCenter V2000 (52004)

- 5 m water inlet hose at back of appliance (connection with 3/4" thread).
- Water inlet pressure: between 207 KPa and 689 KPa (2.07 bar and 6.89 bar).
- The water filter supplied must be installed on an exposed wall (not on the wall directly behind the appliance).
- A water outlet does not have to be provided.
- The niche clearance at the back must be observed for the ventilation of the appliance.
- Ensure an air outlet above the appliance of 200 cm².

On-site connections (power, water inlet) are not permitted behind the appliance. It must be possible to pull the appliance out of the niche at any time without dismantling any part of the cabinet.

16 Accessories

16.1 Ovens / steam cookers / microwave ovens / coffee machines / vacuum drawers / warming drawers / system drawers

Designer handle for CombiSteamer V6000 45L Grand

Angle set for combination possibilities

- For installation, see installation instructions J21021050
- ▶ In the niche mount to the wood left and right.
- ▶ The appliance is placed on the mounting angles and pushed into the niche.

Art. no. K50572, construction type EURO

S Unit front

Trim kit (edge protection)

- For installation, see installation instructions:
1044771, 1044772, 1075859.

Art. no. 1056472 trim kit (edge protection)
only needs to be ordered once.

Anti-tip set for VacuDrawer V6000

- For installation, see installation instructions: **1044772**.

Art. no. 1016692 Anti-tip set
 only needs to be ordered once.

Design cover

The design cover covers the intermediate base for EURO niches and is for a combined installation of two appliances e.g. oven **1** and combi-steam cooker **2**. The cover is dimensioned for panel overlapping of 4 mm.

- For installation, see installation instructions J340050
- Depending on the thickness of the intermediate base **b**, two variants (nero) of the design cover **A** are available:

Art. no. K37158 (**b** = 16 mm / **a** = 10.5 mm)

Art. no. K37159 (**b** = 19 mm / **a** = 13.5 mm)

Aesthetic profile

Assembly kit with aesthetic profile for installing Miwell next to another appliance.

- For installation, see installation instructions 1009019

Art. no. 1009179

Drain hose

5 m drain hose for CombiSteamer V6000 45F with fixed water connection.

Art. no. 1012933
