Planning aid

International collection
Kitchen appliances

2018

Note on content

Please note

This planning aid applies to the specified model numbers only. Older planning aids for earlier generation models may be requested in electronic form from our Customer Services.

This planning aid is not to be used as installation instructions! The regulations and instructions binding for the appliance installation are to be obtained from the installation instructions packed with the appliances. The installation instructions can also be downloaded from the internet from www.vzug.com/b2b.

Modifications

Text, diagrams and data correspond to the technical standard of the appliances at the time this planning aid went to press. The right to make technical modifications for the purpose of the further development of the appliances is reserved. The German, English, French and Italian versions are binding. V-ZUG accepts no liability for translations in other languages.

Symbols used

Denotes important safety precautions.
Failure to observe said precautions can result in injury or in damage to the appliance or fittings!

- Indicates an instruction.
- Indicates a list.

Information and precautions that should be observed.

Extraction

Recirculation

Supplementary documents

In this planning aid, occasional reference is made to supplementary documents. These documents can be requested from the Head Office in Zug by sending an e-mail to service-support@vzug.com.

1 Overview of connections, ranges and dimensions

Electrical connections must be carried out by qualified experts in accordance with the guidelines and standards for low-voltage installations and the specifications of the local electricity supply companies.

A plug-in appliance may only be connected to a socket outlet with earthing contact, installed according to specifications. An all-pole mains isolating device with 3 mm contact opening should be provided in the house wiring system. Switches, plug and socket devices, circuit breakers and fusible cut-outs which are accessible after installation and which have all-poles switching are permissible as isolating devices. Effective earthing and separately installed neutral and earth conductors ensure safe and fault-free operation. After installation, live parts and cables with basic insulation must not be accessible. Check old installations.

Electrical connections must be carried out by qualified experts.

Plan a separate inlet for the electrical connection for each appliance.

1.1 General operating conditions

Detailed information on the electrical connection data can be found at the beginning of each section.

Value	Nominal value	Minimum	Maximum
Voltage	230 V	207 V	253 V
Voltage	400 V	360 V	440 V
Frequency	50 Hz sinusoidal	49 Hz sinusoidal	51 Hz sinusoidal

- Short duration frequency variation in the mains: $\pm 5\%$
- Long duration frequency stability in the mains (for synchronous clocks): $\pm 10\text{ ppm}$
- The appliances are designed for use up to a max. altitude of 2000 m above sea level.

1.2 Using residual current devices in house wiring system / fault current

High fault currents are inherently present in ovens and hobs. The values can be affected by various factors and vary widely. Fault currents of up to approximately 10 mA per appliance are permissible in accordance with the norm. The values are measured in the warm operating state.

If residual current devices (RCDs) are used in the house wiring system, we recommend that the above-mentioned appliances have their own RCD protection, separate from the power supply for the rest of the system. 30 mA or higher should be selected as the tripping current for the residual current device.

1.3 Validity

The product family (model number) corresponds to the first alphanumerics of the serial number on the identification plate.

1.4 Positions of electrical connections

For EURO kitchens, allowance from the floor can vary. In this case, the electrical connection should be calculated using the dimension from the bottom edge of the appliance.

Oven above an oven

With this combination, an electrical connection should be provided for each appliance. Depending on the installation height and the type of combination, the connections may be located at different heights.

Wall hoods with telescopic casing

The electrical connection must pass between the exhaust air piping and the lagging sheets. The measurements given in the table ensure that this condition is met.

- 1 Wide switch box / control box / autarchic hob
- 2 Refrigerator in base unit / dishwasher
- 3 Oven/coffee-center
- 4 Combinations (oven / steam cooker / microwave)
- 5 Refrigerator, winecooler in tall unit
- 6 Microwave in a wall unit
- 7 Range hood
- 8 Warming drawer

M1 Distance from centre to dishwasher/refrigerator connection in base unit

M2 Distance from centre to coffee-center connection

M3 Distance from centre to range hood connection

Provide additional clearance for electrical connections if the installation niche has only the minimum depth.

1.5 Built-in EURO

No.	Designation	Connection from appliance support	Connection in niche	Type of connection
1	Oven, steam cooker (height 600 mm)	max. 30 mm (plinth height 100 mm)	Centre	I
2	Control box, autarchic hob	–	Centre	I

* Not valid for appliances with retractable handle

Appliances	H3
Oven, steam cooker	4 mm
Microwave, coffee-center, system drawer, vacuum drawer and warming drawer	0 mm

2 Steam cookers

Only use if water hardness >3° French hardness (>1.7° German hardness).

2.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

To ensure adequate ventilation, the niche in which the appliance stands must have a supply air opening of min. 25 cm².

2.2 Electrical connection data

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable	
Combi-Steam MSLQ **	A, B, C, D, E, F	400 V 2N~ 50 Hz	16 A	5700 W	min. 1.8 m, without plug	
		230 V~ 50 Hz	25 A ***			
Combair-Steam SL, Combair-Steam SE, Combi-Steam HSL, Combi-Steam XSL(F), Steam XSL	A, E	230 V~ 50 Hz	16 A	SE, SL, XSL(F): 3700 W	min. 1.8 m, with plug	
	B, C				min. 1.8 m, without plug	
	D	220–240 V~ 50 Hz		HSL: 3500 W	min. 1.8 m, with plug	
	F					
Steam HSE	A, B, C, E	230 V~ 50 Hz	10 A	2200 W	min. 1.8 m, with plug	
	D, F	220–240 V~ 50 Hz				

* Country group (see page 2)

** The Combi-Steam MSLQ can also be operated with a single-phase connection (230 V~/ max. 16 A). For performance reasons, however, it is to be connected with a two-phase connection or fitted with a 25 amp fuse whenever possible.

*** This appliance conforms to IEC 61000-3-12 provided that the short-circuit power Ssc at the connection point of the customer system to the public power system is greater than or equal to 1140 kW. It is the responsibility of the installer or user of the appliance to ensure, if necessary after consultation with the network operator, that this appliance is only connected to a connection point with a Ssc value that is greater than or equal to 1140 kW.

2.3 Air circulation diagram for Combi-Steam MSLQ

To ensure good ventilation, the niche in which the appliance stands must have a supply air vent, position **A** and **B**, of a total of ≥ 80 to $\leq 850 \text{ cm}^2$, of which **B** must be $\geq 60 \text{ cm}^2$.

Installation below an induction hob (see page 60).

2.4 Combi-Steam MSLQ (23015)

¹ For niche height 635 mm: Compensation elements, see the Accessories (see page 133) section.

2.5 Combair-Steam SL (23012/23013), SE (23010)

Front dimensions of the appliances: Detail X/Y (see page 10)

2.6 Combi-Steam HSL (23004), Steam HSE (23002)**2.7 Combi-Steam XSL (23005/23006), Steam XSL (23023)**

Front dimensions of the appliances: Detail X/Y (see page 10)

2.8 Combi-Steam XSLF (23007/23008)

Front dimensions of the appliances: Detail X/Y (see page 10)

Below second appliance

Above second appliance

Above warming drawer

X = Height of second appliance

Y = Niche height

W = Angle set K50572

For an installation depth of under 575 mm, it is recommended that the appliance be installed below other appliances for space reasons.

If installing with a second appliance in the same niche, use the angle set **W** (K50572).

Installation

Plumbing in

- 1** Hose clamp
2 Reinforced inlet hose 2 m, G $\frac{3}{4}$ "
3 Drain hose 3 m, internal diameter of connection 22 mm
On-site installations
4 Drain trap
5 Plinth panel
6 Hose fed through plinth
7 Cold water connection with stopcock

Drain

Length of drain hose: 3 m

- An optional 5 m drain hose (Art. no. 1012933) can be ordered if required.

- The drain hose must not be lengthened or shortened.
The drop from the bottom of the appliance to the drain trap must be at least 50 mm.
The drain hose must be laid flat without any kinks.

Cold water connection inlet

Operating pressure: 0.1–1.0 MPa (1–10 bar)

Only use if water hardness >3° French hardness (>1.7° German hardness).

Length of reinforced hose: 2 m

- Observe local water authority regulations.
Existing hoses that are defective must be replaced.
The reinforced hose must not be lengthened.
The stopcock must be accessible at all times.

3 Ovens

3.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

To ensure adequate ventilation, the niche in which the appliance stands must have a supply air opening of min. 25 cm².

Supremo HSL & Miwell HSL

Supremo XSL & compact oven / steam cooker

Front dimensions of the appliances: Detail X/Y (see page 10)

8 Glass ceramic hobs – induction, wok, teppanyaki

8.1 General notes

It is imperative for induction hobs to have adequate ventilation. See sections Installation without protective plate (see page 56) and Installation with protective plate (see page 58).

This is guaranteed with a worktop depth of 20 mm to 40 mm.

If a drawer is installed directly underneath, a protective plate is recommended in the vicinity of the mains cable and to protect the ventilation openings. The ventilation protective plate set can be used for this purpose. Accessories (see page 133).

With a front-facing air gap of 3 mm, a ventilation protective plate with seal is essential. Installation with protective plate (see page 58).

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The layout of the hobs to be installed may differ from the hobs illustrated here!

8.2 OptiGlass coating

Halogen or LED light bulbs are recommended for illuminating hobs with the OptiGlass coating. The use of fluorescent tube lighting to illuminate hobs with the OptiGlass coating causes the glass surface to shimmer.

8.3 Electrical connection data

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable	
GK16TIWSZ	A, B, C, D, E, F	220–240 V~50/60 Hz	16 A	3000 W	1.7 m, without plug	
GK17TIYSZ				2800 W		
GK26TIMS ..., GK27TIMS ...				3700 W		
GK27TIYSZ				5600 W		
	A, E	380–415 V 2N~ 50/60 Hz	32 A	5600 W	7400 W	
	B, C, D, F	220–240 V~50/60 Hz		5600 W		
GK46TI ..., GK47TI ..., GKD46TI...	A, E	380–415 V 2N~ 50/60 Hz	16 A	7400 W		
	B, C, D, F	220–240 V~50/60 Hz	32 A			
GK56TIMS ..., GK57TIMS ..., GK11TIFKZ	A, E	380–415 V 3N~ 50/60 Hz	16 A	11100 W		
	B, C, D, F	220–240 V~50/60 Hz	48 A			
GK11TIFKZ	A, E	380–415 V 2N~ 50/60 Hz	16 A	7400 W		

* Country group (see page 2)

8.4 Ventilation

In order to guarantee good ventilation, a space of ≥ 10 mm height is necessary beneath the appliance.

1. The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation via the ventilation slits.
The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.
2. Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet.
In order that enough cold air can be drawn in, there must be a continuous circulation of fresh air that extends outside the cabinet.
The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.

8.5 Induction hob with integrated range hood

GKD46TIMASZO - FUSION (31094)

Dimensions

All plastering, plasterboarding, wall papering or painting work is to be carried out prior to installing the appliance.

Ensure that the material is sufficiently stable.

Plan a removable base plate or service flap for fan motor (and recirculation box in the case of the recirculation mode).

For the recirculation mode, ensure sufficient ventilation so that moisture can escape. Plan in suitable material/wood.

1. The exhaust ducting can be to the left or right.
2. The fan motor can be turned, this changes the installation type.
3. Depending on space requirements, the position of the fan motor can be adjusted by shortening the flat channel.

Surface-mounted installation

The layout of the hob to be fitted may differ from the hob illustrated!

Type	A Depends on producer	B	H	Corner radius Ra/Ri
GKD46TIMASZO	20–70 mm	≥212 mm	202 mm	5/1.5 mm

A Worktop depth

B Required clearance for service replacement over the entire cut-out area.

H Dimension from the top of the work surface to the underside of the hob

Ri Corner radii of appliance

Ra Outer corner radii of cut-out

W The intermediate base must be removable from below.

Flush installation

The layout of the hob to be fitted may differ from the hob illustrated!

Type	A Depends on producer	B	C/D	H	Corner radius Ra/Ri
GKD46TIMASZO	20–70 mm	≥400 mm	750/490	206 mm	5/1.5 mm

A Worktop depth

B Required clearance for service replacement over the entire cut-out area.

H Dimension from the top of the work surface to the underside of the hob

Ri Corner radii of appliance

Ra Outer corner radii of cut-out

W The intermediate base must be removable from below.

Installation overview base unit**Wall installation with depth of ≥ 600** **Wall/island installation with depth of ≥ 700** **Island installation with depth of ≥ 900** 

* Surface-mounted installation (flush installation 206 mm)

Flat channel F is not included in the scope of delivery. Order flat channel 1046629 at the same time.

Installation

- ▶ Prepare base according to intended installation variant.

- Provide for an inspection opening for service replacement purposes as shown in the diagrams, observe exhaust air duct to left or right.

Plastic accessories

Metal accessories

Extraction mode

There is a danger of toxic fumes developing if the range hood is operated at the same time as an ambient air-dependent firing system!

The conversion kits and suitable flat channel or pipe systems are available for order as accessories.

- Only use pipes with a smooth inner surface or flexible duct hoses made from non-flammable materials for exhaust duct-work.
- To achieve the greatest possible air extraction with the lowest noise levels, please observe the following:
 - Standard ventilation outlet is by means of flat channel or pipe.
 - The diameter of the exhaust duct pipe must not be less than ø150.
 - The exhaust ducting should be as short and straight as possible.
 - Only use connection elbows with large radii.
 - The exhaust ducting must not be kinked or compressed.
 - Make sure that all connections are secure and airtight.

Any constriction of the airflow will reduce extraction performance and increase operating noise.

If the exhaust duct is to be routed outdoors, we recommend installing a telescopic wall pipe H42066.

If the exhaust air is to be ducted into a chimney flue, the intake piece must be aligned with the flow direction of the flue.

- If the exhaust duct runs through cool rooms, lofts, etc., there may be sharp variations in temperature in individual areas. Vapour and condensation is to be expected. This makes it therefore necessary to insulate the exhaust ducting / air duct.

Recirculation mode

The conversion kits and suitable flat channel systems are available for order as accessories.

For recirculation mode, ensure access for maintenance purposes and also ensure the blow-out opening is at least 500 cm² (e.g. base recess or lamella base).

If an exhaust air connection is not structurally possible, the range hood must be set up for recirculation operation.

Recirculation mode with recirculation box

- Connect the channel connector K to the recirculation box J.
- Hold the Ø button depressed for 1 second.

- An acoustic signal is emitted and a message appears in the display.

- Confirm with OK.
- Touch Ø.
- Select the «Ventilation» user setting.
- Touch ☰ to change the mode to recirculation air.
- Confirm the setting with OK.

- The setting is saved.

The activated charcoal filters are integrated in the recirculation box. Activated charcoal filters are not used in the range hood.

The activated charcoal filters are integrated in the recirculation box 1012161. Activated charcoal filters are not used in the range hood.

8.6 Surface-mounted installation with standard mounting frame

- Corner radii of cut-out, aim for ≤ 10 mm.
- Corner radii of appliance 8 mm

* The required clearance must be observed!

Type	A Depends on producer	B	H	Corner radius Ra/Ri
GK46TIMASCO, GK46TIMGC, GK46TIMSCO, GK46TIMXSCO	≥ 20 mm	≥ 60 mm	50 mm	10/8 mm

A Worktop depth (only applies in combination with directly built-under oven / steam cooker with type of construction 60-600, without Combi-Steam MSLQ)

B Required clearance for ventilation and service replacement over the entire cut-out area.

H Dimension from the top of the work surface to the underside of the hob (ventilation opening)

Ri Corner radii of appliance

Ra Outer corner radii of cut-out

* The required clearance must be observed!

- 1 Cut-outs in left/right side panels for a niche width of 900 mm, required for appliance ventilation.
- 2 The front and rear pegs are reinforced underneath. The strut width is determined by the producer of the stone worktop. The minimum peg width can vary according to the properties of the stone.

Type	A Depends on producer	B	H	Corner radius Ra/Ri
GK56TIMSCO	≥20 mm	≥61.3 mm	51.3 mm	10/8 mm

- A** Worktop depth (only applies in combination with directly built-under oven / steam cooker with type of construction 60-600, without Combi-Steam MSLQ)
- B** Required clearance for ventilation and service replacement over the entire cut-out area.
- H** Dimension from the top of the work surface to the underside of the hob (ventilation opening)
- Ri** Corner radii of appliance **Ra** Outer corner radii of cut-out

8.7 Surface-mounted installation with «DualDesign»

- Corner radii of cut-out, aim for ≤ 5 mm.
- Corner radii of appliance 1.5 mm

GK11TIFKZ - FULLFLEX (31062)

* The required clearance must be observed!

8.9 Installation without protective plate

Requirements for optimal ventilation:

- front-facing air gap of ≥ 5 mm
- a space of ≥ 10 mm in height beneath the appliance
- a worktop depth of ≥ 20 mm to ≤ 40 mm
- a supply of fresh air (≥ 15 mm air gap) is essential for the trouble-free operation of the hob.

GK26TI..., GK27TI..., GK46TI..., GK47TI...

GK46TIABS..., GK46TIAKS..., GK46TIMXS..., GK46TIMAS...

* Required for flush appliances

A Necessary space below the worktop for the ventilation of the appliance.

B Cut-out in the side walls left/right is necessary for the ventilation of the appliance.

C Cut-out in the side walls for disassembly from below, only for flush version

8.10 Installation with protective plate

For more information, see the Accessories (see page 133) section.

Requirement for optimal ventilation:

- front-facing air gap of ≥ 3 mm (with protective plate)
- distance of ≥ 10 mm between protective plate and ventilation opening
- a worktop depth of ≥ 20 mm to ≤ 40 mm
- a supply of fresh air (≥ 15 mm air gap) is essential for the trouble-free operation of the hob.

C Cut-out in the side walls for disassembly from below, only for flush version

8.11 Installing above oven / steam cooker

It is not intended that a Combi-Steam MSLQ with construction type 60-600 be installed.

It is not intended that an oven be installed below the following hobs: GK46TIMPS..., GK46TIPS..., GK56TIMS..., GK11-TIFKZ.

Type of construction: 60-600

With the use of a ventilation grille (see section Accessories (see page 133))

Type of construction 60-381: Combi-Steam HSL, Steam HSE, Combair HSE

Type of construction 60-450: Combi-Steam XSL, Combair XSL, Combair XSE

Type of construction 60-600: Combair-Steam SL, Combair-Steam SE, Combair SLP, Combair SL, Combair SEP, Combair SE

A Possible mains supply connections

B Mounting cut-outs

C Appliance height: 59.8 cm (type of construction: 60-600), 37.8 cm (type of construction: 60-381), 45.4 cm (type of construction: 60-450)

D Niche height: 63.5 cm (type of construction: 60-600), 41.6 cm (type of construction: 60-381), 45.0 cm (type of construction: 60-450)

E Cut-outs in the side walls for hobs larger than niche width

GK26TIMS, GK46TIM, GK46TIXMS, GK46TIMAS, GK46TIABS: ≥25 mm

Other hobs: ≥30 mm

9 Gas hobs

The distance from the appliance cut-out to the back wall must be ≥ 50 mm and to the side walls ≥ 200 mm. Parts such as side walls and reinforcing strips which protrude into the installation space under the cooking zone must be made of fire-resistant material.

The distance between the underside of the appliance tray and any part of the cabinet beneath that is made of combustible material must be ≥ 20 mm.

When a range hood is installed above the gas hob, the minimum distance given for the particular range hood must be observed.

Furthermore, the minimum distances illustrated must be strictly complied with even if a lower value is stated for the range hood.

A gas hob cannot be built in directly over another appliance due to the installation depth and the gas connection.

9.1 Electrical connection data

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
GAS411GSBZ, GAS421GSBZ, GAS641GKAZ, GAS641GSBZ, GAS951GSBZ	D	220–240 V~50/60 Hz	≥ 3 A	<20 W	1.7 m, with plug
GAS411GSAZ, GAS421GSAZ, GAS641EKAZ/GSAZ, GAS951GSAZ	A, B, E				1.7 m, without plug
GAS311EKBZ/GKBZ, GAS411GSBZ, GAS321EKBZ/GKBZ, GAS421GSBZ, GAS731EKBZ/GKBZ	F				1.7 m, with plug
GAS311EKBZ/GKBZ, GAS411GSBZ, GAS321EKBZ/GKBZ, GAS421GSBZ, GAS731EKBZ/GKBZ	C				

* Country group (see page 2)

9.2 Gas connection

The gas connection and the conversion to another gas type must be carried out by an authorized installer.

- The gas connection must be positioned so that the stop-cock and the supply connection point are accessible with the appliance installed.
- The gas connection must be positioned so that it does not get detrimentally hot during operation. In particular, the gas hose assemblies and the appliance's connection fittings must be clear of hot exhaust gases (e.g. from an oven).
- It must be ensured that the gas hose and the mains connection do not touch any hot parts of the appliance, otherwise the gas hose and the mains cable could become damaged through heat.
- A flexible connection lead (max. length 1.5 m) must be positioned so that it runs freely and does not come into contact with any movable parts of the kitchen cabinets (e.g. a drawer).

1/2-inch metric thread

The gas connection on the appliance has a 1/2-inch external thread in accordance with ISO 228/1. If the gas installation on site already has a corresponding counterpart, the gas appliance can be directly connected to it.

1/2-inch conical thread

If the gas connection has a conical thread, the transition piece and sealing ring must first be screwed onto the appliance. The transition piece has a conical external thread R 1/2-inch in accordance with ISO 7/11. In the case of a conical screw connection, the thread makes the seal, which is why the thread must be sealed with hemp or Teflon tape.

9.3 Ventilation

In order to guarantee minimum ventilation, a space of ≥ 20 mm height is necessary beneath the appliance.

- A** The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation via the ventilation slits. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.
- B** Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet. So that enough cold air can be drawn in, there must be a continuous supply of fresh air circulating till outside the cabinet. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.

9.4 Setting up appliance to use local gas type

The appliance settings must match the local gas type and connection pressure. If the gas type and connection pressure have not been preset, the appliance has to be converted using the nozzle set supplied or other nozzle sets available as accessories. Information on the default gas setting as well as on the supplied and optional nozzle sets by country can be found in the catalogue. Conversion to another gas type is described in detail in the relevant installation instructions.

Overview of nozzle sets

Type	Default gas setting	Nozzle set (supplied)	Additional nozzle sets available for country-specific combinations of gas type and connection pressure			
			Liquid gas G30, 50 mbar	Natural gas L/K (G25/G25.3), 25 mbar	Natural gas G20, 13 mbar	Natural gas G20, 25 mbar

10 Combined hob installation

10.1 Surface-mounted combination

The surface-mounted hob combination is currently only possible for electric hobs (up to max. hob size 70), gas hobs and hob hoods. The intermediate support 1014361 (stainless steel) or 1019199 (black) is required for this.

Intermediate supports 1014361 and 1019199 are not available in Germany.

The wok hob GK16TIWSZ cannot be built into a surface-mounted combination with intermediate support.

Dimensions table for hobs

Combinations	Cut-out width C	Intermediate support position G1	Intermediate support position G2
30+30 cm	554 mm	277 mm	-
30+40 cm	657 mm	277 mm	-
40+40 cm	760 mm	380 mm	-
30+30+30 cm	838 mm	277 mm	561 mm
30+60 cm	844 mm	277 mm	-
40+60 cm	947 mm	380 mm	-

Cut-out in mm	Hob size in cm	Cut-out width	Silicone joint	Hob/worktop overlap

11 Range hoods

Technical information on the range hoods can be found in the document J32836 «TechInfo for range hoods».

11.1 General notes

If other firing systems are being used at the same time (e.g. wood, gas, oil or coal fired heating appliances), safe operation is only possible providing a room negative pressure of 4 Pa (0.04 mbar) is not exceeded at the location of the appliance.

Risk of toxic fumes! An adequate flow of fresh air must be guaranteed e.g. via non-closable openings in doors or windows and in combination with an air-intake/exhaust-air wall box or by other technical means.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

Minimum distance to the hob

If a V-ZUG appliance is being combined with a third-party brand (hob or range hood) and the stipulated minimum distance between the combined appliances is different, then the greater of the two must be observed. The minimum distance is measured between the bottom edge of the range hood and the bottom of the pot or pan.

If the appliance is installed over gas hobs, each cooking zone must be fitted with an ignition fuse.

Extraction mode

The extracted air must not be fed into a chimney which is used for exhausting fumes from appliances burning gas or other fuels.

Observe the local fire regulations.

Installation notes

- In addition to the correct dimensioning of the exhaust duct, it is also necessary to ensure a sufficient inflow of fresh air. **to replace the air that is being extracted.**
- Avoid routing the exhaust duct to the side through the chimney casing.
- Planning features for non-destructive de-installation and maintenance of the appliance:
 - Do not route telescopic casing in suspended ceilings.
 - Avoid silicone joints between the telescopic casing and the appliance.
 - All plastering, plasterboarding, wall papering or painting work is to be carried out prior to installing the appliance.

11.2 Special hoods

Special hood type **DSTS9 (64004)** may not be used in combination with gas hobs.

Special hood type **DSMS (64005)** may only be operated in combination with a gas hob of V-ZUG gas hob type: GAS321x, GAS421x, GAS641x, observing the permitted combination installation variants. The content of the operating and installation instructions for the listed gas hobs must be observed! If operating a permitted gas appliance, the hob hood must be fitted with the dedicated gas deflector 1031218 (accessory)! Operating a gas appliance without the gas deflector is not permitted!

DSMS (64005)

Weight

~21.5 kg

Suitable flat channel systems **Q** are available for order as accessories.

- The connection between the hob hood and the exhaust air duct **T** can be to the left or right.
- The ventilation outlet **L** can be fed through one of the four sides, however this can change the installation type.
- Depending on space requirements, the exhaust ducting **T** can be adjusted through shortening.
- The control unit **E** can be repositioned (≤ 250 mm) if required.
- Plan a removable **base plate** or **service flap** for fan motor **M** and recirculation box **U** (for recirculation mode).
- Access to the fan motor **M** and the recirculation box **U** is facilitated through extendible flat channel systems **Q**.
Recommendation: Flat flexible elbow **H**, article no. **1012786** with flexible length (240–600 mm).
- For the recirculation mode, ensure sufficient ventilation so that moisture can escape. Plan in suitable material/wood.

Installation overview for base

Wall installation, depth ≥ 600 mmWall/island installation, depth ≥ 700 mmIsland installation, depth ≥ 900 mm

* Flush installation. Surface-mounted installation: 170 mm.

Appliance selection and combination possibilities

1. Planning example: Two hobs

Air duct in base to left/right.

The WOK glass ceramic hob / gas hob **W** is **always** positioned on the opposite side of the exhaust air duct. Standard hob **S**.

 A WOK glass ceramic hob and gas hob may not be combined! In general, the use of a gas wok, in any combination, is not permitted.

2. Example: Three hobs

Air duct in base on both sides to left/right.

The Teppan Yaki hob **P** (600 mm) is positioned in the middle. The WOK glass ceramic hob / gas hob **W** is **always** positioned on the opposite side of the exhaust air duct. Standard hob **S**.

3. Example: Three hobs**Air duct in base on both sides to outside.**The WOK glass ceramic hob / gas hob **W** (400 mm) is positioned in the middle. Standard hob **S**. Possible position of 2 fan motors **M**.**4. Example: Large hob positioned in the middle****Air duct in base on both sides to inside for space economy.**Allows standard hob **S** with ≤ 800 mm installation width to be positioned in the middle. The WOK glass ceramic hob / gas hob **W** can **not** be positioned in the middle. Possible position of 2 fan motors **M**.

For use with a gas appliance

The hob hood may only be used with the dedicated gas deflector 1031218 (accessory) with one of the gas appliances listed below. Operating the hob hood without the gas deflector is not permitted!

Permitted gas appliances for use with the hob hood:

V-ZUG gas hob type: **GAS321x, GAS421x, GAS641x**, observing the permitted combination installation variants.

Combining the hob hood with two gas hobs is not permitted!

Using another gas appliance type/model or manufacturer is not permitted and can cause lasting damage to the hob hood.

Failure to observe the above instruction can cause lasting bodily harm and lasting damage to property and the appliance. In such a case, any and all liability, guarantee and goodwill claims will be rejected, now and in the future!

Burns hazard!

The appliance and surrounding components get hot during operation! Allow the fan flap, gas deflector and other components to cool down before touching them.

Fire hazard!

Grease deposits can build up in the grease filter and catch fire. Clean the grease filter regularly. Only operate the appliance with the gas deflector.

Permitted installation variants (V-ZUG gas hob only)

As a variant may also be installed on either side of the appliance.

A Caution: Hot surface!

B Gas deflector correctly mounted.

The gas deflector 1031218 (required accessory) reduces the deflection/disturbance of the gas flame at the burner and prevents it being extinguished by a draft.

- Open fan flap 1.
- Set the gas deflector 2 in the correct position relative to the gas appliance.
- Switch on hob hood 3.

Installation variant for recirculation hob hood with recirculation box

Example: Recirculation mode with recirculation box

Flat flexible elbow, **H**, article no. **1012786** with flexible length (240–600 mm) easy installation/access to fan motor **M** and recirculation box **U**.

Plan in enough space for maintenance work and ensure access to the fan motor and the recirculation box (for replacing the activated charcoal filters)! Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Dedicated accessories that need to be fitted to operate the appliance in the recirculation mode: article no. 1012161 recirculation box with activated charcoal filters!

Installation variant for extraction hob hood

Example: Extraction mode with flat channel (round channel also possible).

Plan in length of flat channel system to air outlet of **max. 7000 mm**. If the exhaust duct is to be routed outdoors, we recommend installing a telescopic wall box (accessory available for order).

Ensure enough space for maintenance work and access to the fan motor and flat channel system!

DSTS9 (64004)

Operating mode	Extraction/recirculation
Noise level	49–69 dB(A)
Illumination	1 × 6 W
Motor	1 × 270 W

Surface-mounted installation variant

Mains connection	220–240 V~ 50/60 Hz, 276 W
Fuse	10 A
Fan speeds	4
Weight	~35 kg

Flush installation variant

Recommendation for hob type:

GK46TIMPS..., GK47TIMPS...

- As an alternative, the motor housing may be planned and mounted to the range hood from the back, though access must be guaranteed from the front for service and installation.
- The exhaust connection can be positioned to point in one of four directions.

Accessories:

Recirculation box 1012161

For the installation, a transition piece 1012782 or H42078 is needed.

See Flat channel systems made of plastic (see page 144).

Long-life activated charcoal filter 1012163

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Downdraft hoods

The fan can be rotated for mounting. The exhaust air can thus be extracted upwards, left, right or downwards. The fan can also be mounted in the same position at the back of the appliance. If the fan is to be mounted at the back of the appliance, then the rear panel of the cabinet has to be cut out where the fan is to be mounted and ensure sufficient installation space behind the cabinet. Access from the front for servicing and installation purposes must be ensured. The electrics can, if required, be positioned to the left of the fan, on the hood body or in the cabinet. Variants with external motor as an option are also possible.

Installation variants

Downdraft extraction hoods

For this installation variant, the base fan feeds the exhaust air through the exhaust air pipe or in a space-saving way through a flat channel through the wall.

Downdraft recirculation hoods with «recirculation box»

The recirculation box is connected to the flat channel in an upright position for this installation variant. For example, the exhaust air can be fed back into the room through a shadow gap. Plans must include an inspection opening for replacing the filter in the recirculation box for this construction variant.

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Downdraft hood with external motor

The motor can be placed externally for this installation variant, e.g. in an adjacent cabinet. A maximum distance of 4 m is recommended. The external motor must be installed on the inside.

Downdraft recirculation hoods with «activated charcoal filters»

The activated charcoal filters are placed at the front, behind the grease filter, for this installation variant. For example, the exhaust air can be fed back into the room through a shadow gap.

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Downdraft recirculation hoods with «recirculation box»

The recirculation box is connected to the base fan for this installation variant. For example, the exhaust air can be fed back into the room through a shadow gap. Plans must include an inspection opening for replacing the filter in the recirculation box for this construction variant.

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Requires external motor set 1012164.

11.3 Ceiling range hoods

Applicable to the following hoods:

- Mains connection directly above range hood, connection cable 1.5 m with plug.

DSDSR12 (64003)

Operating mode	Extraction

Minimum distance X above hob:

For electric hob: 650 mm

For gas hob: 750 mm

Recommended maximum distance X: 1300 mm

Note on minimum distance (see page 75)

11.4 Island hoods

Applicable to the following hoods:

- Telescopic casing (adjustable) is available in various basic heights.
- Mains connection directly above range hood, connection cable 1.2 m with plug.

DIPQ10 (63015), DIPQ12 (63016)

Operating mode	Extraction/recirculation	Mains connection	220–240 V ~ 50/60 Hz, 138 W
Noise level	38–63 dB(A) / 41–68 dB(A)	Fuse	10 A
Illumination	4 × 2 W	Fan speeds	4
Motor	1 × 130 W	Weight	~32/35 kg
Options connection (optional)	Max. 180 W		

For recirculation air (detail Y):

Air outlet left/right and front/back possible.

Minimum distance B above hob

For electric hob: 500 mm

For gas hob: 750 mm

Note on minimum distance (see page 75)

11.5 Wall hoods

Applicable to the following hoods:

- Consider type of piping (straight or elbow).
- Telescopic casing (adjustable) is available in various basic heights.
- Connection directly behind telescopic casing.

Positions of electrical connections

The specified dimensions are valid for straight exhaust air piping. If exhaust air piping with an elbow are used, the dimensions must be adapted accordingly.

Appliance	Connection from lower part of appliance	Connection from centre	Type of connection
DWPQ	495 mm	80 mm	Flush power socket 230 V
DWVHR	≥545 mm	80 mm	

DWPQ9 (62022)

Operating mode	Extraction/recirculation	Mains connection	220–240 V~ 50/60 Hz, 134 W
Noise level	38–63 dB(A) / 41–68 dB(A)	Fuse	10 A
Illumination	2 × 2 W	Fan speeds	4
Motor	1 × 130 W	Weight	~25.5 kg
Options connection	Max. 180 W		

Air outlet for recirculation air (detail Y)

Telescopic casing for extraction/recirculation:

Height is adjustable.

Available in 2 basic heights.

Use of stone cladding

20 mm thick wall panels (granite, marble) are possible.

Minimum distance B above hob:

For electric hob: 500 mm

For gas hob: 750 mm

Note on minimum distance (see page 75)

DWPQ12 (62023)**Operating mode**

Extraction/recirculation

Noise level

38–63 dB(A) / 41–68 dB(A)

Illumination

3 × 2 W

Motor

1 × 130 W

Options connection

Max. 180 W

Mains connection

220–240 V~ 50/60 Hz, 134 W

Fuse

10 A

Fan speeds

4

Weight

~29 kg

**Air outlet for recirculation air (detail Y)****Use of stone cladding**

20 mm thick wall panels (granite, marble) are possible.

**Minimum distance B above hob:**

For electric hob: 500 mm

For gas hob: 750 mm

Note on minimum distance (see page 75)

DWVHR9 (62010)

Operating mode

Extraction/recirculation

Noise level

49–73 dB(A)

Illumination

2 × 1.1 W, 12 V~

Motor

1 × 270 W

Mains connection

220–240 V~ 50/60 Hz, 272 W

Fuse

10 A

4

Weight

~16 kg

Standard version recirculation air:
without telescopic casing, with flat cover for filter and mains cable

Telescopic casing extracted air

Available in 2 basic heights A:

805–1095 mm (standard)

1090–1435 mm (long)

Minimum distance B above hob:

For electric hob: 450 mm

For gas hob: 750 mm

Note on minimum distance (see page 75)

DWVMR9 (62009)

Operating mode	Extraction/recirculation
Noise level	50–70 dB(A)
Illumination	2 × 2.5 W, 12 V~
Motor	1 × 300 W

Standard version recirculation air:
without telescopic casing, with protective guard for fan opening

**Use of stone cladding**

20 mm thick wall panels (granite, marble)
are possible.

**Telescopic casing extracted air**

Available in basic height **A**:
1045–1465 mm (standard)

Minimum distance **B above hob:**

For electric hob: 400 mm

For gas hob: 750 mm

Note on minimum distance (see page 75)

11.6 Built-in hoods

Applicable to the following hoods:

- Connection cable 1.2 m with plug

Positions of electrical connections

The specified dimensions are valid for straight exhaust air piping. If exhaust air piping with an elbow are used, the dimensions must be adapted accordingly.

Appliance	Connection from floor (plinth height 100 mm)	Connection in niche (from centre to connection)	Type of connection
All models	2050 mm	180 mm	Flush power socket 230 V

12 Dishwashers

Dishwashers with heat pump (see page 119)

12.1 General notes

 Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

 At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

 For work surfaces that are susceptible to moisture, use work surface protection W70163.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2000 m above sea level. .

12.2 Electrical connection data / plumbing in

Designation		Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket 230 V
B	Cold water	600 mm	N = 170 mm	G ^{3/4} "
C	Hot water *	600 mm	M = 70 mm	G ^{3/4} "
D	Drain, outlet	400 mm	L = 110 mm	ø56 mm
G1	Dishwasher in base unit		Connection in adjacent compartment left and right	
G2	Dishwasher in tall unit		Connection in max. 2 compartments left and right	

* Water connection at >60 °C is not recommended

Electrical connection data

Appliance	Country group *	Mains connection	Rated load	Fuse	Mains cable
Adora SL (41048, 41059–41061, 41085, 41086)	A, E	230 V~ 50 Hz	3200 W	16 A	1.5 m, with plug
	B, C		2200 W	10 A	
	D	220–240 V~ 50 Hz	2200 W		
	F		3200 W	16 A	
Adora S (41050, 41066, 41079, 41080)	A, B, C, D, E, F	230 V~ 50 Hz	2200 W	10 A	
Adora N (41052, 41063, 41075, 41077)					

* Key (see page 2)

Plumbing-in data

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

Value		Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa	1.0 MPa
	Flowing	–	0.08 MPa	1.0 MPa
Water hardness		–	0.5 °fH	50 °fH
Water inlet temperature		–	5 °C	60 °C

Connection example

Designation		Adora dishwasher
A1	Power socket	Yes
A2	Connection cable	Length 1.50 m
B	Cold water connection	Yes
C	Hot water connection	Yes
D	Drain hose	Length 1.55 m / internal diameter = 22 mm
E	Shut-off devices	Yes
F	Aquastop / water inlet with filter, G ^{3/4} "	Length 1.55 m

12.3 Installation overview

Depending on niche height **H**, either standard or extra height appliances or only one of the two can be installed.

Niche height **H** in mm

Dimension A in mm	790	800	810	820	830	840	851	860	870	880	890	900	910	920	930	940	950	960

12.4 Drilling plans for decor panel 60 cm

Integrated

Fully integrated

Two-part

For particularly heavy decor panels, use door hinge brake art. no. 1011228.

12.5 Adora SL, S, N with niche width 60 cm

It must be ensured air gap remains in the shadow gap.

Screws and fasteners must be countersunk in the niche. There should be no protruding parts, screw heads, brackets, etc., otherwise parts of the appliance could become damaged (risk of water damage).

The permissible weights of the front panel / decor system **1** depend on the design variant:

Decor system	Integrated Nero, white	Integrated ChromeClass	Design integrated Black glass	Fully integrated
Maximum weight	8 kg	7 kg	6.5 kg	7 kg
Minimum weight	5.5 kg	4.5 kg	4 kg	5 kg

- Front panel / decor system (wood) **1** fully integrated must be cut to the necessary dimensions.

For stronger springs, see Accessories (see page 149)

For particularly heavy decor panels, use door hinge brake art. no. 1011228.

Compensator for ChromeClass and black glass

Compensator set: see Accessories (see page 149)

If the bottom edge of the operating panel **B** is not at the same height **X** as the bottom edge of the adjacent kitchen drawer **C**, a levelling piece (compensator **K**) must be mounted (see Installation instructions J18251).

Base unit «standard»

* From 861 up to max. 896 with a second runner only,
can be ordered under W82930

** From 867 up to max. 902 with a second runner only,
can be ordered under W82930

«Standard»	Nero, white	ChromeClass	Black glass

13 Dishwashers with heat pump

13.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

For work surfaces that are susceptible to moisture, use work surface protection W70163.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2000 m above sea level. .

13.2 Electrical connection data / plumbing in

Description		Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket 230 V
B	Cold water	600 mm	N = 170 mm	G ^{3/4} "
C	Hot water *	600 mm	M = 70 mm	G ^{3/4} "
D	Drain, outlet	400 mm	L = 110 mm	ø56 mm
G1	Dishwasher in base unit		Connection in adjacent compartment left and right	
G2	Dishwasher in tall unit		Connection in max. 2 compartments left and right	

* Water connection at >60 °C is not recommended

Electrical connection data

Appliance	Country group *	Mains connection	Rated load	Fuse	Mains cable
Adora SL WP (41046, 41082)	A, E	230 V~ 50 Hz	3200 W	16 A	1.5 m, with plug
	B		2200 W	10 A	
	D	220–240 V~ 50 Hz	2200 W		
	F		3200 W	16 A	

* Key (see page 2)

Plumbing-in data

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

Value		Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa	1.0 MPa
	Flowing	–	0.08 MPa	1.0 MPa
Water hardness		–	0.5 °fH	50 °fH
Water inlet temperature		–	5 °C	60 °C

Connection example

Designation	Adora dishwasher
A1	Yes
A2	Length 1.50 m
B	Yes
C	Yes
D	Length 1.55 m / internal diameter = 22 mm
E	Yes, 3/4"
F	Length 1.55 m

See Accessories (see page 149) for special connection lengths.

13.3 Installation summary

Keep base compartment unobstructed, appliance stands on the floor.

	Niche height H in mm				
Dimension A in mm	870	880	890	900	910
200				S	
190				S	S
180			S	S	S
170		S	S	S	S
160	S	S	S	S	S
150	S	S	S	S	S
140	S	S	S	S	
130	S	S	S		
120	S	S			
110	S				
105	S				

Standard without cabinet plinth

13.4 Drilling plans for decor panel 60 cm

For particularly heavy decor panels, use door hinge brake art. no. 1011228.

13.5 Adora SL WP with niche width 60 cm

It must be ensured air gap remains in the shadow gap.

Screws and fasteners must be countersunk in the niche. There should be no protruding parts, screw heads, brackets, etc., otherwise parts of the appliance could become damaged (risk of water damage).

It must be possible to pull the appliance out of the niche horizontally at any time without dismantling any part of the cabinet.

The permissible weights of the front panel / decor system **1** depend on the design variant:

Decor system	Integrated Nero, white	Integrated ChromeClass	Design integrated Black glass	Fully integrated
Maximum weight	8 kg	7 kg	6.5 kg	7 kg
Minimum weight	5.5 kg	4.5 kg	4 kg	5 kg

- Front panel / decor system (wood) **1** fully integrated must be cut to the necessary dimensions.

Compensator for ChromeClass and black glass

Compensator set: See Accessories Dishwashers (see page 149)

If the bottom edge of the operating panel **B** is not at the same height **X** as the bottom edge of the adjacent kitchen drawer **C**, a levelling piece (compensator **K**) must be mounted (see Installation instructions J18251).

Compensators contained in the set:
8 mm, 12 mm, 16 mm

For stronger springs, see Accessories (see page 149)

For particularly heavy decor panels, use door hinge brake art. no. 1011228.

Base element

* If the niche height is greater than 910 mm, a plate must be placed underneath the appliance or an extra-long decor panel must be used.

Base element	Black glass	Fully integrated
Operating panel B incl. compensator	124–140 mm	-
Decor panel D	496–632 mm	639–757

Dimension A in mm	Niche height H in mm					Min. S in mm
	870	880	890	900	910	
Min.	107	117	127	137	147	2
	117	127	137	147	157	2

Installing extra-long decor panel

* A continuous soffit vent is recommended.

E Worktop
F Continuous soffit vent
G Decor panel
H Niche height

14 Refrigerators

14.1 General notes

Insufficient ventilation can cause a malfunction and shorten the life of the appliance.

Heavy door panel weights shorten the service life of the door hinges. Observe maximum permissible weight.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

In an open-plan kitchen and living room, higher noise emissions can be expected if the ventilation slits face into the room.

14.2 Electrical connection data

Appliance	Climate class	Mains connection	Fuse	Mains cable
Refrigerators				
Cooltronic	SN-ST	220–240 V~ 50 Hz	10 A	2.2 m, with plug
Prestige P eco	SN-T			
Prestige T	SN-T			
Royal	SN-ST			
Jumbo 60i	SN-ST	220–240 V~ 50 Hz	10 A	2.1 m, with plug
Iglu 60i	SN-ST			
Magnum 2 60i	SN-T			
Komfort 60i	N-T	220–240 V~ 50 Hz	10 A	2.5 m, with plug
Winecoolers				
Winecooler SL 60, Winecooler SL 90	SN-ST	230 V~ 50 Hz	10 A	2.2 m, with plug
Winecooler UCSL 60	SN-ST	220–240 V~ 50 Hz	10 A	2.1 m, with plug

14.3 Ambient conditions

Condensate may form in the appliance in tropical conditions and this has to be taken into account in the planning.

Climate class	Minimum	Maximum
SN	+10 °C	+32 °C
N	+16 °C	+32 °C
ST	+16 °C	+38 °C
T	+16 °C	+43 °C

14.4 Niche ventilation

Ventilation

The ventilation cross-sections in the unit base, behind the tall unit and below the ceiling must provide **unobstructed passage of at least 200 cm²**, enabling the heated air to escape unhindered.

Smaller cross-sections are permitted for refrigerators with auxiliary ventilation fans.

The air enters **A** at the base and exits **B** at the top, either out the back of the cabinet unit or through a ventilation grille directly above the refrigerator **C**.

Vent openings at the top (air outlet)

There are various options for the top vent opening.

For optimal ventilation, an air duct whose width is no greater than the width of the unit and whose height at the air inlet and outlet is **at least 40 mm** is recommended **D**.

If a smaller ventilation gap is preferred for design reasons, the ventilation cross-section at the top may be reduced, making ventilation across several unit widths necessary. The ventilation at the top must run over another unit – either left, right **E** or on both sides **F** of the unit housing the refrigerator. The ventilation (air inlet) beneath the refrigerator may not be changed. If being installed side-by-side, installation **D** or **E** is recommended. Note width **b** is per appliance.

In summary, taking dimension **x** (distance from the tall unit to the rear wall) into account, the following gap heights **y** are possible:

Dimensions per appliance		b (mm)	y (mm)	x (mm)	
D		550–568	≥40	≥50	
E		1100–1168	≥30	≥100	
F		≥1650	≥20		

14.5 Refrigerators

Cooltronic (51047)

KCir (integrable in niche height 1778 mm)

Angle set for combination possibilities

- For installation, see installation instructions J21021050.
- In the niche mount to the wood left and right.
- The appliance is placed on the mounting angle and pushed into the niche.

Art. no. K50572, construction type EURO

Design cover

The design cover covers the intermediate base for EURO niches and is for a combined installation of two appliances e.g. oven **1** and combi-steamer **2**. The cover is dimensioned for panel overlapping of 4 mm.

- For installation, see installation instructions J340050.
- Depending on the thickness of the intermediate base **b**, two variants (nero) of the design cover **A** are available:

Art. no. K37158 (**b** = 16 mm / **a** = 10.5 mm)

Art. no. K37159 (**b** = 19 mm / **a** = 13.5 mm)

Aesthetic profile

Assembly kit with aesthetic profile for installing Miwell next to another appliance.

- For installation, see installation instructions 1009019

Art. no. 1009179

Drain hose

5 m drain hose for steam cooker with fixed water connection CSTXSLF

Art. no. 1012933

Art. no.

1012782

Diverter piece on flat channel 90°

Description

For direct hood connection with air guides and formed sleeve at one end

Art. no.

1012783

Elbow 90°, horizontal**Description**

With air guides and formed sleeve at both ends

Art. no.

1012784

Elbow 90°, vertical**Description**

With air guides and formed sleeve at both ends

Art. no.

1012785

Flexible elbow, flat**Description**

For bends and turns up to 180°

Adapter, flexible, angular to angular, with formed sleeve

Art. no.

1012786

L = 240–600 mm

Flexible elbow, round onto flat**Description**

For bends and turns up to 180°

Adapter, flexible, round to angular, with formed sleeve

Art. no.

1012787

L = 160–550 mm

Weather protection grille for plastic flat channel**Description**

Ventilation grille for plastic flat channel, ChromeClass with non-return flap valve. Compatible with flat channel art. no. 1012780

Art. no.

1030590

290 × 160 mm

Flat channel systems made of metal

Accessory parts made of fireproof metal

Flat channel**Description**
Flat channel with seal
Art. no.
1046627 $L = 500 \text{ mm}$ **Flat channel****Description**
Flat channel with seal
Art. no.
1046628 $L = 1000 \text{ mm}$ **Flat channel, flexible****Description**
Flat channel, flexible, with seal
Art. no.
1046629 $L = 500 \text{ mm}$ **Flat channel, flexible****Description**
Flat channel, flexible, with seal
Art. no.
1046635 $L = 1000 \text{ mm}$ **Channel connector****Description**
For straight flat channels
Art. no.
1046636 $L = 80 \text{ mm}$

Diverter piece on flat channel 90°

**Description**

For direct hood connection with air guides and formed sleeve at one end

Art. no.

1046638

Elbow 90°, horizontal

**Description**

Elbow with air guides

Art. no.

1046639

Elbow 90°, vertical

**Description**

Elbow with air guides

Art. no.

1046643

Transition piece for flat channel

**Description**

For direct transition from flat to round, fluidically optimized

Art. no.

1046644

Pipe connection

**Art. no.**

1046646

d = 150 mm

Offsetting end piece on base motor**Art. no.**
1046649**Pipe set for hob hoods****Art. no.**
1046650**Sealing tape****Aluminium tape****Description**

Fabric-reinforced tape, with protective film, 50 mm × 50 m roll

Art. no.
H42067

15.4 Dishwashers

Adora

- Suitable length for tall unit according to specifications in this planning aid.
- For base unit, calculate correct niche dimensions working back from decor panel length.
- For questions, please contact Customer Services.

Stainless steel fronts (option)

Integrated	Width	Height	Depth	Article no.
Decor set 60 standard ChromeClass	596 mm	632 mm	20 mm	W83523
Decor set 60 extra height ChromeClass	596 mm	697 mm	20 mm	W83524

Black glass fronts (option)

Integrated	Width	Height	Depth	Article no.
Decor set 60 standard black glass	596 mm	632 mm	20 mm	W83526
Decor set 60 extra height black glass	596 mm	697 mm	20 mm	W83527

Diverse sets

Set	Article no.	Remarks
Conversion kit for slide plate	W83583	In place of the plinth runners, for the installation on a plinth or for the tall unit.
Installation set, fully integrated, two-part	W83931	For a two-part, fully integrated decor front panel.
Compensator set, ChromeClass	W81302	Supplied for «ChromeClass» appliances.
