PRESS RELEASE

## **V-ZUG PRESENTS THE WORLD'S LARGEST COMBI-STEAM OVEN: A STUNNING APPLIANCE FOR HIGH-LEVEL CULINARY RESULTS**

The 90cm-wide CombiSteamer V6000 45L Grand brings a new dimension to steaming and baking, impressive in size and elegant in appearance. Ideal for unique recipes or for preparing several dishes at the same time, the new V-ZUG combi-steam oven combines innovative technology and outstanding design.

The CombiSteamer V6000 45L Grand is a highly evolved appliance that assimilates the latest food trends to combine the advantages of steam with perfectly distributed hot air and grill. A fast, versatile, and healthy way of cooking for top-rated culinary results.

The size and aesthetics of the CombiSteamer V6000 45L Grand appeal both to professionals and everyday cooks who particularly appreciate the importance of aesthetics and design, thanks to discreet details, fine craftsmanship, and high-quality materials.

### **Next-level hosting**

Hosting will never be the same; this combi-steam oven is large enough to allow any food to be cooked or baked, even in large quantities. With 46% more space than standard ovens, users can cook for up to 16 people. Healthy, delicious gourmet recipes can be made quickly and easily, achieving that elusive softness on the inside and crispness on the outside.

## **The beauty of design**

As a part of the Excellence Line, the CombiSteamer V6000 45L Grand features high-quality materials and has subtly incorporated handles, whilst the appliance door can be opened and closed automatically on appliances without handles by simply touching the AutoDoor display. The iconic CircleSlider on the expansive touchscreen graphic display allows users to control the combi-steam oven rapidly and intuitively. The Grand is available in black, platinum, and pearl mirrored glass.

## **Patented TwinHeat technology**

The powerful dual hot-air fan with patented TwinHeat technology, developed particularly for the wide cavity of the CombiSteamer V6000 45L Grand, guarantees an efficient and rapid circulation of hot air and steam. Thanks to this advanced air distribution, food is cooked gently and browns evenly, simultaneously preserving vitamins, colour, flavour, and moisture.
