## PRESS RELEASE

# Super-sized high-end cooling: the Supreme Line by V-ZUG

*Huge amounts of space to store food and drink, high-quality materials and unique workmanship: the refrigerators and freezers in the exclusive Supreme Line leave nothing to be desired when it comes to design and dimensions.*

The CombiCooler V6000 Supreme, the Cooler V6000 Supreme and the WineCooler V6000 Supreme have plenty of cold storage space. Wide internal shelves with much bigger gaps between them easily accommodate large shops and a variety of positioning options offer a high degree of flexibility. The WineCooler V6000 Supreme has space for 72 bottles in two temperature zones, so can accommodate a large selection of fine wines.

### **Elegant design**

The new appliances are not only generous in terms of their dimensions, they also feel and look luxurious. The Supreme appliances are manufactured from authentic materials, the high quality of which is both visible and tangible. Giant chrome steel panels produced from a single piece plus solid elements guarantee stability. The single-door models are perfect for a side-by-side solution in your own home. In combination they not only provide a lot of space, their clear layout also facilitates finding the particular food you are looking for.

### **Tailor-made convenience**

Not only do the appliances have a TFT touchscreen display which makes them easy and straightforward to use, but their unique InfinityShelf system means they can also be easily adjusted to individual requirements. The shelves are suspended on sliding tracks that can be freely positioned at

any height – even when loaded. There are no predefined shelf heights or limits. Drawers with SoftTelescope can be fully extended and also feature self-closing runners with a soft-close mechanism. Moreover, the MonoFridge function turns the CombiCooler freezer compartment into a normal refrigeration section in just a few hours – allowing the appliance to be customized to suit individual needs.

### **Optimum refrigeration technology**

ClimateControl uses active air circulation to minimize temperature differences, thus ensuring that food in the CombiCooler and Cooler retains its freshness for longer.

The CombiCooler in the Supreme Line is the first built-in V-ZUG appliance to have an integral IceMaker, with an ice cube dispenser that refills automatically. All that is required to operate the IceMaker is a connection to the mains water supply.

### **About V-ZUG**

V-ZUG is the leading Swiss household appliances brand and has its head office in Zug. For over 100 years, the company in the heart of Switzerland has been developing and producing innovative kitchen and laundry appliances which make everyday life easier while inspiring and delighting users – for a lifetime of enjoyment. V-ZUG has 10 display and advice centres and 16 service centres in Switzerland and is represented internationally in 18 countries. The company has around 1,700 employees worldwide and trains over 70 apprentices. As the market leader in Switzerland, V-ZUG is also committed to improving the economy, society and the environment, in addition to pursuing its own business operations. Together with its sister company Gehrig Group AG and subsidiary SIBIRGroup AG, the owner-operated company belongs to the Metall Zug group.

### **About Metall Zug**

Metall Zug is a Swiss industrial holding company with its head office in Zug and offers a wide range of innovative and sustainable premium and precision products. The group is a technology leader and develops, produces and distributes appliances, machines and solutions through its household appliances, infection control and wire processing business units. The Metall Zug group consists of V-ZUG AG, Gehrig Group AG (Household Appliances Business Unit), the Belimed group (Infection Control Business Unit) and the Schleuniger group (Wire Processing Business Unit). The industrial holding company grew out of the metalwork company Metallwarenfabrik Zug which was established in 1887, and is still primarily owned by the founding family. The Metall Zug group employs around 3,600 people worldwide and is listed on the SIX Swiss Exchange.
