

Swiss perfection for your home

Planning aid

International collection
Kitchen appliances

2020/2021

Note on content

Please note

This planning aid applies to the specified model numbers only. Older planning aids for earlier generation models may be requested in electronic form from our Customer Services.

This planning aid is not to be used as installation instructions! The regulations and instructions binding for the appliance installation are to be obtained from the installation instructions packed with the appliances. The installation instructions can also be downloaded from the internet from www.vzug.com/b2b.

Modifications

Text, diagrams and data correspond to the technical standard of the appliances at the time this planning aid went to press. The right to make technical modifications for the purpose of the further development of the appliances is reserved. The German, English, French and Italian versions are binding. V-ZUG accepts no liability for translations in other languages.

Symbols used

Denotes important safety precautions.

Failure to observe said precautions can result in injury or in damage to the appliance or fittings!

► Indicates an instruction.

• Indicates a list.

Information and precautions that should be observed.

Extraction

Recirculation

Supplementary documents

In this planning aid, occasional reference is made to supplementary documents. These documents can be requested from the Head Office in Zug by sending an e-mail to service-support@vzug.com.

1 Overview of connections, ranges and dimensions

Electrical connections must be carried out by qualified experts in accordance with the guidelines and standards for low-voltage installations and the specifications of the local electricity supply companies.

A plug-in appliance may only be connected to a socket outlet with earthing contact, installed according to specifications. An all-pole mains isolating device with 3 mm contact opening should be provided in the house wiring system. Switches, plug and socket devices, circuit breakers and fusible cut-outs which are accessible after installation and which have all-poles switching are permissible as isolating devices. Effective earthing and separately installed neutral and earth conductors ensure safe and fault-free operation. After installation, live parts and cables with basic insulation must not be accessible. Check old installations.

1.1 General operating conditions

Detailed information on the electrical connection data can be found at the beginning of each section.

Value	Nominal value	Minimum	Maximum
Voltage	230 V	207 V	253 V
Voltage	400 V	360 V	440 V
Frequency	50 Hz sinusoidal	49 Hz sinusoidal	51 Hz sinusoidal

- Short duration frequency variation in the mains: $\pm 5\%$
- Long duration frequency stability in the mains (for synchronous clocks): $\pm 10\text{ ppm}$
- If used at an altitude of over 2,000 metres, a reduced performance must be expected.

1.2 Using residual current devices in house wiring system / fault current

High fault currents are inherently present in ovens and hobs. The values can be affected by various factors and vary widely. Fault currents of up to approximately 10 mA per appliance are permissible in accordance with the norm. The values are measured in the warm operating state.

If residual current devices (RCDs) are used in the house wiring system, we recommend that the above-mentioned appliances have their own RCD protection, separate from the power supply for the rest of the system. 30 mA or higher should be selected as the tripping current for the residual current device.

1.3 Validity

The model number corresponds to the first alphanumerics of the serial number SN (or FN) on the identification plate.

Model designation	Model number	Type
Steam cookers		
Steam HSE 60	23002	STHSE60g

1.4 Positions of electrical connections

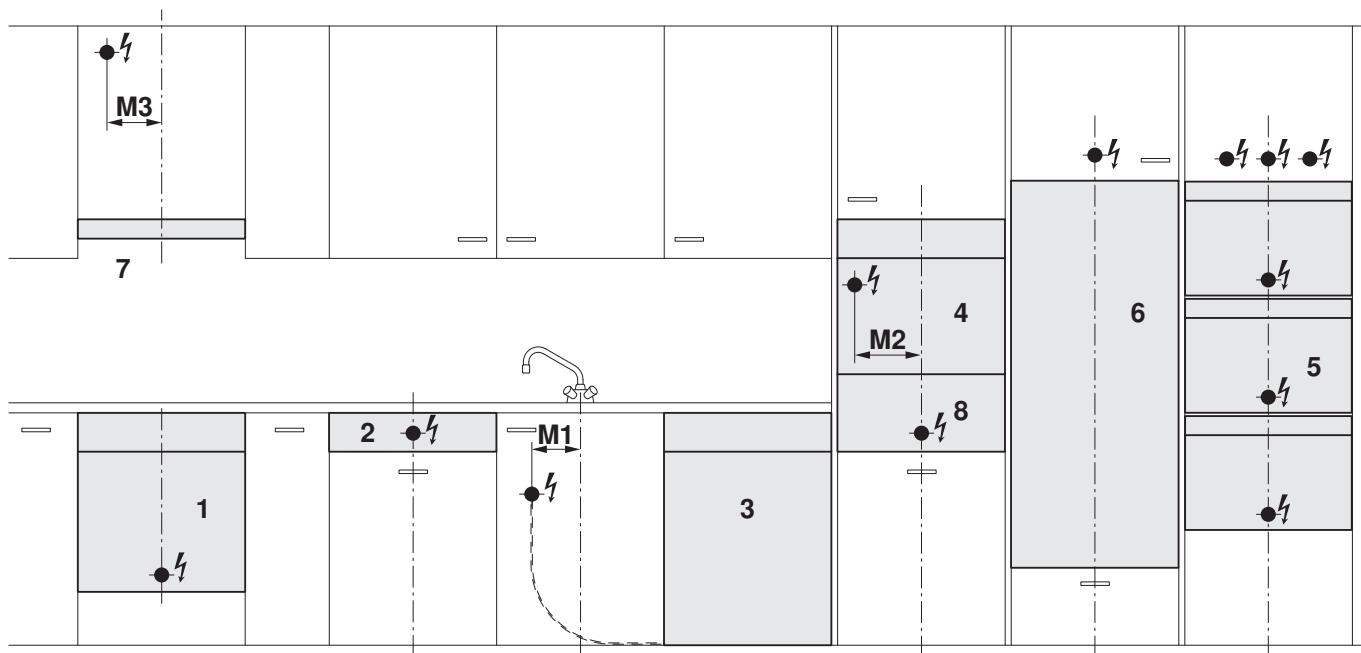

For EURO kitchens, allowance from the floor can vary. In this case, the electrical connection should be calculated using the dimension from the bottom edge of the appliance.

Oven above an oven

With this combination, an electrical connection should be provided for each appliance. Depending on the installation height and the type of combination, the connections may be located at different heights.

Wall hoods with telescopic casing

The electrical connection must pass between the exhaust air piping and the lagging sheets. The measurements given in the table ensure that this condition is met.

- 1 Oven / steam cooker in base unit
- 2 Autarchic hob
- 3 Dishwasher/refrigerator in base unit
- 4 Oven / steam cooker / coffee-center / microwave oven
- 5 Combinations (oven / steam cooker) and microwave oven (see **M2**)
- 6 Refrigerator, winecooler in tall unit
- 7 Range hood
- 8 Drawers (warming drawer / vacuum drawer / system drawer)

- M1** Distance from centre to dishwasher/refrigerator connection in base unit
- M2** Distance from centre to connection for coffee-center / microwave oven
- M3** Distance from centre to range hood connection

Provide additional clearance for electrical connections if the installation niche has only the minimum depth.

1.5 Built-in EURO

No.	Designation	Connection from appliance support	Connection in niche	Type of connection
1	Oven, steam cooker (height 600 mm)	max. 30 mm (plinth height 100 mm)	Centre	I
2	Autarchic hob	–	Centre	I
3	Dishwashers	–	M1 = 160 mm	U
	Refrigerator in base unit	–	M1 = 160 mm	U
4	Oven, steam cooker (height 600 mm)	max. 30 mm	Centre	I
	Oven, steam cooker (height 380 mm / 450 mm)	max. 30 mm	Centre	I
	Microwave oven (height 380 mm)	max. 300 mm	M2 = 225 mm	I, U
	Microwave oven (height 450 mm)	max. 400 mm	M2 = 225 mm	I

* Not valid for appliances with retractable handle

Appliances	H3
Oven, steam cooker	4 mm
Microwave, coffee-center, system drawer, vacuum drawer and warming drawer	0 mm

2 Steam cookers

Only use if water hardness >3° French hardness (>1.7° German hardness).

2.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

To ensure adequate ventilation, the niche in which the appliance stands must have a supply air opening of min. 25 cm².

2.2 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable	
CSTMQLQ60 **	A, B, C, D, E, F	400 V 2N~ 50 Hz	16 A	5700 W	Min. 1.8 m, without plug	
		230 V~ 50 Hz	25 A ***			
CSSL60, CSSE60, CSTHSL60, CSTXSL60, CSTXSL60F, STXSL	A, E	230 V~ 50 Hz	16 A	CSSE, CSSL, CSTXSL, CSTXSLF: 3700 W CSTHSL: 3500 W	Min. 1.8 m, with plug	
	B, C				Min. 1.8 m, without plug	
	D	220–240 V~ 50 Hz	10 A		Min. 1.8 m, with plug	
	F					
STHSE60	C, F			2200 W		

* Country group (see page 2)

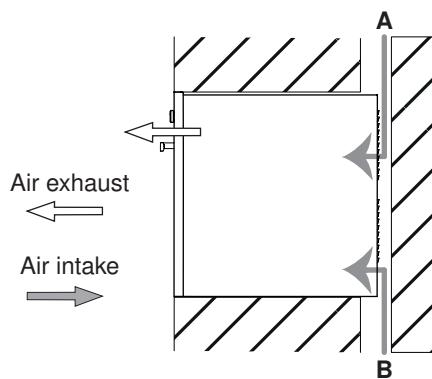

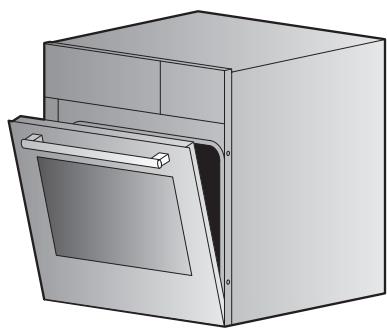

** The CSTMQLQ60 can also be operated with a single-phase connection (230 V~ / max. 16 A). For performance reasons, however, it is to be connected with a two-phase connection or fitted with a 25 amp fuse whenever possible.

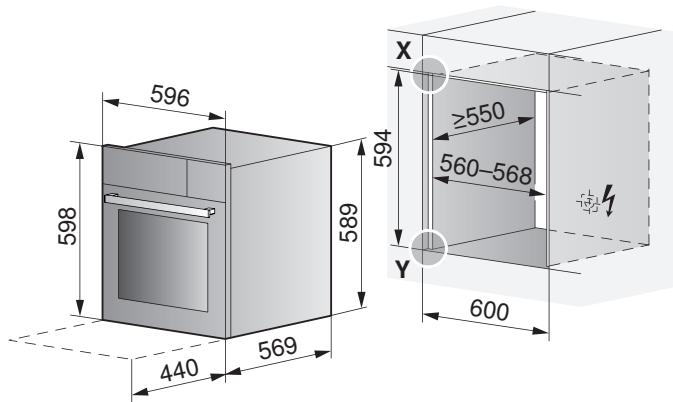

*** This appliance conforms to IEC 61000-3-12 provided that the short-circuit power Ssc at the connection point of the customer system to the public power system is greater than or equal to 1140 kW. It is the responsibility of the installer or user of the appliance to ensure, if necessary after consultation with the network operator, that this appliance is only connected to a connection point with a Ssc value that is greater than or equal to 1140 kW.

2.3 Air circulation diagram for CSTMQLQ60

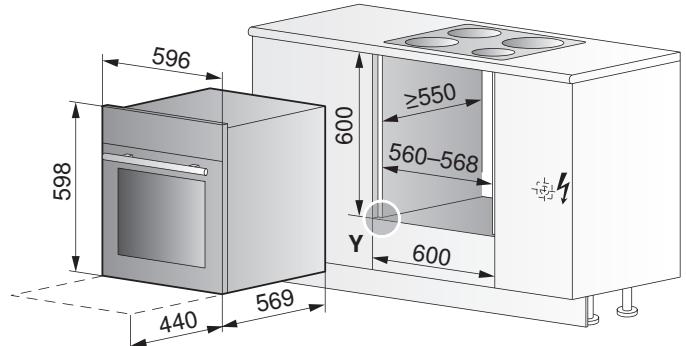

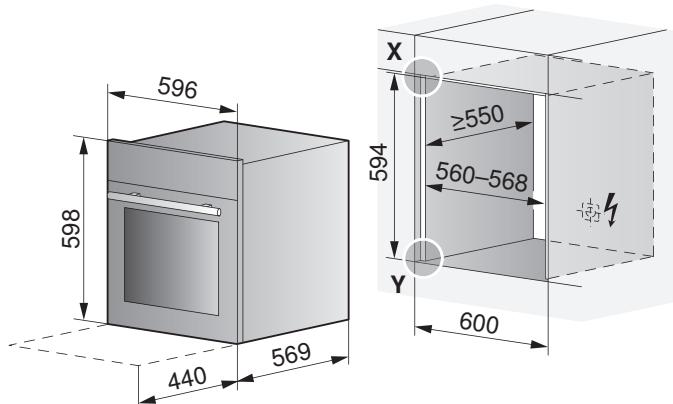

To ensure good ventilation, the niche in which the appliance stands must have a supply air vent, position A and B, of a total of ≥80 to ≤850 cm², of which B must be ≥60 cm².

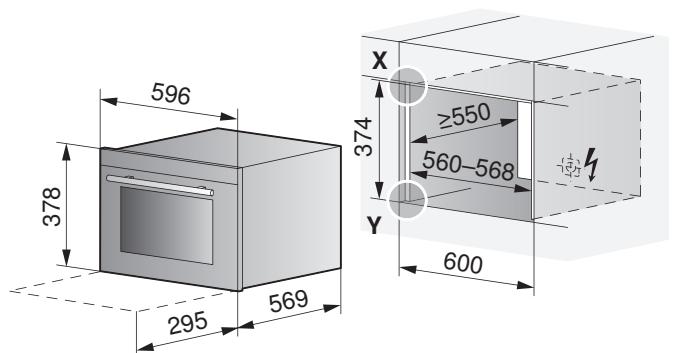

2.4 CSTMSLQ60 (23015/23073)

Front dimensions of the appliances: Detail X/Y (see page 12)

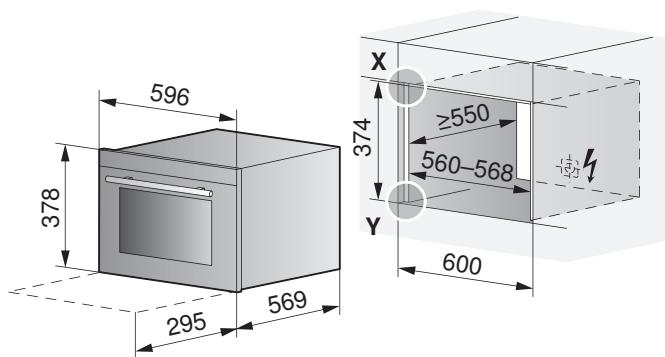

2.5 CSSL60 (23012/23013/23070/23071), CSSE60 (23010)

Front dimensions of the appliances: Detail X/Y (see page 12)

2.9 CSTXSL60F (23007/23008/23067/23068)

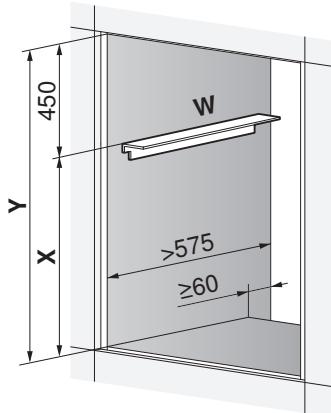

Front dimensions of the appliances: Detail X/Y (see page 12)

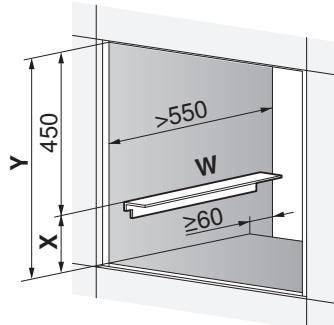

Below second appliance

Above second appliance

Above warming drawer

X = Height of second appliance

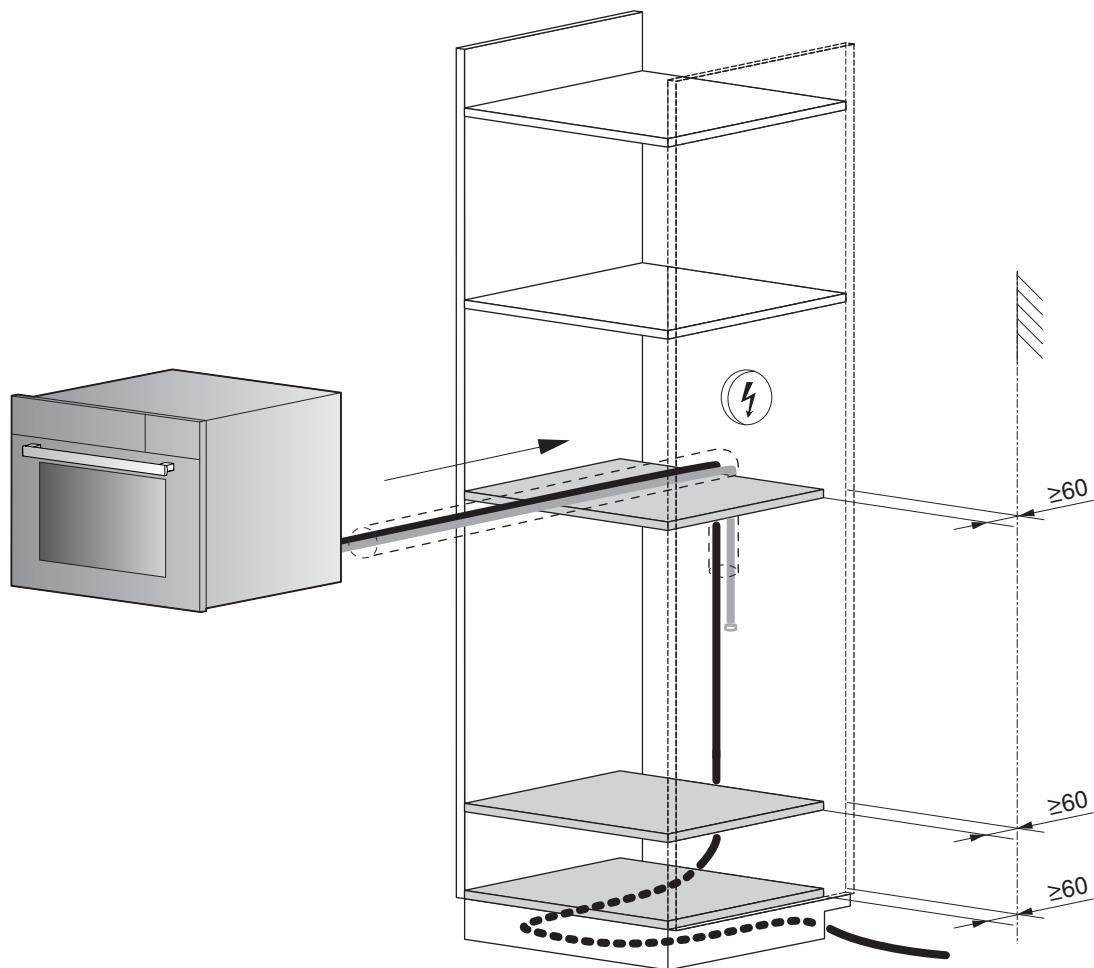

Y = Niche height

W = Angle set K50572

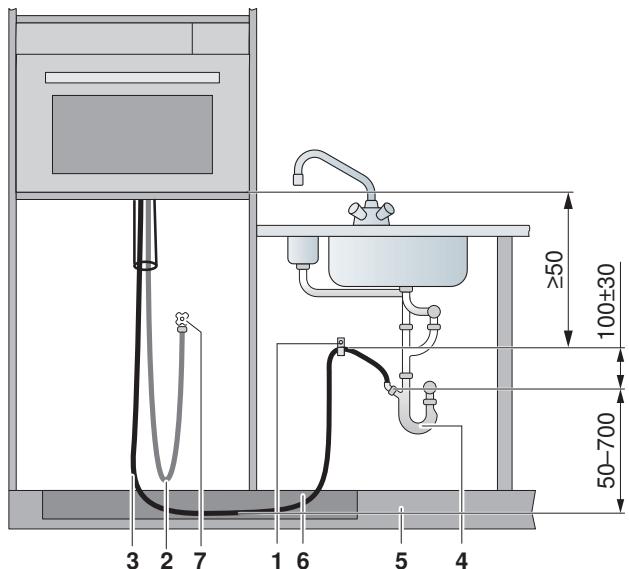

For an installation depth of under 575 mm, it is recommended that the appliance be installed below other appliances for space reasons.

If installing with a second appliance in the same niche, use the angle set W (K50572).

Installation

Plumbing in

- 1** Hose clamp
2 Reinforced inlet hose 2 m, G $\frac{3}{4}$ "
3 Drain hose 3 m, internal diameter of connection 22 mm
On-site installations
4 Drain trap
5 Plinth panel
6 Hose fed through plinth
7 Cold water connection with stopcock

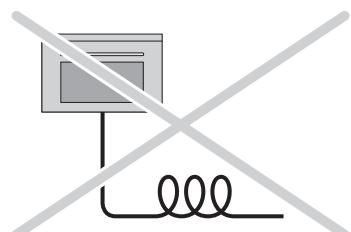

Drain

Length of drain hose: 3 m

- An optional 5 m drain hose (Art. no. 1012933) can be ordered if required.

- The drain hose must not be lengthened or shortened.
The drop from the bottom of the appliance to the drain trap must be at least 50 mm.
The drain hose must be laid flat without any kinks.

Cold water connection inlet

Operating pressure: 0.1–1.0 MPa (1–10 bar)

Only use if water hardness >3° French hardness (>1.7° German hardness).

Length of reinforced hose: 2 m

- Observe local water authority regulations.
Existing hoses that are defective must be replaced.
The reinforced hose must not be lengthened.
The stopcock must be accessible at all times.

3 Ovens

3.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

To ensure adequate ventilation, the niche in which the appliance stands must have a supply air opening of min. 25 cm².

3.2 Electrical connection data

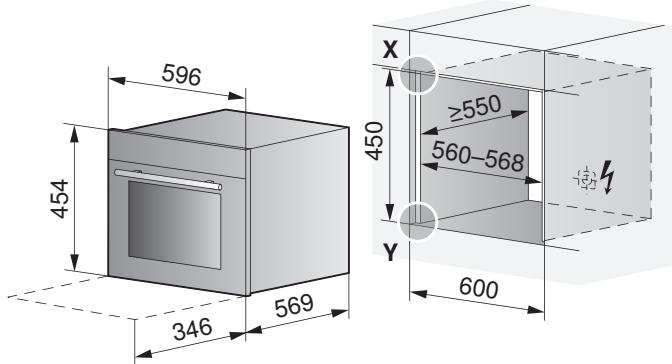

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

4.5 System drawers

SYS60144 (35001)

Installing with Coffee-Center

Front dimensions of the appliances: Detail X/Y² (see page 12)

The telescopic runner for the assembly and operation of the coffee-center is included in the scope of delivery of the coffee-center.

5 Microwaves

Minimum installation height for child safety: Keep 850 mm distance from the floor to the bottom edge of the microwave!

The mounting angles are not included in the scope of delivery. Order angle set K50572 at the same time.

5.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

5.2 Electrical connection data

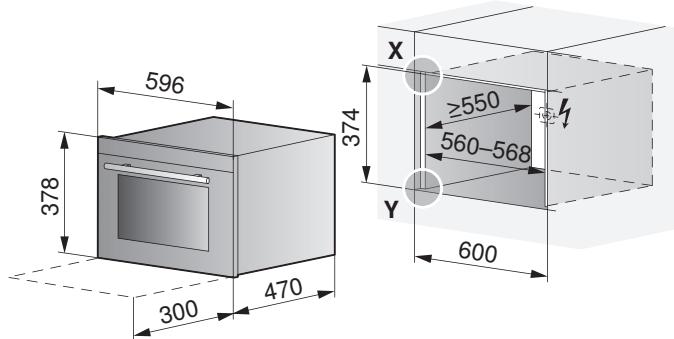

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
Miwell-Combi XSL	A, B, C, E	230 V~ 50 Hz	16 A	2800 W	1.2 m, with plug
Miwell-Combi HSL		230 V~ 50 Hz	10 A	2300 W	

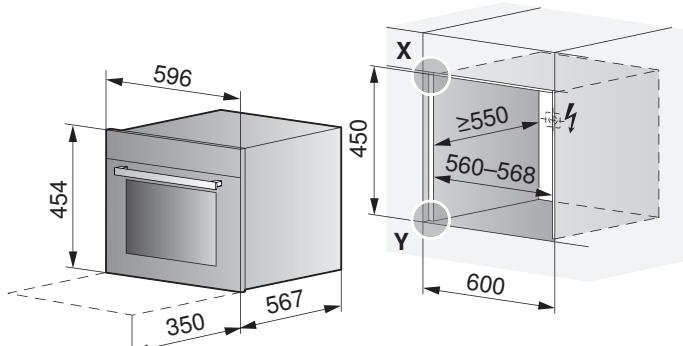

* Country group (see page 2)

5.3 Miwell HSL (24006)

Front dimensions of the appliances: Detail X/Y (see page 12)

5.4 Miwell-Combi XSL (24009)

Front dimensions of the appliances: Detail X/Y (see page 12)

6 Coffee-Centers

Depth of fitted unit must be at least 530 mm.

6.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

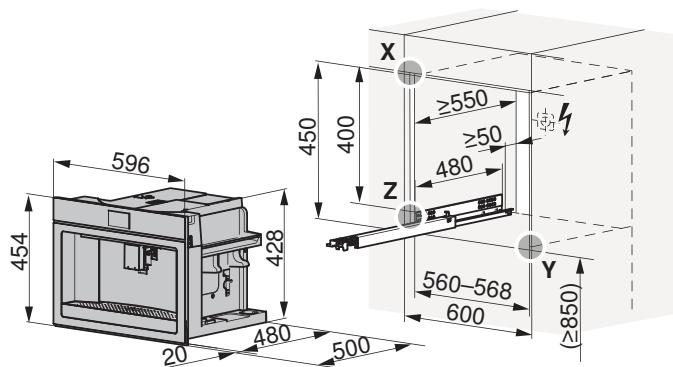

6.2 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Mains connection	Fuse	Rated load	Mains cable
220–240 V~ 50–60 Hz	10 A	1350 W	1.8 m, with plug

6.3 Supremo XSL (25004)

Front dimensions of the appliances: Detail X/Y/Z (see page 12)

7 Combination possibilities

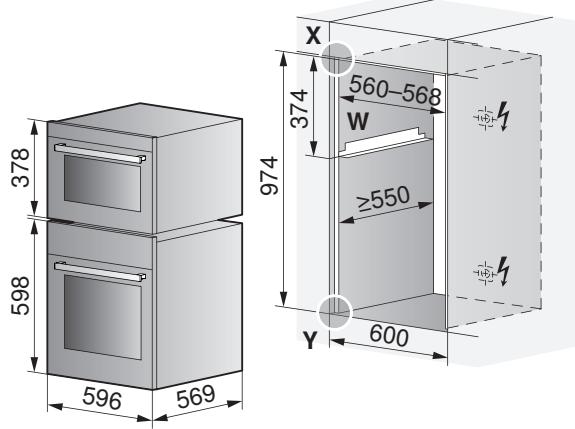

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

7.1 Oven & steam cooker

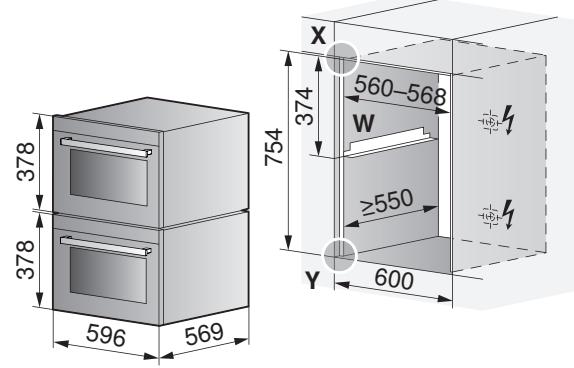

If installing with a second appliance in the same niche, use the angle set W (K50572).

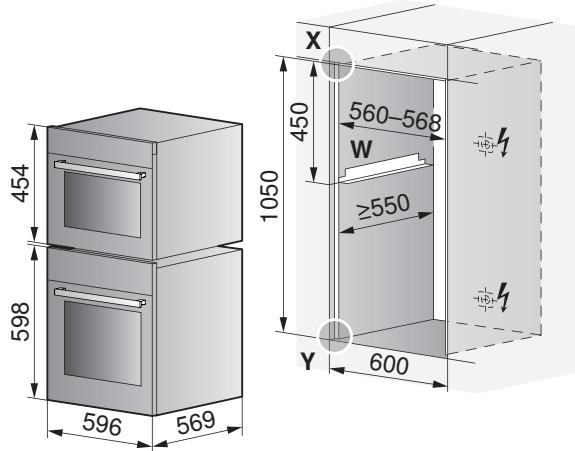

Oven & CSTHSL60/STHSE60

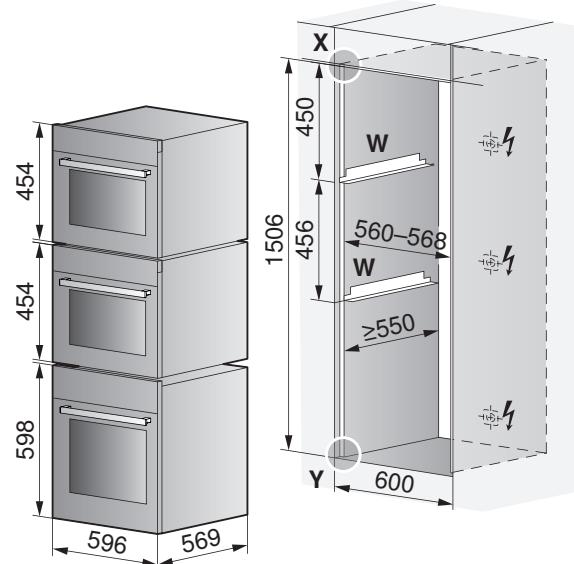

CSTHSL60 & STHSE60

Oven & compact oven or CSTXSL60/STXSL

Oven & compact oven & CSTXSL60/STXSL

Supremo XSL & steam cooker

Supremo HSL & Miwell HSL

Supremo XSL & compact oven / steam cooker

Front dimensions of the appliances: Detail X/Y/Z (see page 12)

8 Glass ceramic hobs – induction, wok, teppanyaki

8.1 General notes

It is imperative for induction hobs to have adequate ventilation. See sections Installation without protective plate (see page 54) and Installation with protective plate (see page 56).

This is guaranteed with a worktop depth of 20 mm to 40 mm.

If a drawer is installed directly underneath, a protective plate is recommended in the vicinity of the mains cable and to protect the ventilation openings. The ventilation protective plate set can be used for this purpose. Accessories (see page 127).

With a front-facing air gap of 3 mm, a ventilation protective plate with seal is essential. Installation with protective plate (see page 56).

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

The layout of the hobs to be installed may differ from the hobs illustrated here!

8.2 OptiGlass coating

Halogen or LED light bulbs are recommended for illuminating hobs with the OptiGlass coating. The use of fluorescent tube lighting to illuminate hobs with the OptiGlass coating causes the glass surface to shimmer.

8.3 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

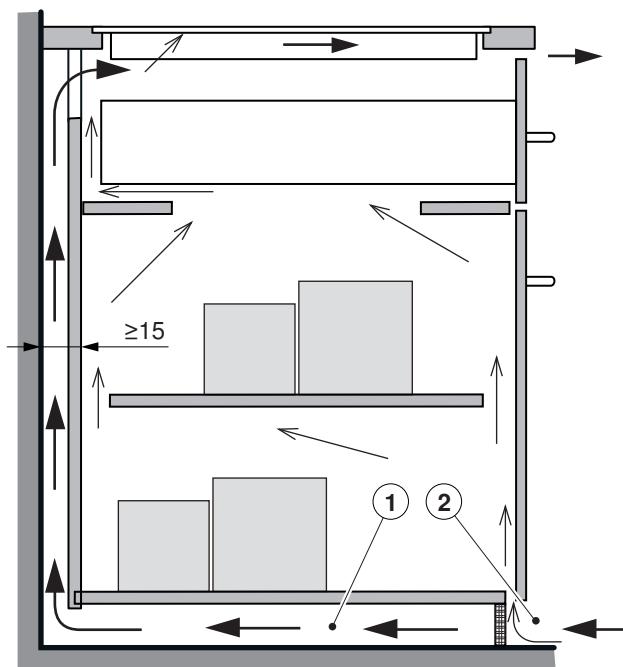

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
GK16TIWSZ	A, B, C, D, E, F	220–240 V~50–60 Hz	16 A	3000 W	1.7 m, without plug
GK17TIYSZ				2800 W	
GK26TIMSZ, GK27TIMSZ				3700 W	
CookTopInduction V4000, GK46TI ..., GK47TI ..., GKD46TIMASZO	A, E	380–415 V 2N~ 50–60 Hz	16 A	7400 W	
		220–240 V~50–60 Hz	32 A		
CookTopInduction V6000 (31114), GK57TIMSZO	A, E	380–415 V 3N~ 50–60 Hz	16 A	11100 W	
		220–240 V~50–60 Hz	48 A		
CookTopInduction V6000 FullFlex (31134)	A, D, E	380–415 V 3N~ 50–60 Hz	16 A	11100 W	
		220–240 V~50–60 Hz	32 A	7400 W	
			48 A	11100 W	
CookTopInduction V6000 FullFlex (31132)	A, E	380–415 V 2N~ 50–60 Hz	16 A	7400 W	
		230 V~ 50 Hz	32 A		

* Country group (see page 2)

8.4 Ventilation

In order to guarantee good ventilation, a space of ≥ 10 mm height is necessary beneath the appliance.

1. The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation via the ventilation slits.
The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.
2. Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet.
In order that enough cold air can be drawn in, there must be a continuous circulation of fresh air that extends outside the cabinet.
The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.

8.5 Induction hob with integrated range hood

GKD46TIMASZO - FUSION (31094)

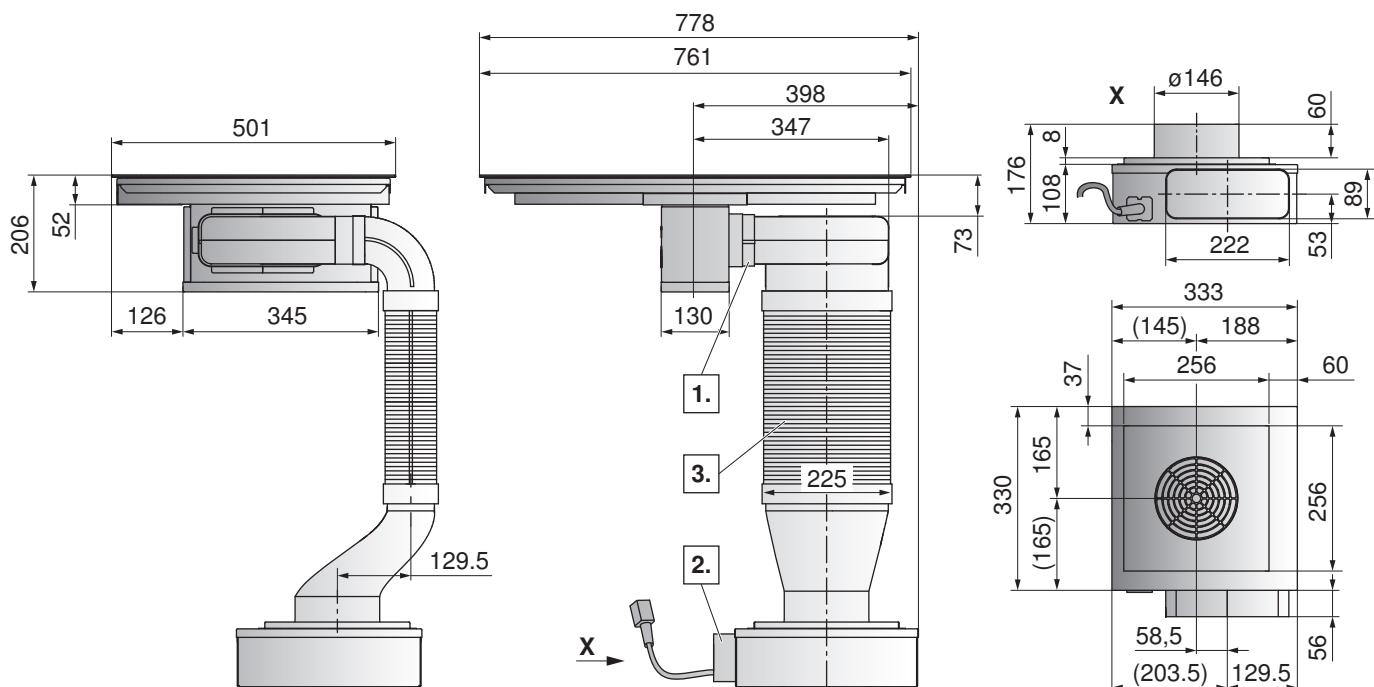

Dimensions

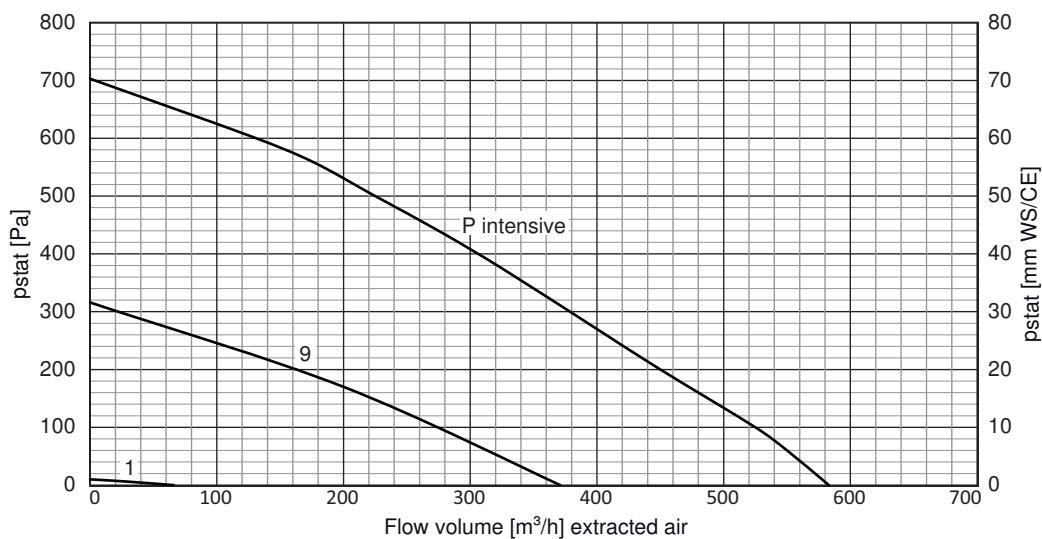

All plastering, plasterboarding, wall papering and painting work is to be carried out prior to installing the appliance. Ensure that the material is sufficiently stable.

Plan a removable base plate or service flap for fan motor (and recirculation box in the case of the recirculation mode).

For the recirculation mode, ensure sufficient ventilation so that moisture can escape. Plan in suitable material/wood.

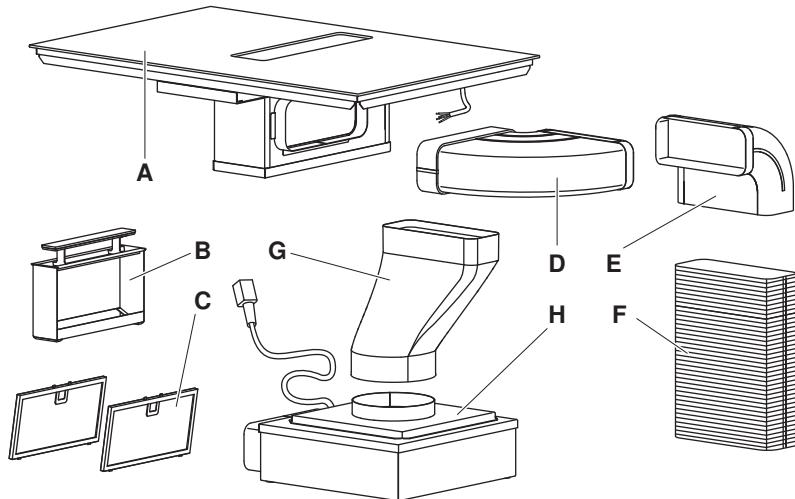

1. The exhaust ducting can be to the left or right.
2. The fan motor can be turned, this changes the installation type.
3. Depending on space requirements, the position of the fan motor can be adjusted by shortening the flat channel.

Scope of delivery

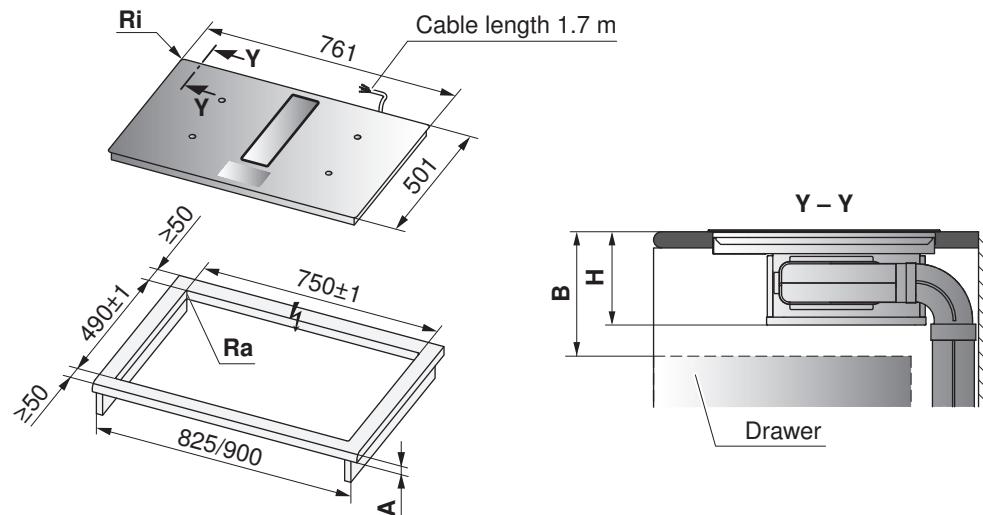

The items included in the scope of delivery such as the flat channel and elbow are made of metal.

- A** Hob
- B** Filter cassette
- C** 2x grease filter
- D** Elbow 90°, horizontal
- E** Elbow 90°, vertical
- F** Flat channel, flexible
- G** Offsetting end piece
- H** Fan motor

Surface-mounted installation

The layout of the hob to be fitted may differ from the hob illustrated!

Type	A Depends on producer	B	H	Corner radius Ra/Ri
GKD46TIMASZO	20–70 mm	≥212 mm	202 mm	5/1.5 mm

A Worktop depth

B Required clearance for service replacement over the entire cut-out area.

H Dimension from the top of the work surface to the underside of the hob

Ri Corner radii of appliance

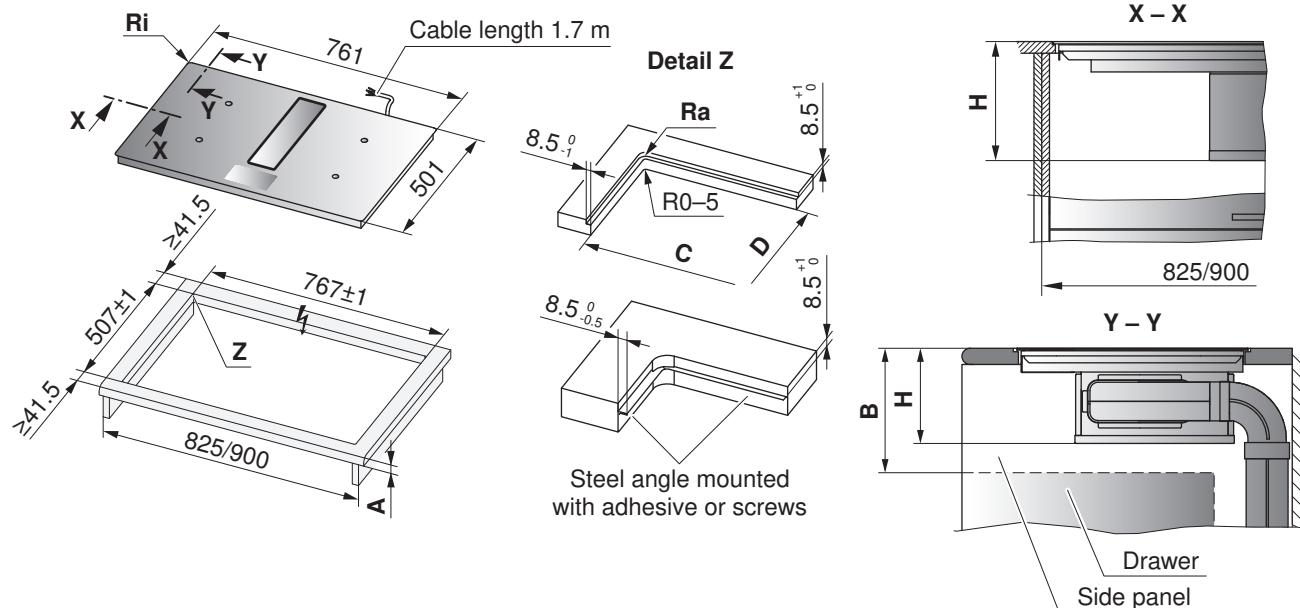

Ra Outer corner radii of cut-out

The intermediate base must be removable from below.

Flush installation

The layout of the hob to be fitted may differ from the hob illustrated!

Type	A Depends on producer	B	C/D	H	Corner radius Ra/Ri
GKD46TIMASZO	20–70 mm	≥400 mm	750/490	206 mm	5/1.5 mm

A Worktop depth

B Required clearance for service replacement over the entire cut-out area.

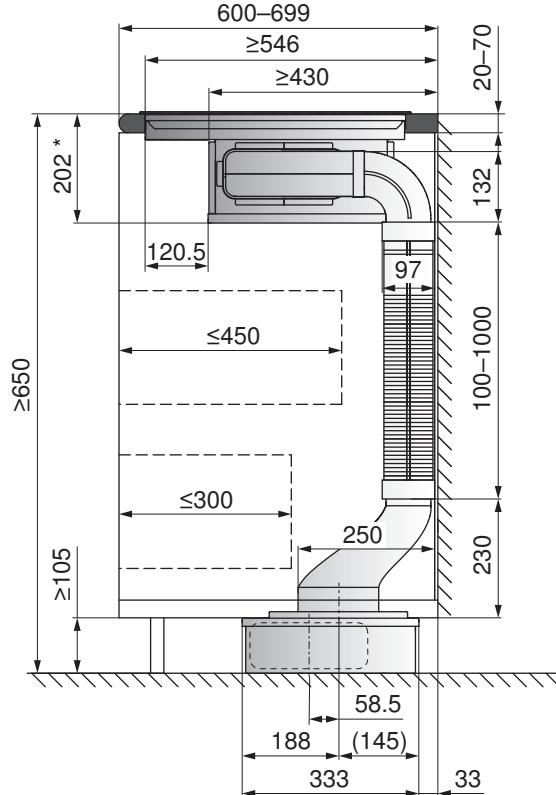

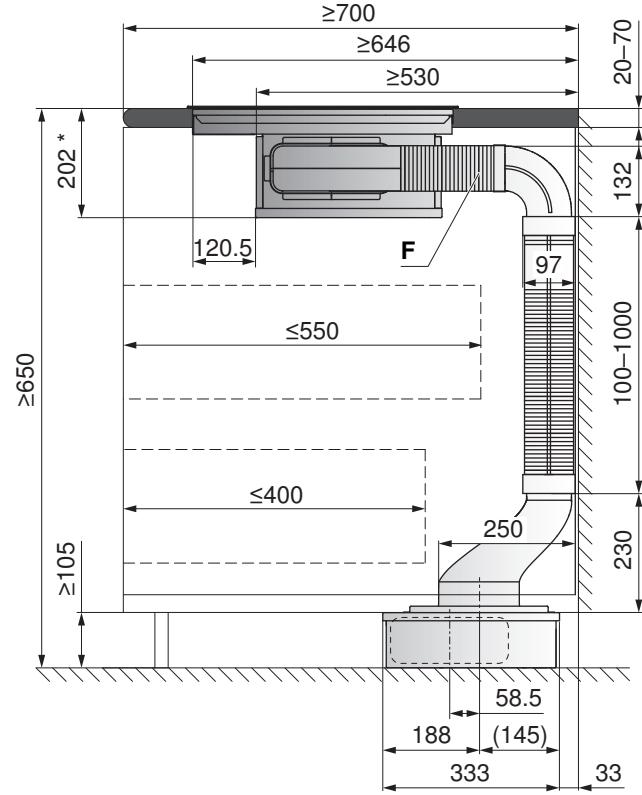

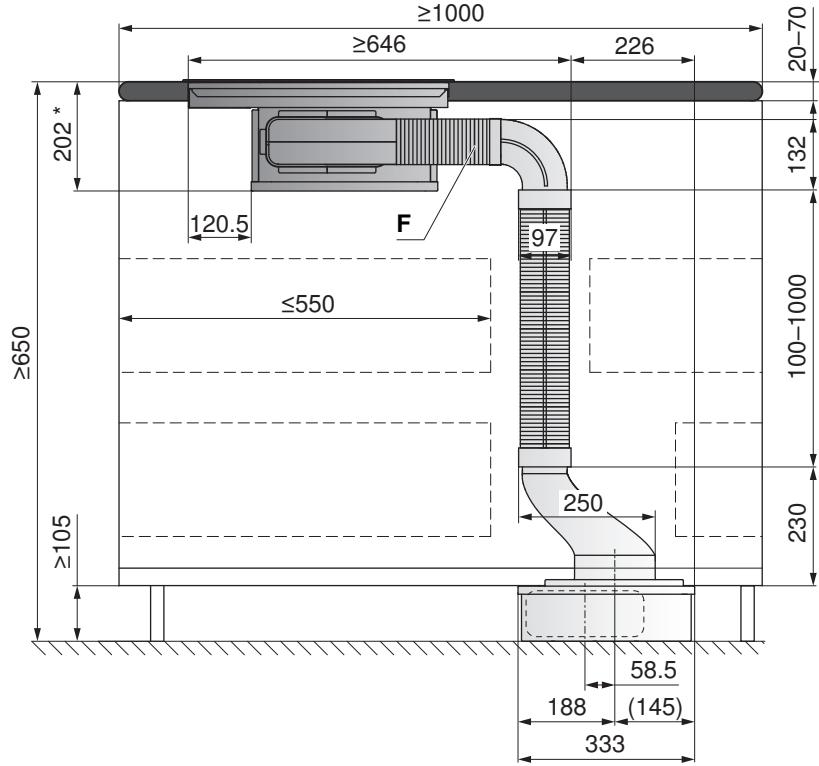

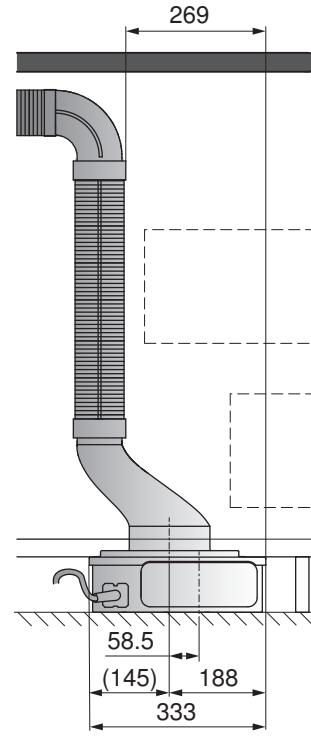

H Dimension from the top of the work surface to the underside of the hob

Ri Corner radii of appliance

Ra Outer corner radii of cut-out

The intermediate base must be removable from below.

Installation overview base unit**Wall installation with depth of ≥ 600** **Wall/island installation with depth of ≥ 700** **Island installation with depth of ≥ 1000** **Variant with rotated fan motor**

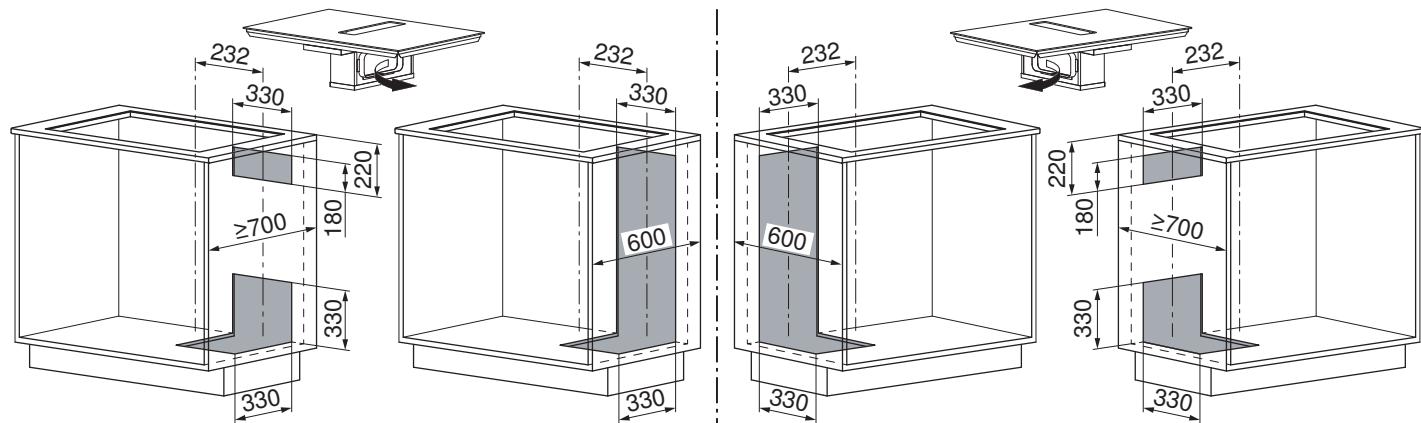

* Surface-mounted installation (flush installation 206 mm)

 **Flat channel F is not included in the scope of delivery. Order flat channel 1046629 at the same time.**

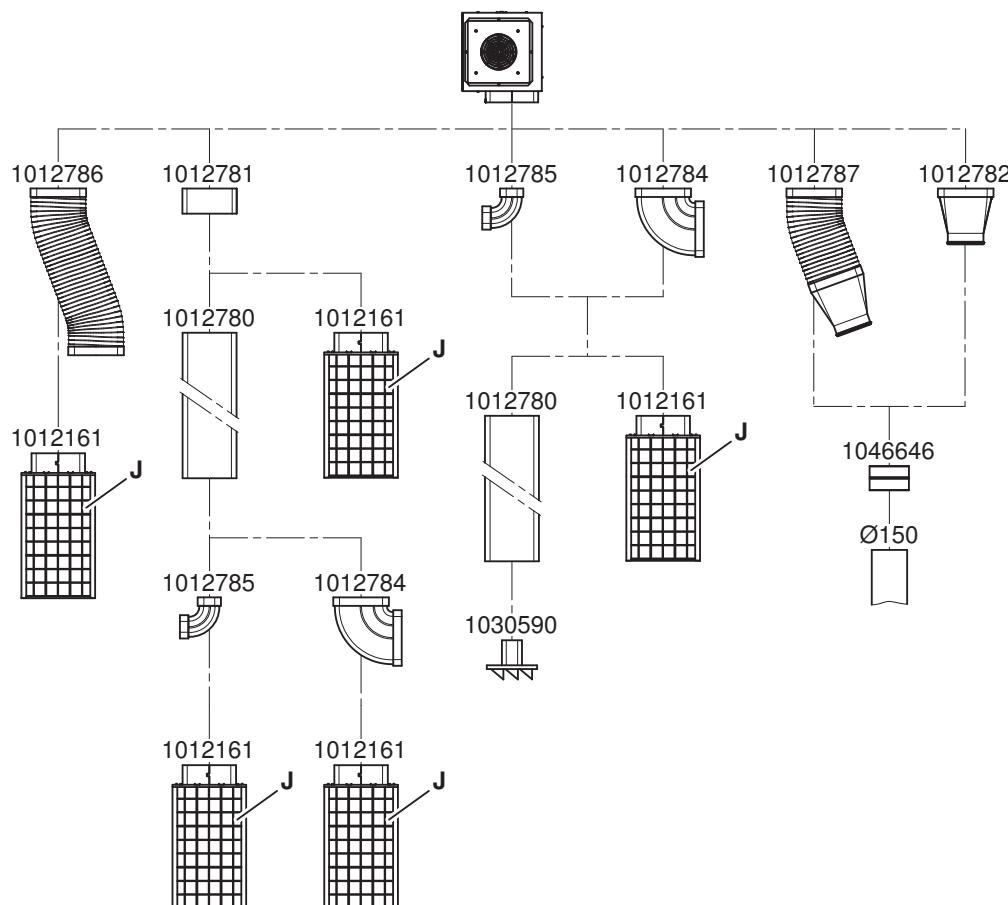

Installation

- ▶ Prepare base according to intended installation variant.

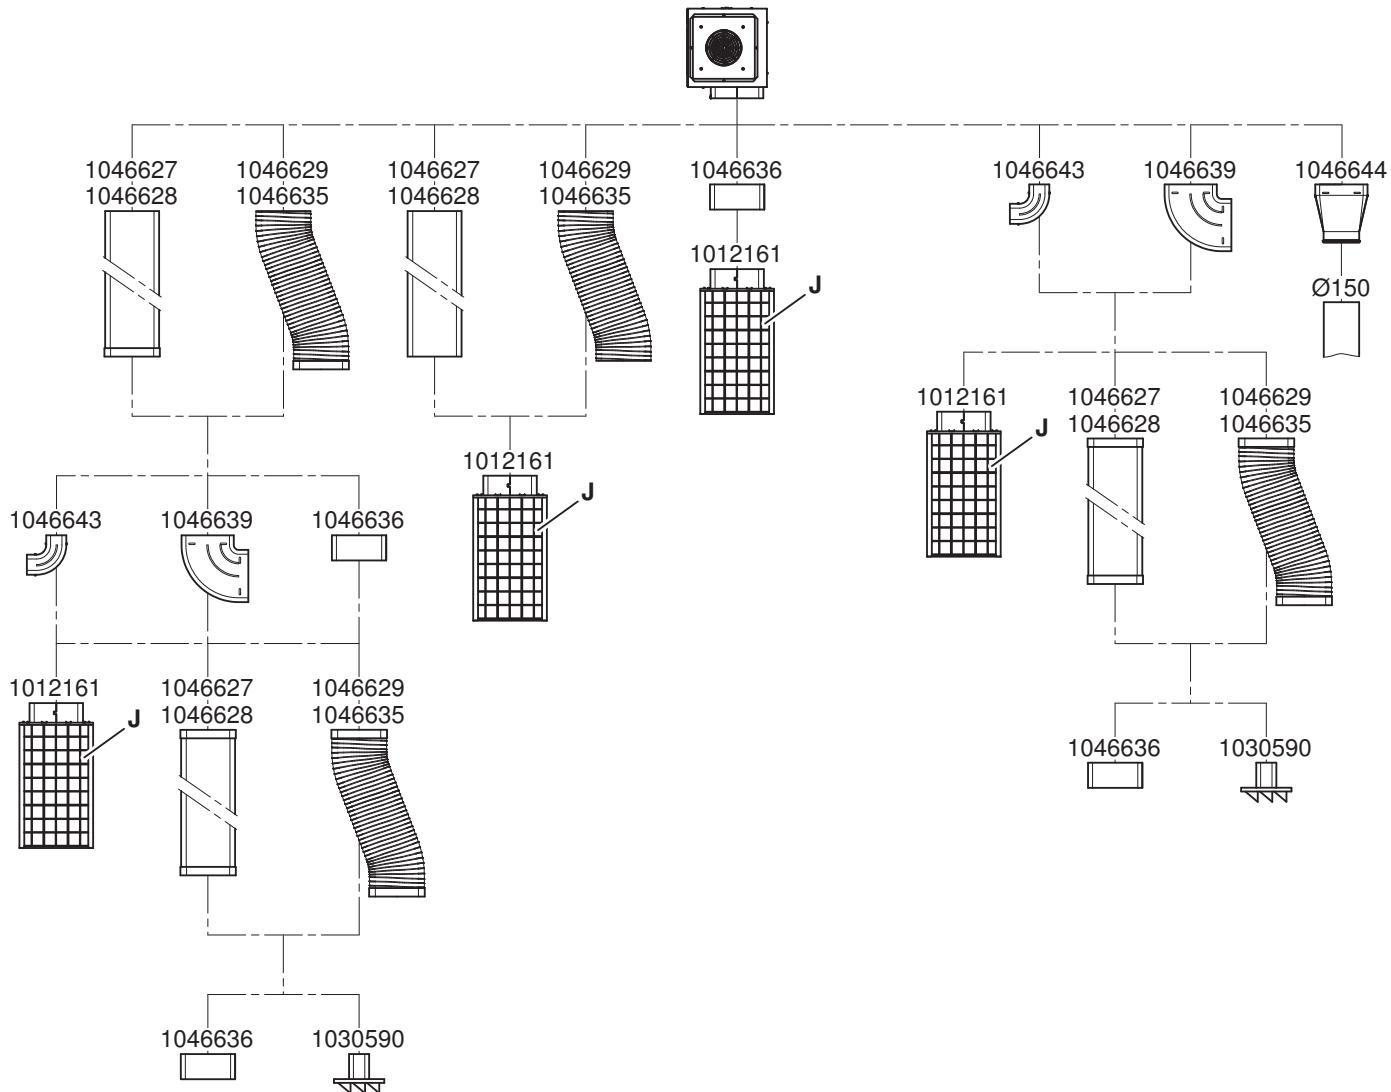

- Provide for an inspection opening for service replacement purposes as shown in the diagrams, observe exhaust air duct to left or right.

Plastic accessories

Metal accessories

The duct spacers 1077495 prevent the narrowing or compression of the air duct. Hence the use of duct spacers is necessary if accessory 1046627/1046628 is embedded in concrete.

Extraction mode

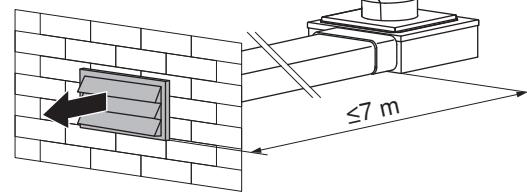

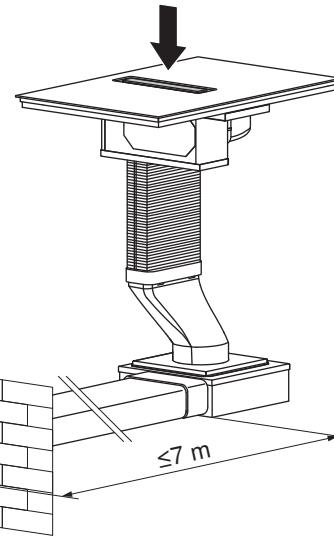

There is a danger of toxic fumes developing if the range hood is operated at the same time as an ambient air-dependent firing system!

The conversion kits and suitable flat channel or pipe systems are available for order as accessories.

- Only use pipes with a smooth inner surface or flexible duct hoses made from non-flammable materials for exhaust duct-work.
- To achieve the greatest possible air extraction with the lowest noise levels, please observe the following:
 - Standard ventilation outlet is by means of flat channel or pipe.
 - The diameter of the exhaust duct pipe must not be less than ø150.
 - The exhaust ducting should be as short and straight as possible.
 - Only use connection elbows with large radii.
 - The exhaust ducting must not be kinked or compressed.
 - Make sure that all connections are secure and airtight.

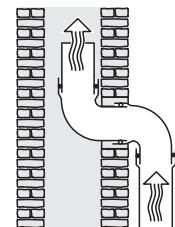

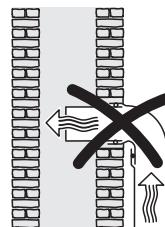

Any constriction of the airflow will reduce extraction performance and increase operating noise.

If the exhaust duct is to be routed outdoors, we recommend installing a telescopic wall pipe H42066.

If the exhaust air is to be ducted into a chimney flue, the intake piece must be aligned with the flow direction of the flue.

- If the exhaust duct runs through cool rooms, lofts, etc., there may be sharp variations in temperature in individual areas. Vapour and condensation is to be expected. This makes it therefore necessary to insulate the exhaust ducting / air duct.

Recirculation mode

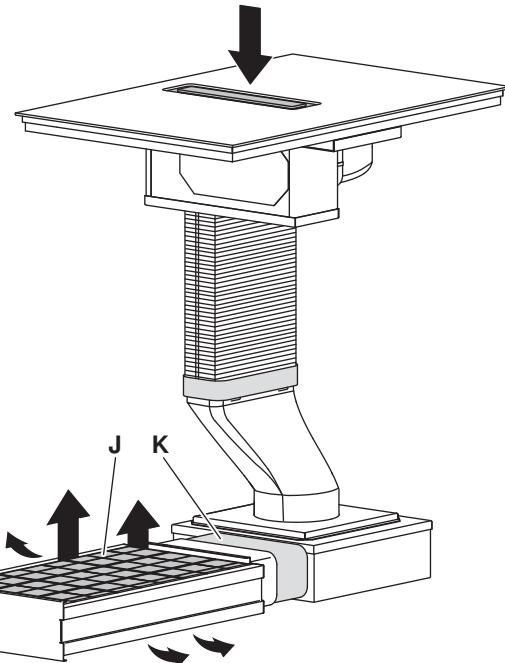

The conversion kits and suitable flat channel systems are available for order as accessories.

For recirculation mode, ensure access for maintenance purposes and also ensure the blow-out opening is at least 500 cm² (e.g. base recess or lamella base).

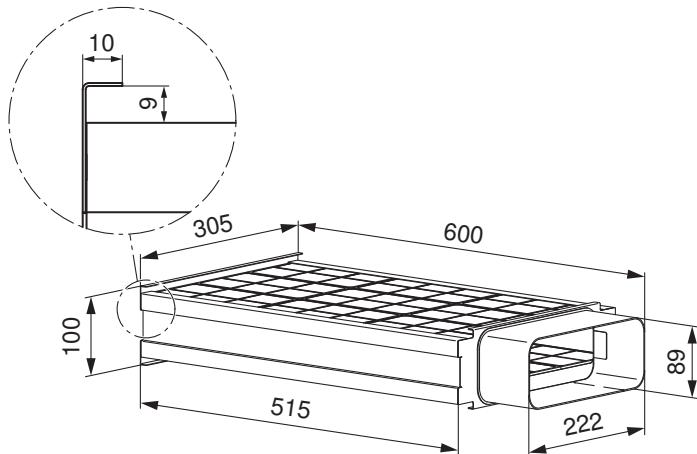

If an exhaust air connection is not structurally possible, the range hood must be set up for recirculation operation.

Recirculation mode with recirculation box

- Connect the channel connector K to the recirculation box J.
- Hold the Ø button depressed for 1 second.
 - An acoustic signal is emitted and a message appears in the display.
- Confirm with OK.
- Touch Ø.
- Select the «Ventilation» user setting.
- Touch ☰ to change the mode to recirculation air.
- Confirm the setting with OK.
 - The setting is saved.

Recirculation box J with article no. 1012161 contains activated charcoal and is required for the recirculation mode. No additional activated charcoal filters may be built into the range hood system.

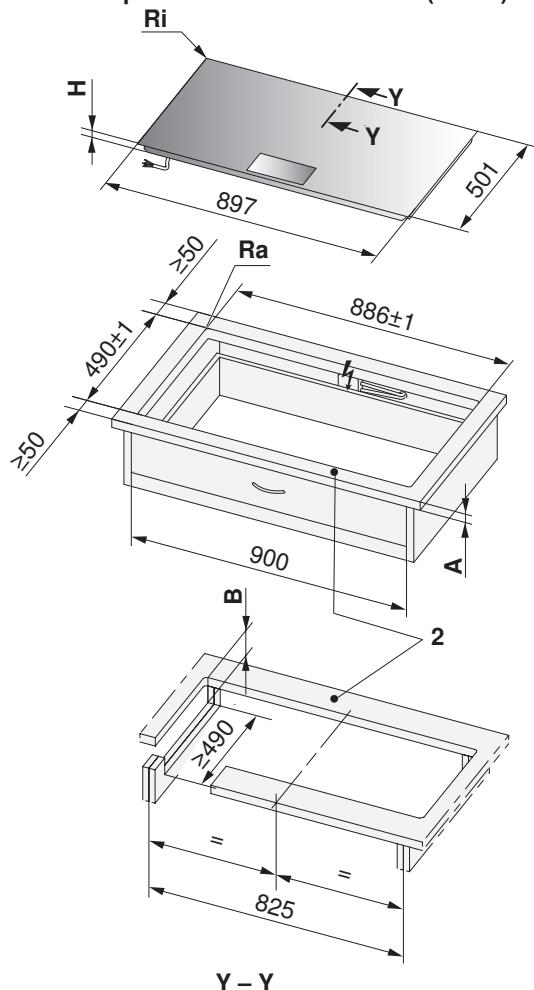

8.6 Surface-mounted installation with «DualDesign»

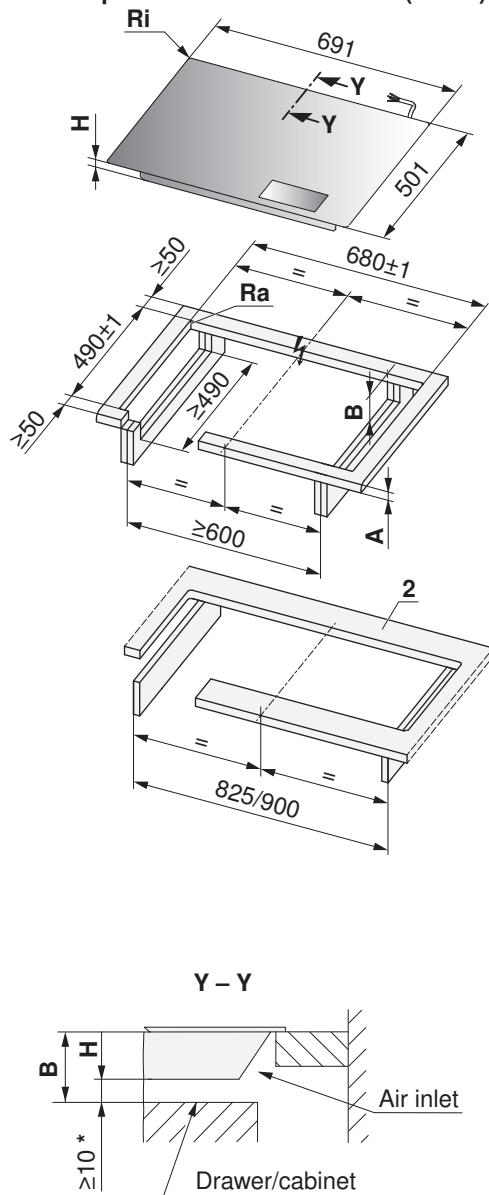

- Corner radii of cut-out, aim for ≤ 5 mm
- Corner radii of appliance 1.5 mm

CookTopInduction V6000 FullFlex (31134)

CookTopInduction V6000 FullFlex (31132)

* The required clearance must be observed!

- 2** The front and rear pegs are reinforced underneath. The strut width is determined by the producer of the stone worktop. The minimum peg width can vary according to the properties of the stone.

8.8 Installation without protective plate

Requirements for optimal ventilation:

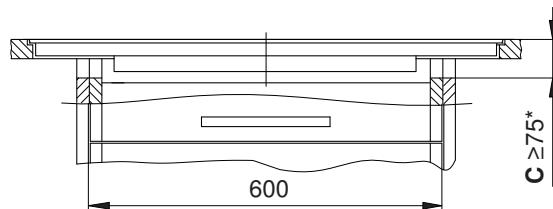

- a front-facing air gap of ≥ 5 mm
- a space of ≥ 10 mm in height beneath the appliance
- a worktop depth of ≥ 20 mm to ≤ 40 mm
- A supply of fresh air (≥ 15 mm air gap) is essential for the trouble-free operation of the hob.

8.9 Installation with protective plate

For more information, see the Accessories (see page 127) section.

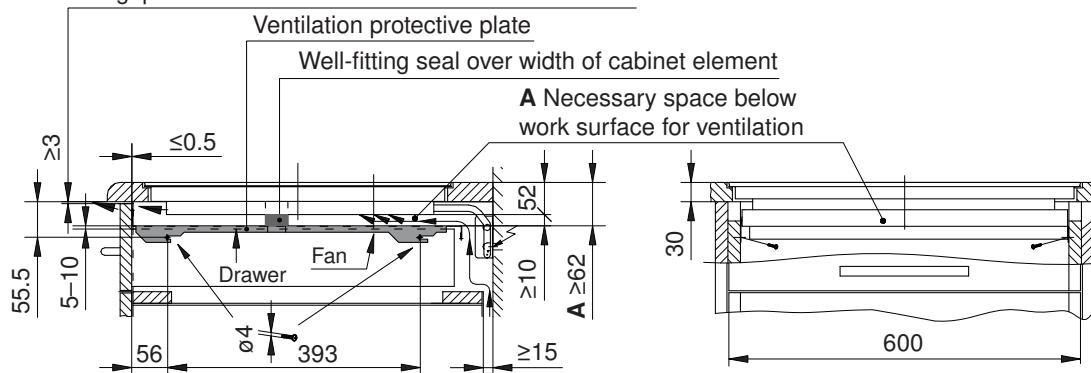

Requirement for optimal ventilation:

- Front-facing air gap of ≥ 3 mm (with protective plate)
- Distance of ≥ 10 mm between protective plate and ventilation opening
- Worktop depth of ≥ 20 mm to ≤ 40 mm
- A supply of fresh air (≥ 15 mm air gap) is essential for the trouble-free operation of the hob.

9 Gas hobs

The distance from the appliance cut-out to the back wall must be ≥ 50 mm and to the side walls ≥ 200 mm. Parts such as side walls and reinforcing strips which protrude into the installation space under the cooking zone must be made of fire-resistant material.

The distance between the underside of the appliance tray and any part of the cabinet beneath that is made of combustible material must be ≥ 20 mm.

When a range hood is installed above the gas hob, the minimum distance given for the particular range hood must be observed.

Furthermore, the minimum distances illustrated must be strictly complied with even if a lower value is stated for the range hood.

A gas hob cannot be built in directly over another appliance due to the installation depth and the gas connection.

9.1 Electrical connection data

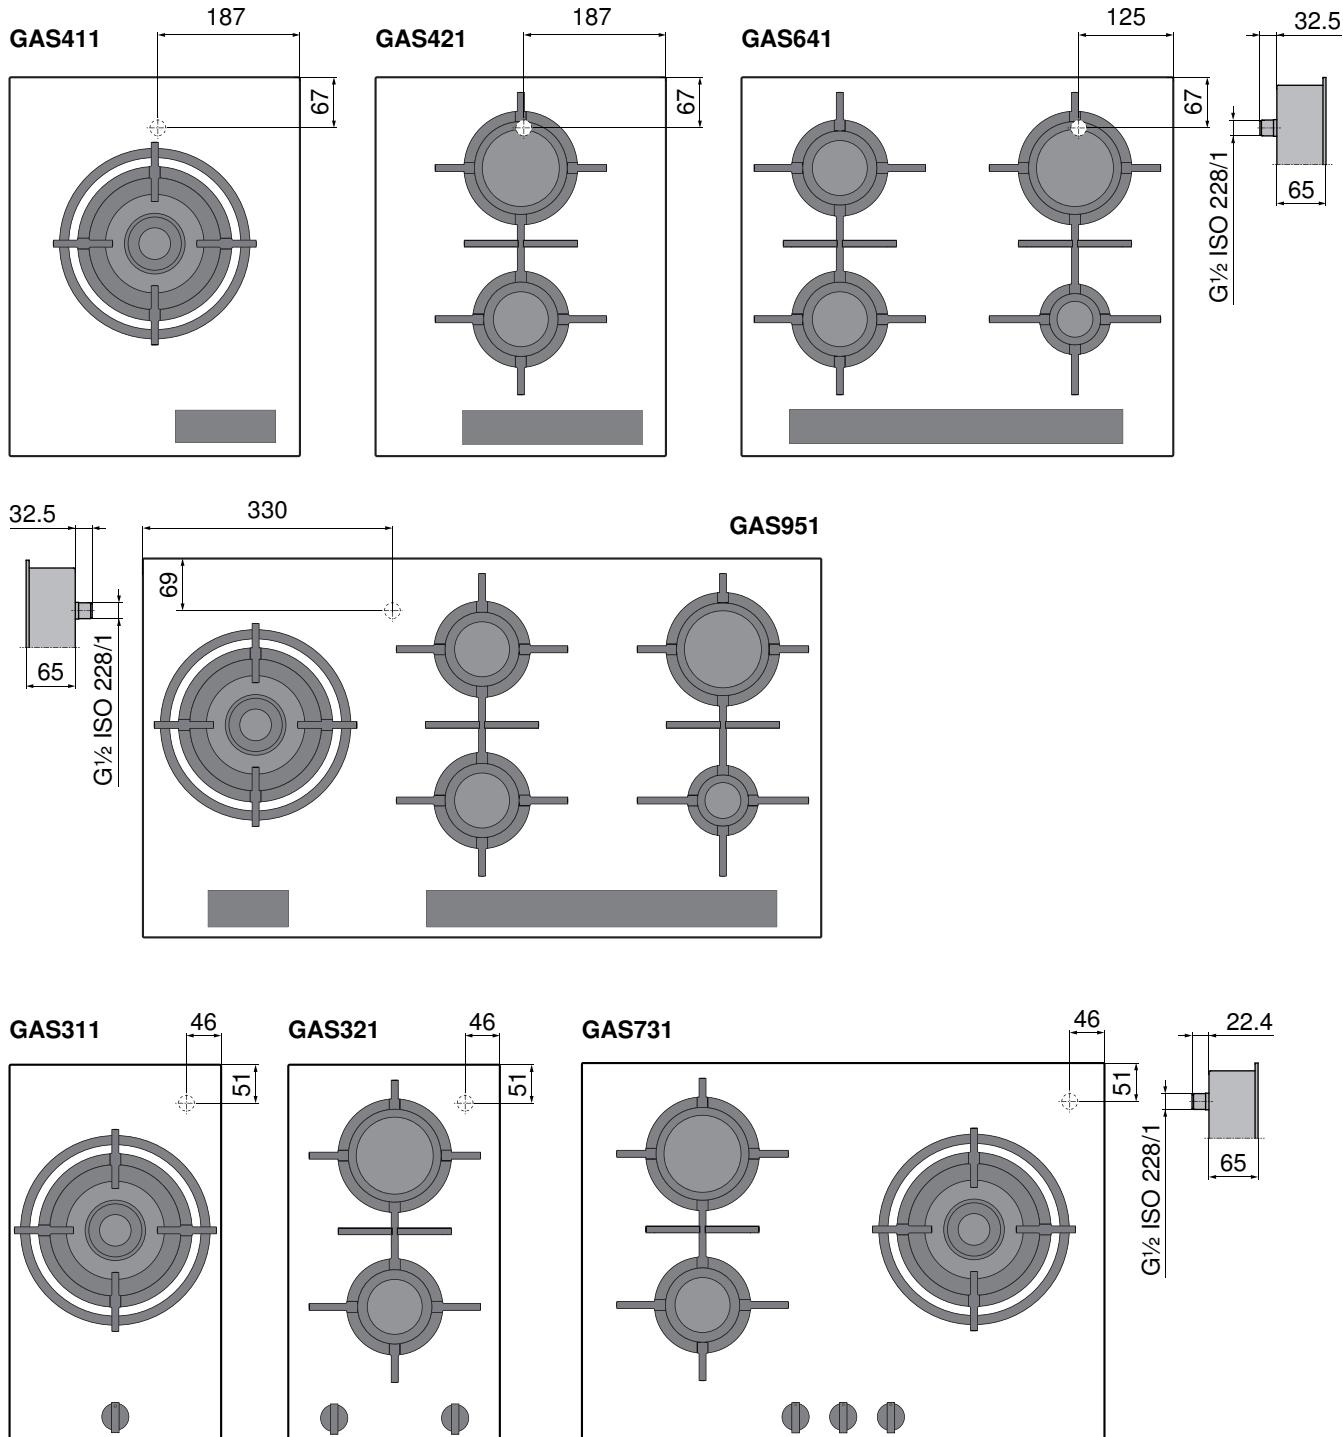

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Country group *	Mains connection	Fuse	Rated load	Mains cable
GAS411GSBZ, GAS421GSBZ, GAS641GSBZ, GAS731GKBZ, GAS951GSBZ	D	220–240 V~50–60 Hz	≥ 3 A	<20 W	1.7 m, with plug
GAS411GSAZ, GAS421GSAZ, GAS641GSAZ, GAS951GSAZ	A, B, E				1.7 m, without plug
GAS731GKBZ	B				
GAS311GKBZ, GAS321GKBZ, GAS411GSBZ, GAS421GSBZ, GAS731GKBZ, GAS951GSBZ	C, F				1.7 m, with plug

* Country group (see page 2)

9.2 Gas connection

 The gas connection and the conversion to another gas type must be carried out by an authorized installer.

- The gas connection must be positioned so that the stop-cock and the supply connection point are accessible with the appliance installed.
- The gas connection must be positioned so that it does not get detrimentally hot during operation. In particular, the gas hose assemblies and the appliance's connection fittings must be clear of hot exhaust gases (e.g. from an oven).
- It must be ensured that the gas hose and the mains connection do not touch any hot parts of the appliance, otherwise the gas hose and the mains cable could become damaged through heat.
- A flexible connection lead (max. length 1.5 m) must be positioned so that it runs freely and does not come into contact with any movable parts of the kitchen cabinets (e.g. a drawer).

½-inch metric thread

The gas connection on the appliance has a ½-inch external thread in accordance with ISO 228/1. If the gas installation on site already has a corresponding counterpart, the gas appliance can be directly connected to it.

½-inch conical thread

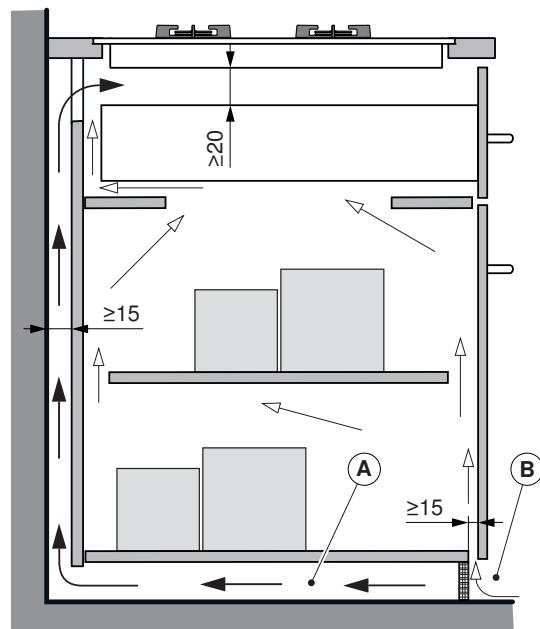

If the gas connection has a conical thread, the transition piece and sealing ring must first be screwed onto the appliance. The transition piece has a conical external thread R ½-inch in accordance with ISO 7/11. In the case of a conical screw connection, the thread makes the seal, which is why the thread must be sealed with hemp or Teflon tape.

9.3 Ventilation

In order to guarantee minimum ventilation, a space of ≥ 20 mm height is necessary beneath the appliance.

- A** The rear panel of the base unit must be open around the work surface cut-out to guarantee continuous air circulation via the ventilation slits. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.
- B** Alternatively, a concealed fresh air supply can ensure air circulation inside the cabinet. So that enough cold air can be drawn in, there must be a continuous supply of fresh air circulating till outside the cabinet. The air must be drawn in from outside the cabinet and be able to circulate freely from inside the cabinet to the hob.

9.4 Setting up appliance to use local gas type

The appliance settings must match the local gas type and connection pressure. If the gas type and connection pressure have not been preset, the appliance has to be converted using the nozzle set supplied or other nozzle sets available as accessories. Information on the default gas setting as well as on the supplied and optional nozzle sets by country can be found in the catalogue. Conversion to another gas type is described in detail in the relevant installation instructions.

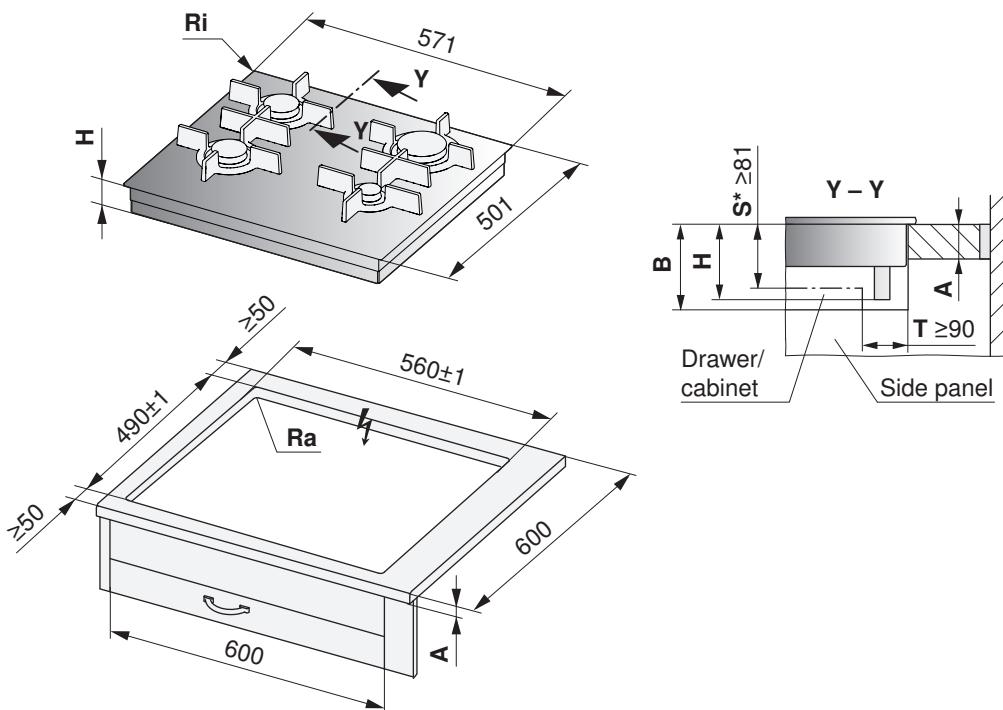

Overview of nozzle sets

Type	Country group *	Default gas setting	Nozzle set (supplied)	Additional nozzle sets available for country-specific combinations of gas type and connection pressure			
				Liquid gas G30, 50 mbar	Natural gas L/K (G25/G25.3), 25 mbar	Natural gas G20, 13 mbar	Natural gas G20, 25 mbar

10 Combined hob installation

10.1 Surface-mounted combination

The surface-mounted hob combination is currently only possible for electric hobs (up to max. hob size 70), gas hobs and hob hoods. The intermediate support 1014361 (stainless steel) or 1019199 (black) is required for this.

Intermediate supports 1014361 and 1019199 are not available in Germany.

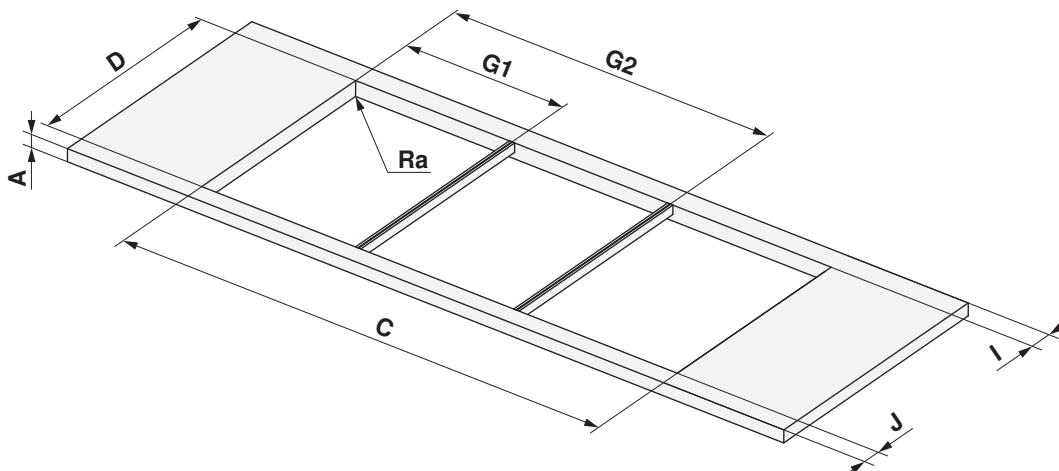

The wok hob GK16TIWSZ cannot be built into a surface-mounted combination with intermediate support.

Dimensions table for hobs

Combinations	Cut-out width C	Intermediate support position G1	Intermediate support position G2
30+30 cm	554 mm	277 mm	-
30+40 cm	657 mm	277 mm	-
40+40 cm	760 mm	380 mm	-
30+30+30 cm	838 mm	277 mm	561 mm
30+60 cm	844 mm	277 mm	-
40+60 cm	947 mm	380 mm	-
30+70 cm	964 mm	277 mm	-
30+40+40 cm	1044 mm	277 mm	664 mm
40+70 cm	1067 mm	380 mm	-
40+40+40 cm	1147 mm	380 mm	767 mm
30+40+60 cm	1231 mm	277 mm	664 mm
40+40+60 cm	1334 mm	380 mm	767 mm

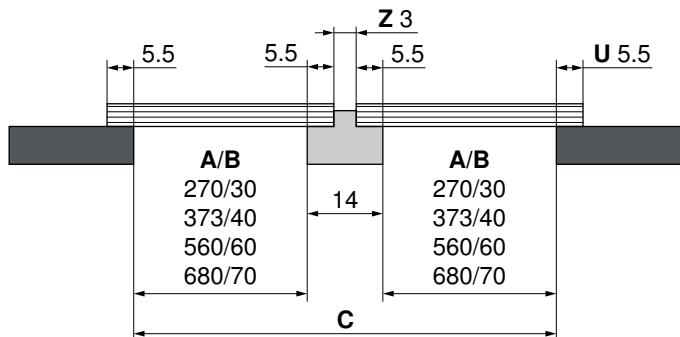

- A ≥30 mm
- D 490 mm
- I ≥50 mm
- J ≥50 mm
- Ra 0–5 mm

10.2 Examples of surface-mounted combinations

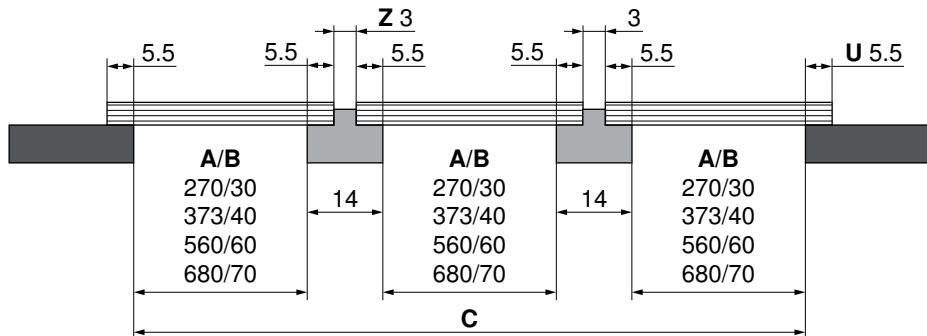

Worktop	Hobs	Intermediate support

Double surface-mounted combination

Example for cut-out width **C** with 30+30 cm: $270+14+270 = 554$ mm

Triple surface-mounted combination

Example for cut-out width **C** with 30+30+30 cm: $270+14+270+14+270 = 838$ mm

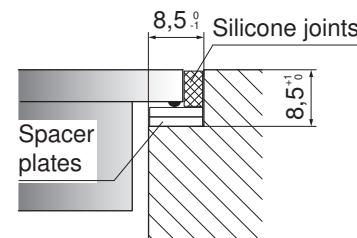

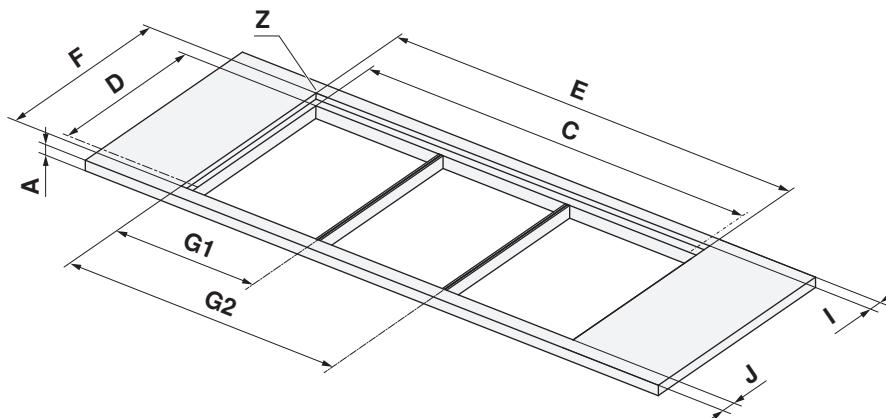

A	B	C	U	Z
Cut-out in mm	Hob size in cm	Cut-out width	Hob/worktop overlap	Intermediate support

10.3 Flush combination

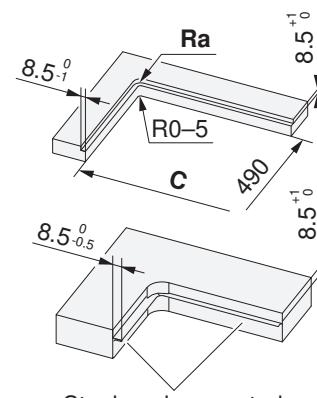

The flush-mounted hob combination is currently possible for all gas hobs, hob hoods and flush-mounted electric hobs with a base plate depth of 501 mm. The intermediate support kit H63789 (contains two intermediate supports) is required.

Dimensions table for hobs

Combinations	Cut-out width E	Cut-out width C	Intermediate support position G1	Intermediate support position G2
30+30 cm	571 mm	554 mm	285.5 mm	-
30+40 cm	674 mm	657 mm	285.5 mm	-

Cut-out in mm	Hob size in cm	Cut-out width	Silicone joint	Hob/worktop overlap

11 Range hoods

Technical information on the range hoods can be found in the document J32836 «TechInfo for range hoods».

11.1 General notes

If other firing systems are being used at the same time (e.g. wood, gas, oil or coal fired heating appliances), safe operation is only possible providing a room negative pressure of 4 Pa (0.04 mbar) is not exceeded at the location of the appliance.

Risk of toxic fumes! An adequate flow of fresh air must be guaranteed e.g. via non-closable openings in doors or windows and in combination with an air-intake/exhaust-air wall box or by other technical means.

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

Minimum distance to the hob

If a V-ZUG appliance is being combined with a third-party brand (hob or range hood) and the stipulated minimum distance between the combined appliances is different, then the greater of the two must be observed. The minimum distance is measured between the bottom edge of the range hood and the bottom of the pot or pan. If the appliance is installed over gas hobs, each cooking zone must be fitted with an ignition fuse.

Extraction mode

The extracted air must not be fed into a chimney which is used for exhausting fumes from appliances burning gas or other fuels.

Observe the local fire regulations.

Installation notes

- In addition to the correct dimensioning of the exhaust duct, it is also necessary to ensure a sufficient inflow of fresh air. **to replace the air that is being extracted.**
- Avoid routing the exhaust duct to the side through the chimney casing.
- Planning features for non-destructive de-installation and maintenance of the appliance:
 - Do not route telescopic casing in suspended ceilings.
 - Avoid silicone joints between the telescopic casing and the appliance.
 - All plastering, plasterboarding, wall papering or painting work is to be carried out prior to installing the appliance.

11.2 Special hoods

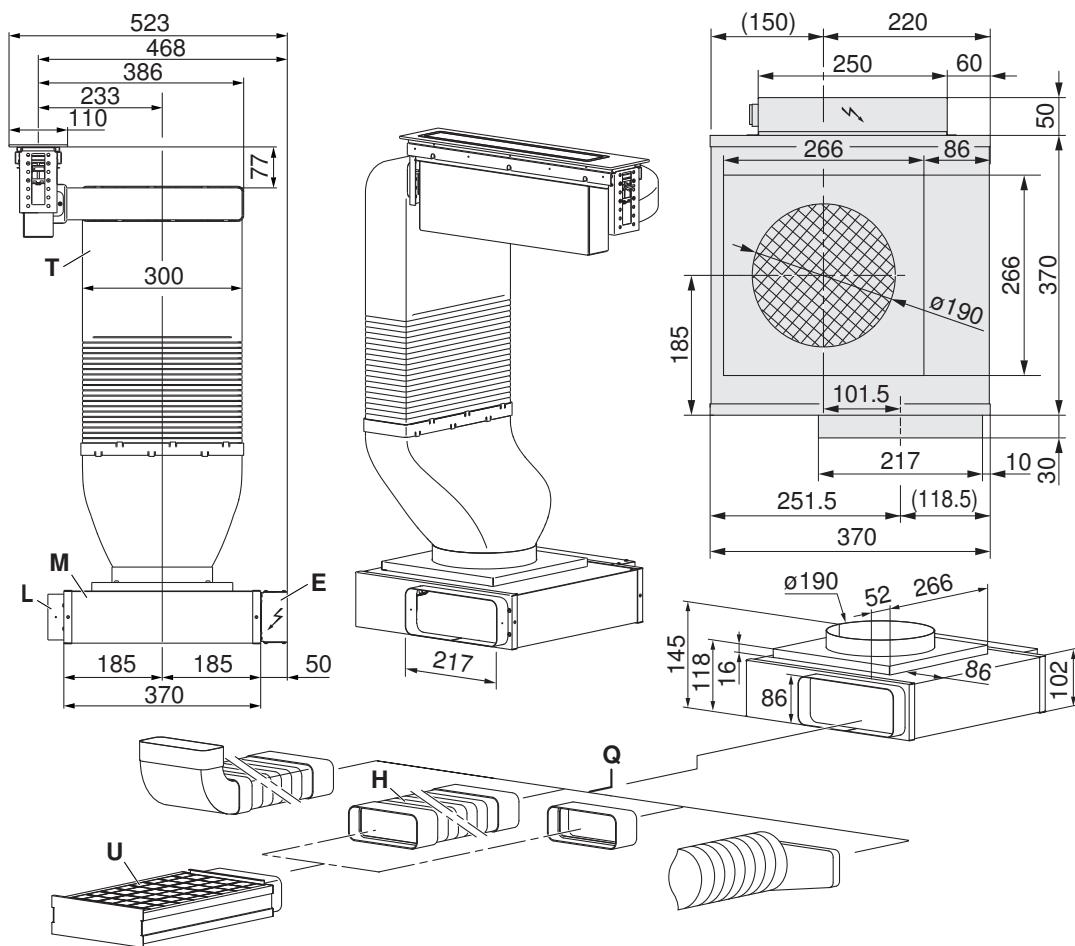

Special hood type DSTS9 (64004) may not be used in combination with gas hobs.

Special hood type DSMS (64005) may only be operated in combination with a gas hob of V-ZUG gas hob type: GAS321x, GAS421x, GAS641x, observing the permitted combination installation variants. The content of the operating and installation instructions for the listed gas hobs must be observed! If operating a permitted gas appliance, the hob hood must be fitted with the dedicated gas deflector 1031218 (accessory)! Operating a gas appliance without the gas deflector is not permitted!

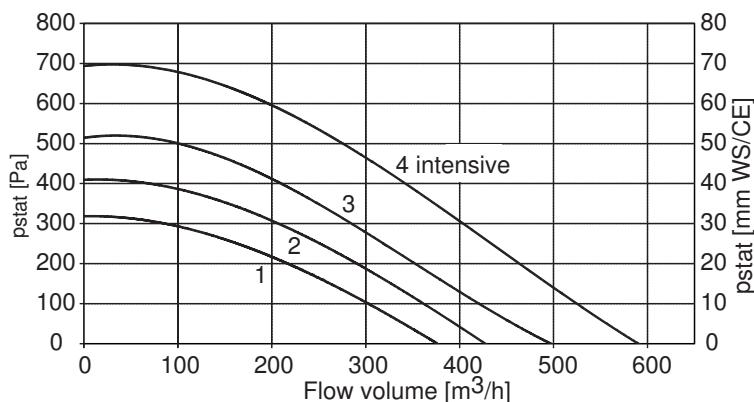

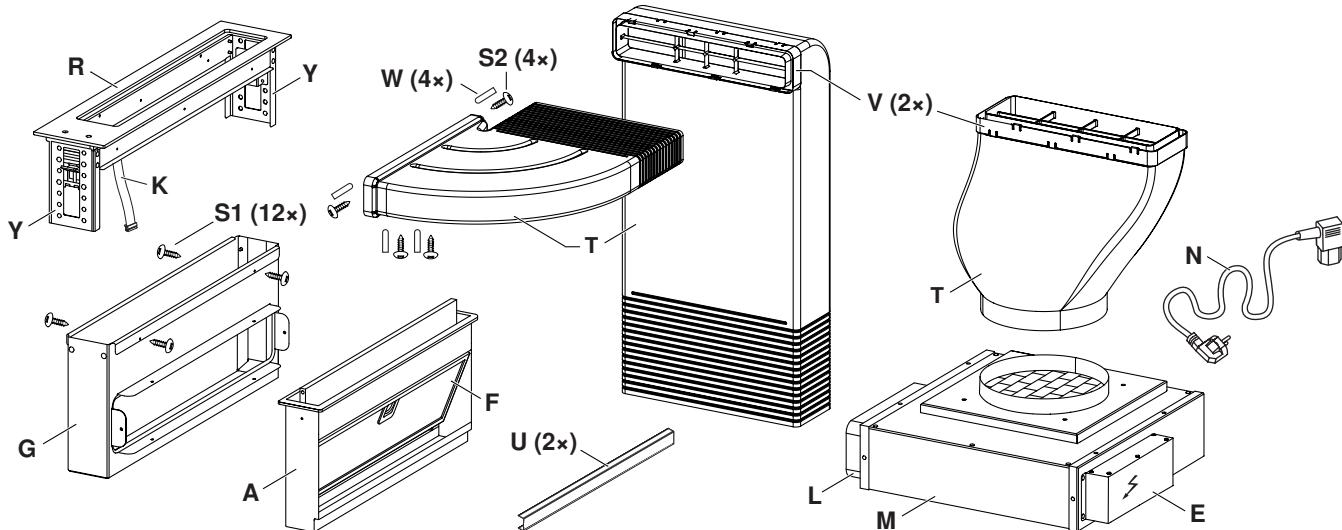

DSMS downdraft hood (64005)

Operating mode	Extraction/recirculation	Mains connection	220–240 V ~ 50–60 Hz
Noise level	62–70 dB (A)	Fuse	10 A
Illumination	-	Fan speeds	4
Motor	1 × 145 W	Weight	~21.5 kg

Suitable flat channel systems Q are available for order as accessories.

- The connection between the hob hood and the exhaust air duct **T** can be to the left or right.
- The ventilation outlet **L** can be fed through one of the four sides, however this can change the installation type.
- Depending on space requirements, the exhaust ducting **T** can be adjusted through shortening.
- The control unit **E** can be repositioned (≤ 250 mm) if required.
- Plan a removable **base plate** or **service flap** for fan motor **M** and recirculation box **U** (for recirculation mode).
- Access to the fan motor **M** and the recirculation box **U** is facilitated through extendible flat channel systems **Q**. Recommendation: Flat flexible elbow **H**, article no. **1012786** with flexible length (240–600 mm).
- For the recirculation mode, ensure sufficient ventilation so that moisture can escape. Plan in suitable material/wood.

**Scope of delivery**

- A** Drip tray frame
E Control unit
F Metal grease filter
G Appliance housing
K Control cable
L Ventilation outlet
M Fan motor

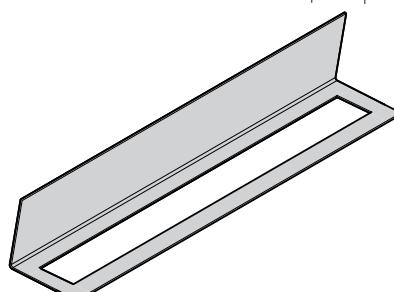

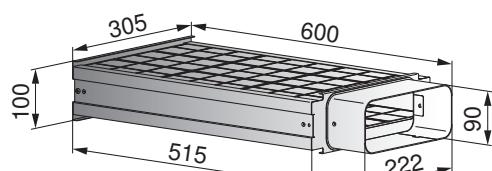

- N** Mains cable length 1.8 m

T Exhaust air duct
U Spacer profile
V Connecting elements
W Plastic covers
Y Mounting angle (surface-mounted installation)

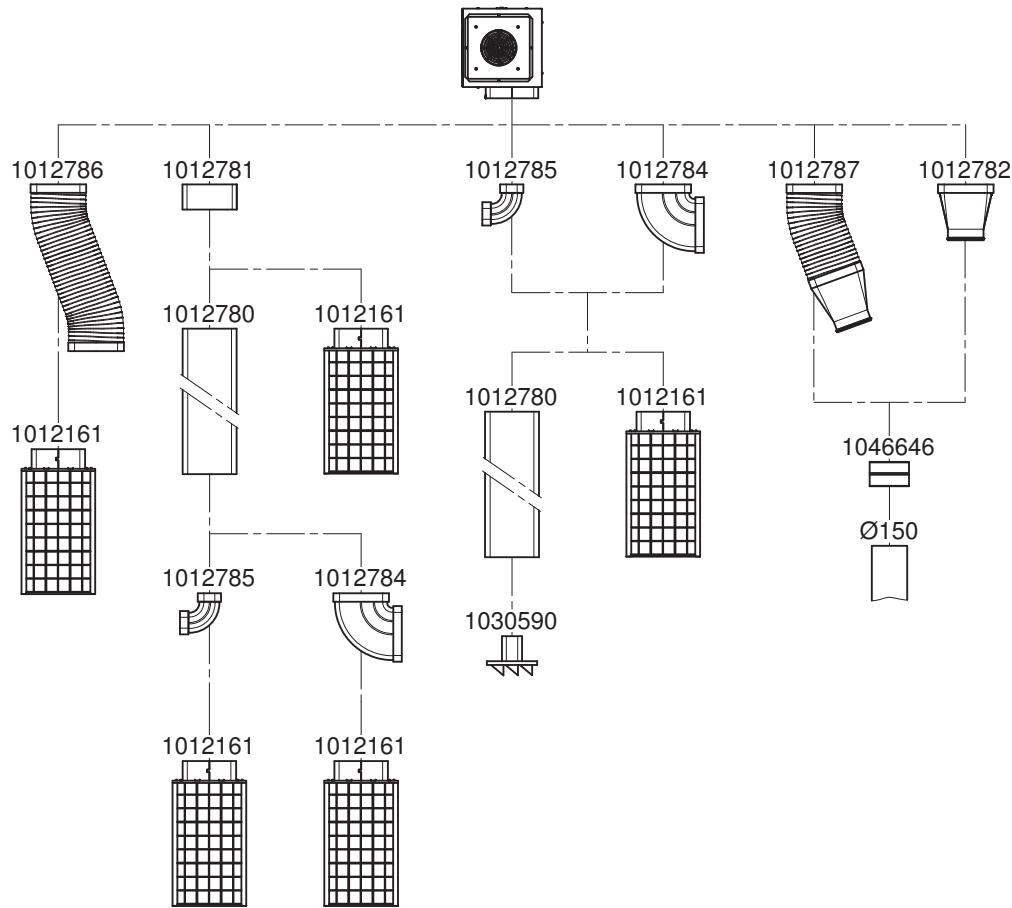

Accessories:

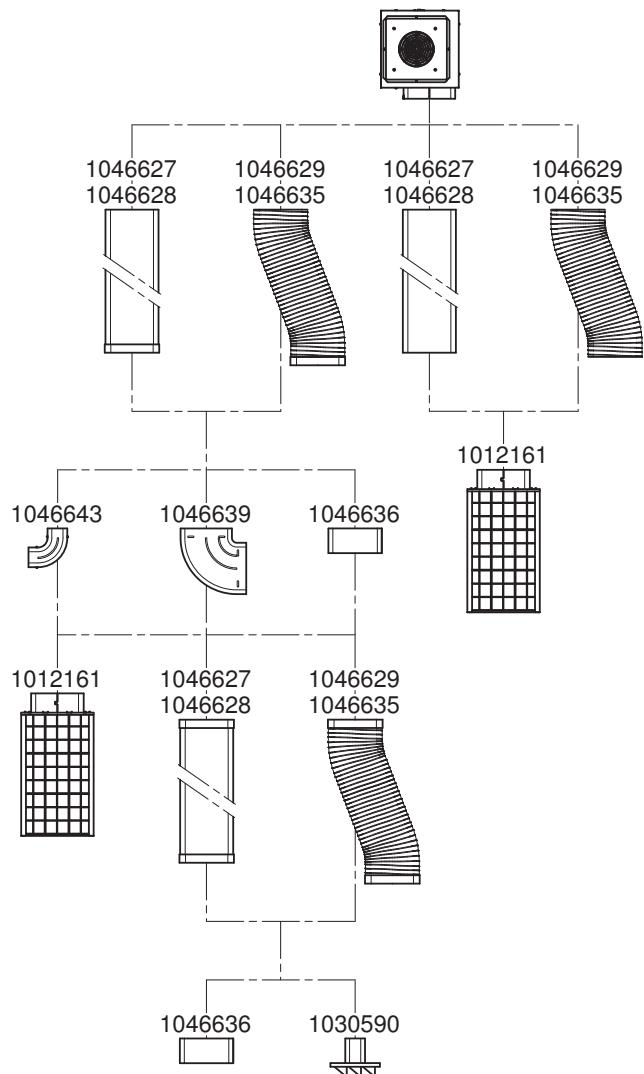

Recirculation box 1012161

The flat channel system **Q** (accessories) can be used for the installation. Flat channel systems made of plastic (see page 135)

Gas deflector 1031218, required accessory when using a permitted V-ZUG gas hob. Operating a gas appliance without the gas deflector is not permitted!

Plastic accessories

Metal accessories

Combination installation

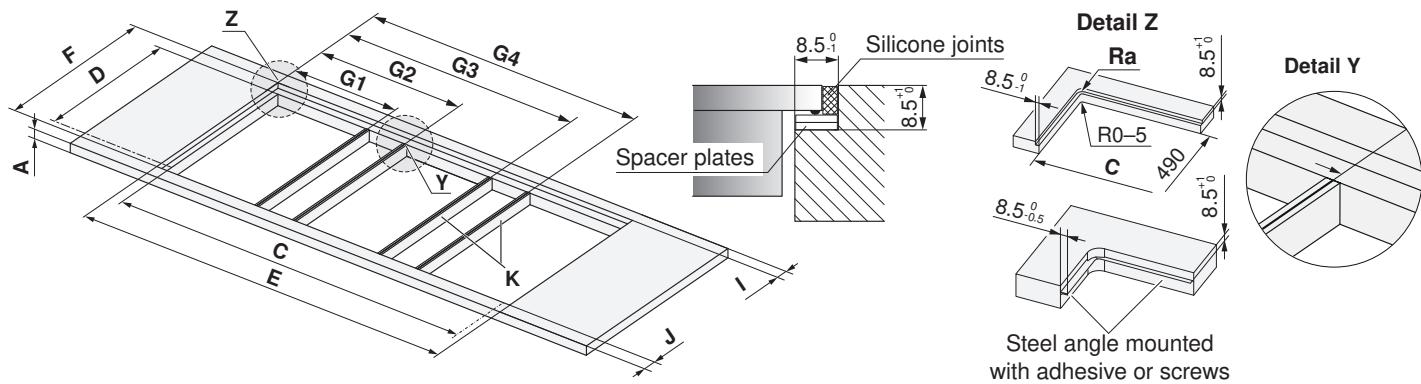

Flush installation

Flush-mounted installation with additional intermediate supports K requires the accessory **intermediate support set H63789** (contains two intermediate supports). Flush-mounted combination installation is described in document 1014381.

A WOK glass ceramic hob cannot be surface mounted!

Reason: Glass thickness is 6 mm.

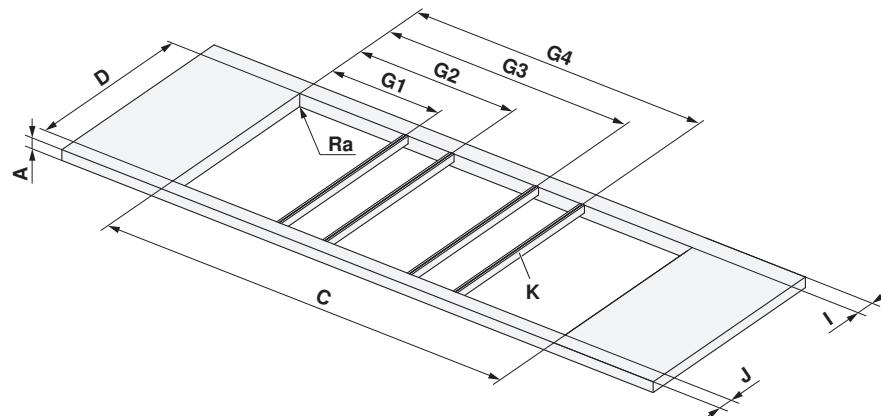

A	F	D	I	J	Ra	K

Variant with rotated fan motor

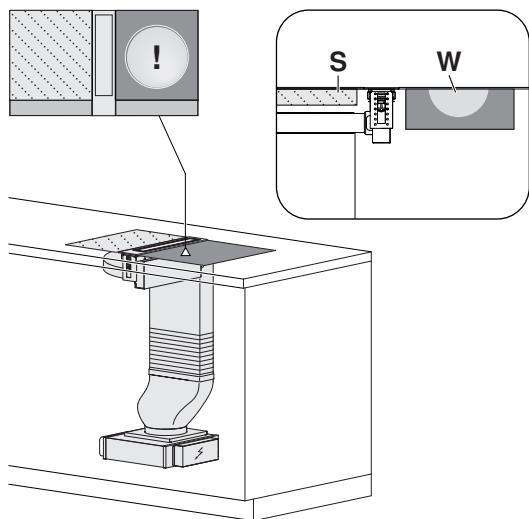

* Flush installation. Surface-mounted installation: 170 mm.

Appliance selection and combination possibilities

1. Planning example: Two hobs

Air duct in base to left/right.

The WOK glass ceramic hob / gas hob **W** is **always** positioned on the opposite side of the exhaust air duct. Standard hob **S**.

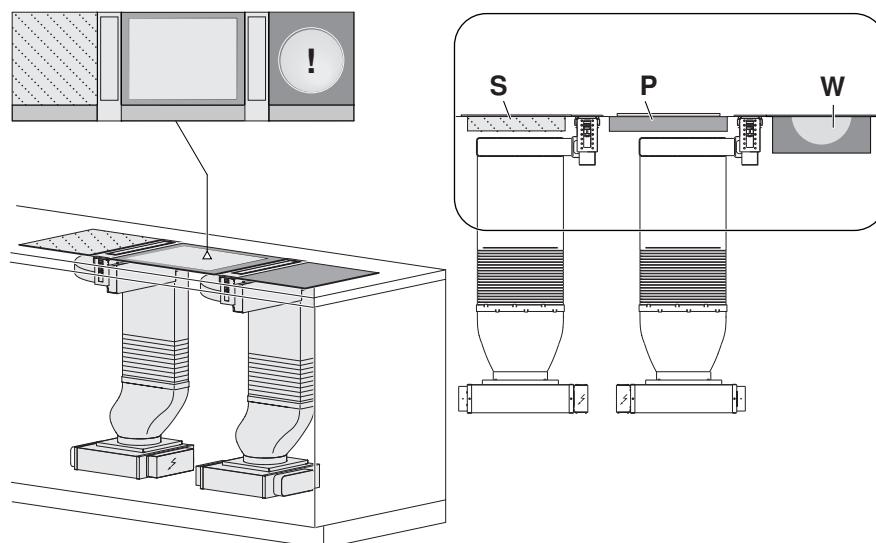

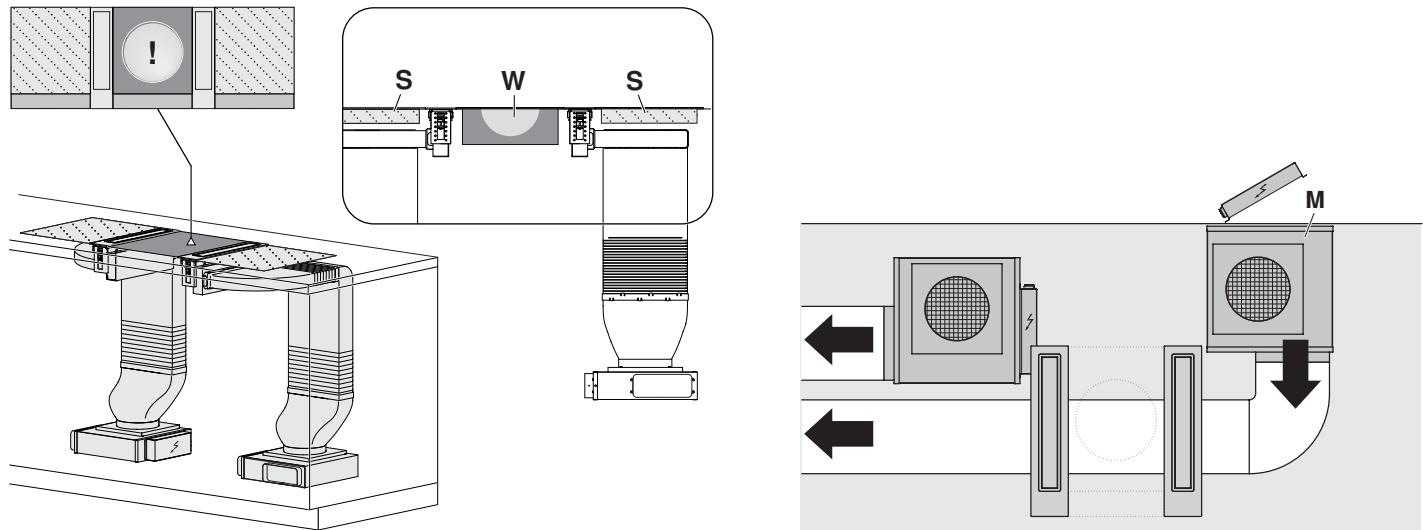

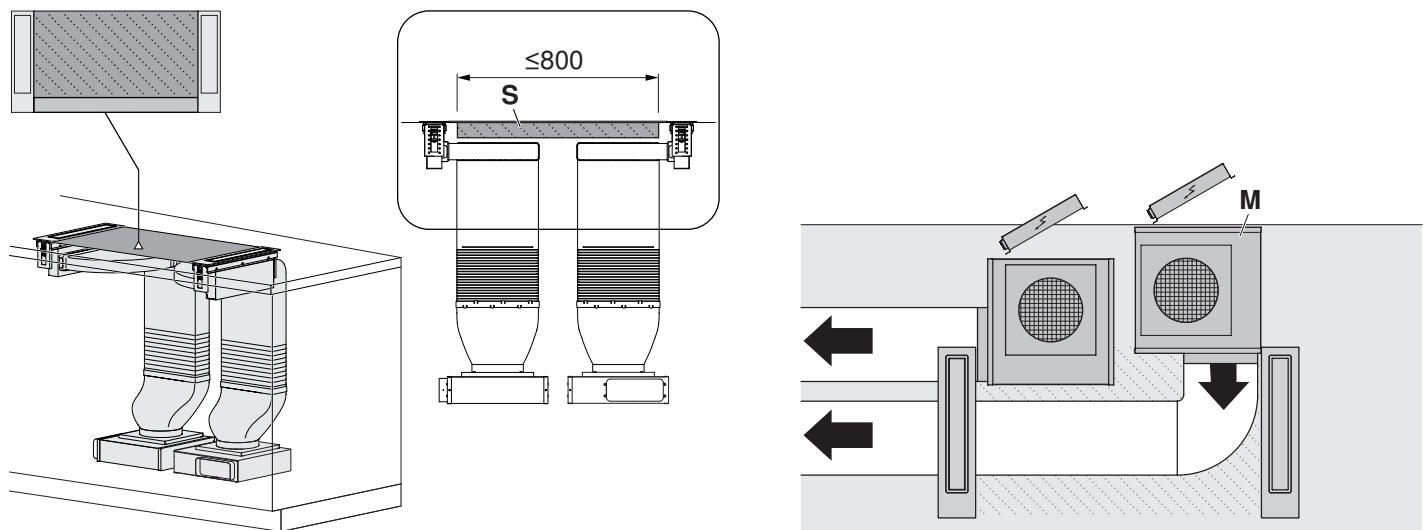

! A WOK glass ceramic hob and gas hob may not be combined! In general, the use of a gas wok, in any combination, is not permitted.

2. Example: Three hobs

Air duct in base on both sides to left/right.

The Teppan Yaki hob **P** (600 mm) is positioned in the middle. The WOK glass ceramic hob / gas hob **W** is **always** positioned on the opposite side of the exhaust air duct. Standard hob **S**.

3. Example: Three hobs**Air duct in base on both sides to outside.**The WOK glass ceramic hob / gas hob **W** (400 mm) is positioned in the middle. Standard hob **S**. Possible position of 2 fan motors **M**.**4. Example: Large hob positioned in the middle****Air duct in base on both sides to inside for space economy.**Allows standard hob **S** with ≤ 800 mm installation width to be positioned in the middle. The WOK glass ceramic hob / gas hob **W** can **not** be positioned in the middle. Possible position of 2 fan motors **M**.

For use with a gas appliance

The hob hood may only be used with the dedicated gas deflector 1031218 (accessory) with one of the gas appliances listed below. Operating the hob hood without the gas deflector is not permitted!

Permitted gas appliances for use with the hob hood:

V-ZUG gas hob type: **GAS321x, GAS421x, GAS641x**, observing the permitted combination installation variants.

Combining the hob hood with two gas hobs is not permitted!

Using another gas appliance type/model or manufacturer is not permitted and can cause lasting damage to the hob hood.

Failure to observe the above instruction can cause lasting bodily harm and lasting damage to property and the appliance. In such a case, any and all liability, guarantee and goodwill claims will be rejected, now and in the future!

Burns hazard!

The appliance and surrounding components get hot during operation! Allow the fan flap, gas deflector and other components to cool down before touching them.

Fire hazard!

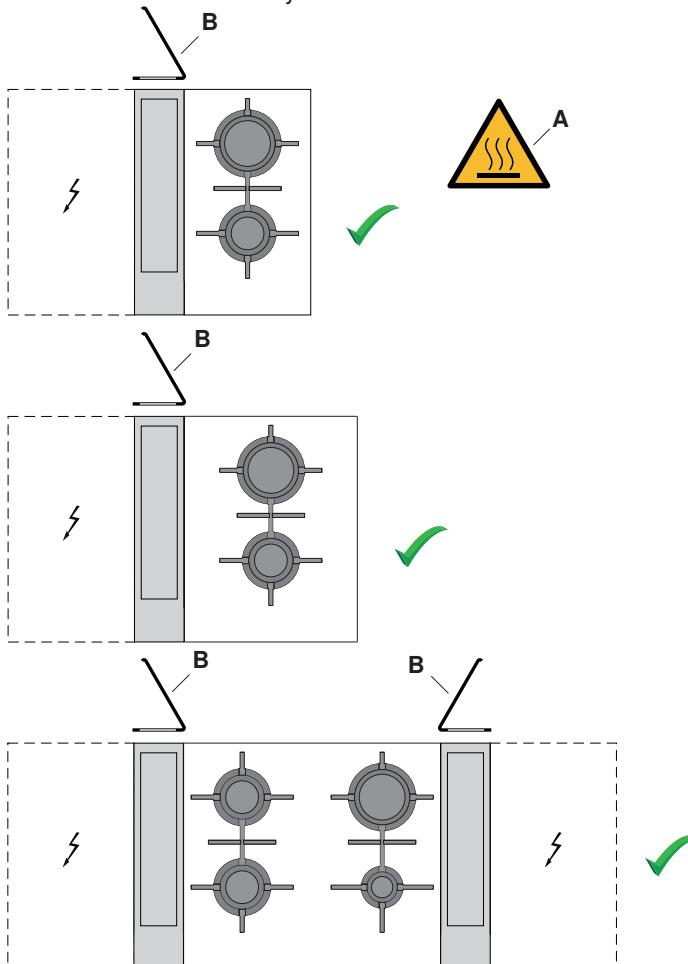

Grease deposits can build up in the grease filter and catch fire. Clean the grease filter regularly. Only operate the appliance with the gas deflector.

Permitted installation variants (V-ZUG gas hob only)

As a variant may also be installed on either side of the appliance.

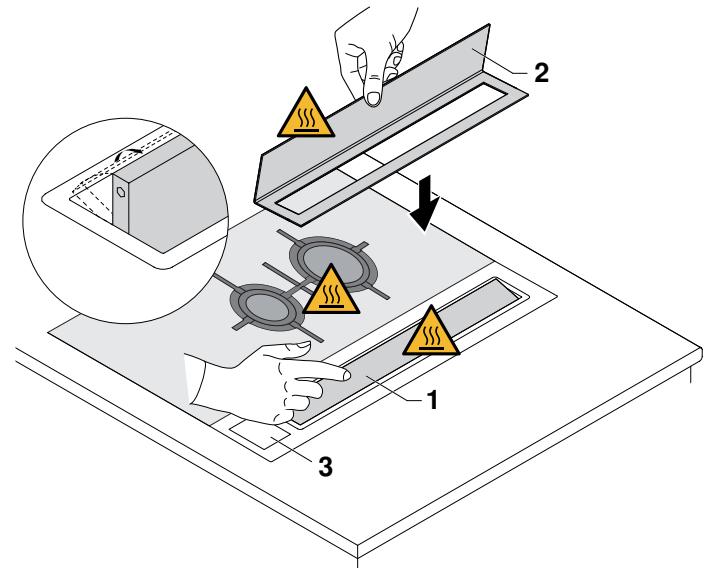

A Caution: Hot surface!

B Gas deflector correctly mounted.

The gas deflector 1031218 (required accessory) reduces the deflection/disturbance of the gas flame at the burner and prevents it being extinguished by a draft.

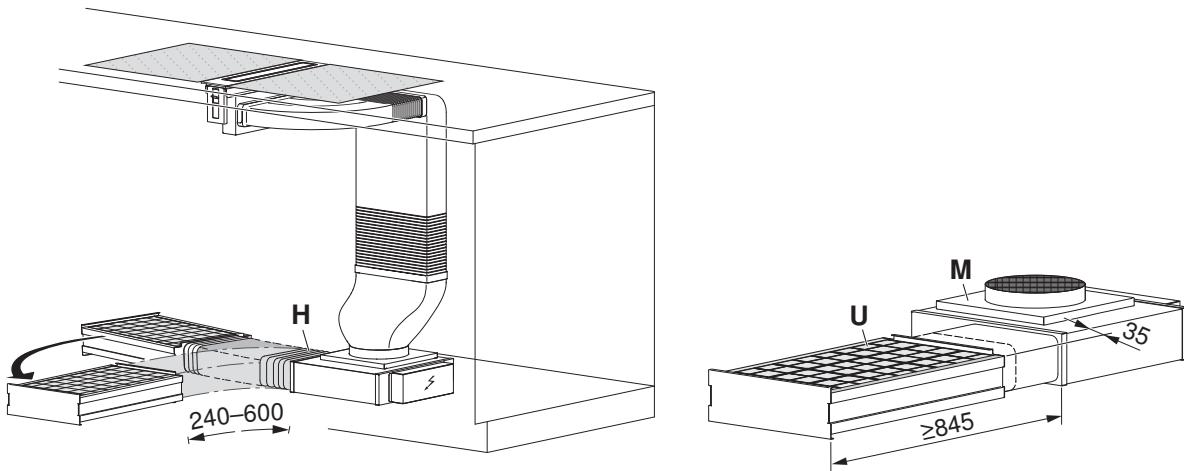

- Open fan flap **1**.
- Set the gas deflector **2** in the correct position relative to the gas appliance.
- Switch on hob hood **3**.

Installation variant for recirculation hob hood with «recirculation box»

Example: Recirculation mode with recirculation box

Flat flexible elbow, **H**, article no. **1012786** with flexible length (240–600 mm) easy installation/access to fan motor **M** and recirculation box **U**.

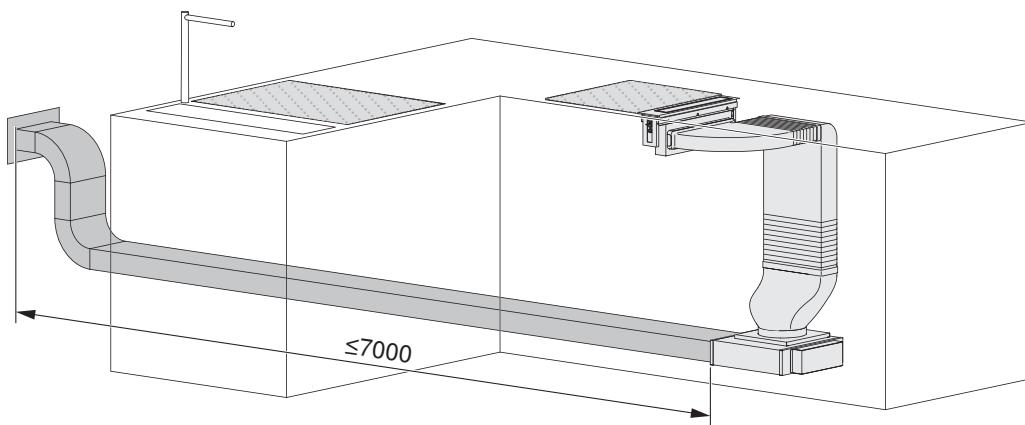

Plan in enough space for maintenance work and ensure access to the fan motor and the recirculation box (for replacing the activated charcoal filters)! Exhaust air outlet cross section: Plan min. 500 cm² for exhaust air in base area.

Dedicated accessories that need to be fitted to operate the appliance in the recirculation mode: article no. 1012161 recirculation box with activated charcoal filters!

Installation variant for extraction hob hood

Example: Extraction mode with flat channel (round channel also possible).

Plan in length of flat channel system to air outlet of **max. 7000 mm**. If the exhaust duct is to be routed outdoors, we recommend installing a telescopic wall box (accessory available for order).

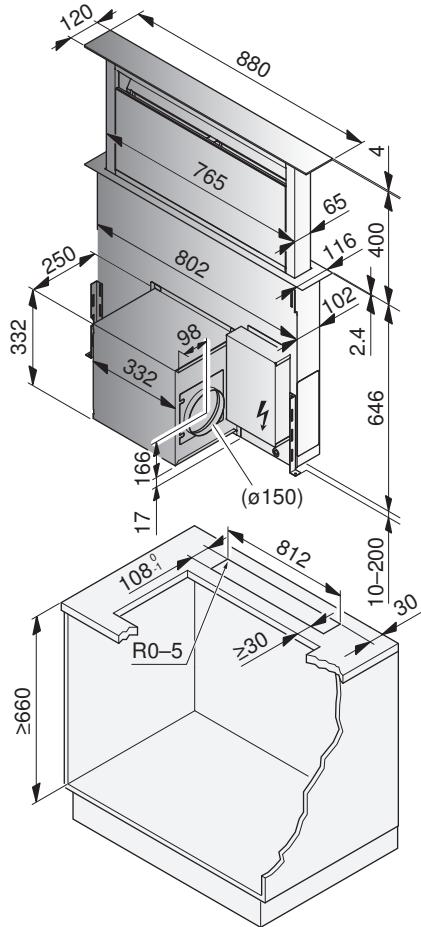

Ensure enough space for maintenance work and access to the fan motor and flat channel system!

DSTS9 downdraft hood (64004)

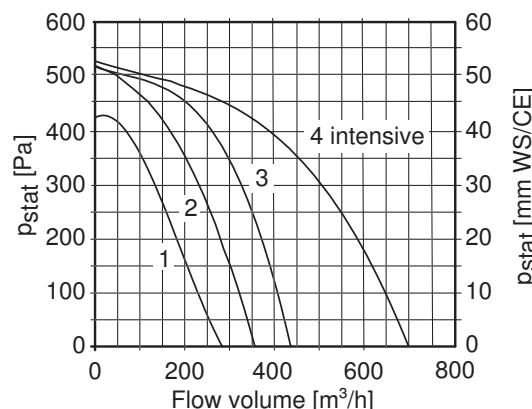

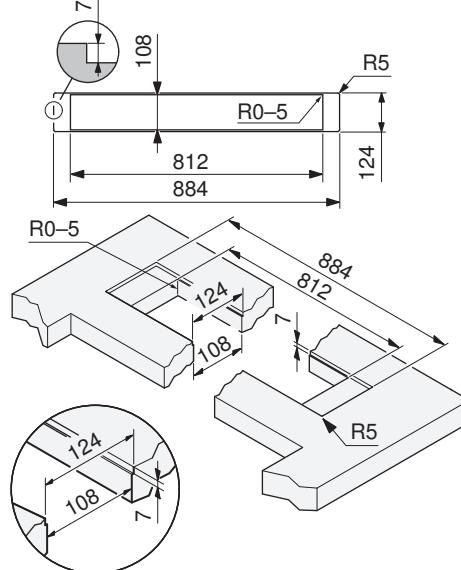

Operating mode	Extraction/recirculation
Noise level	49–69 dB (A)
Illumination	1 × 6 W
Motor	1 × 270 W

Mains connection	220–240 V~ 50–60 Hz, 276 W
Fuse	10 A
Fan speeds	4
Weight	~35 kg

Surface-mounted installation variant

Flush installation variant

- As an alternative, the motor housing may be planned and mounted to the range hood from the back, though access must be guaranteed from the front for service and installation.
- The exhaust connection can be positioned to point in one of four directions.

Recommendation for hob type:

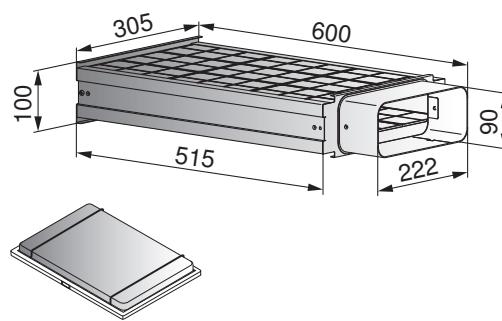

GK46TIMPS..., GK47TIMPS...

Accessories:

Recirculation box 1012161

For the installation, a transition piece 1012782 or H42078 is needed.
See Flat channel systems made of plastic (see page 135).

Long-life activated charcoal filter 1012163

Exhaust air outlet cross section: Plan min. 500 cm² for exhaust air in base area.

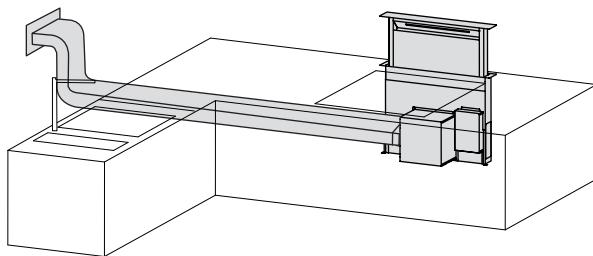

Downdraft hoods

The fan can be rotated for mounting. The exhaust air can thus be extracted upwards, left, right or downwards. The fan can also be mounted in the same position at the back of the appliance. If the fan is to be mounted at the back of the appliance, then the rear panel of the cabinet has to be cut out where the fan is to be mounted and ensure sufficient installation space behind the cabinet. Access from the front for servicing and installation purposes must be ensured. The electrics can, if required, be positioned to the left of the fan, on the hood body or in the cabinet. Variants with external motor as an option are also possible.

Installation variants

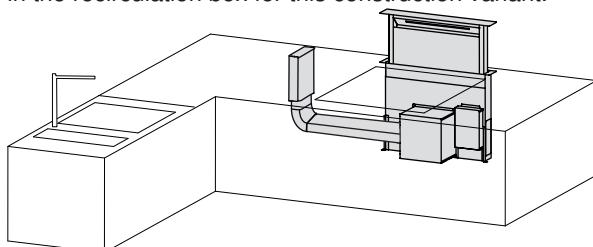

Downdraft extraction hoods

For this installation variant, the base fan feeds the exhaust air through the exhaust air pipe or in a space-saving way through a flat channel through the wall.

Downdraft recirculation hoods with «recirculation box»

The recirculation box is connected to the flat channel in an upright position for this installation variant. For example, the exhaust air can be fed back into the room through a shadow gap. Plans must include an inspection opening for replacing the filter in the recirculation box for this construction variant.

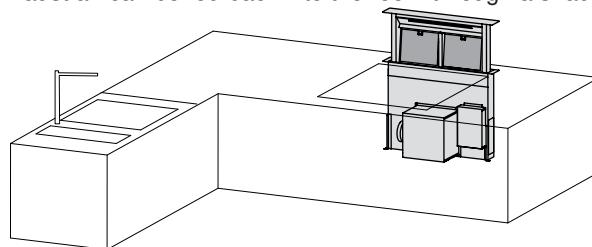

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Downdraft hood with external motor

The motor can be placed externally for this installation variant, e.g. in an adjacent cabinet. A maximum distance of 4 m is recommended. The external motor must be installed on the inside.

Downdraft recirculation hoods with «activated charcoal filters»

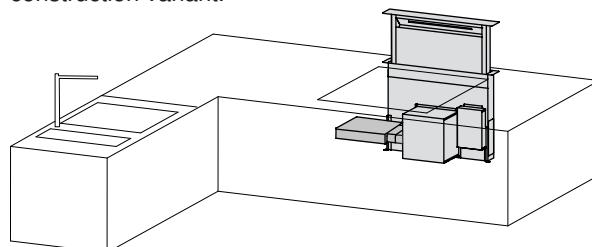

The activated charcoal filters are placed at the front, behind the grease filter, for this installation variant. For example, the exhaust air can be fed back into the room through a shadow gap.

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

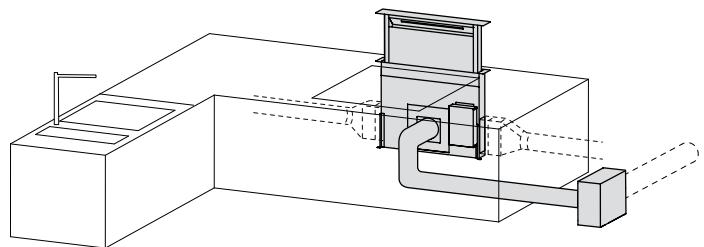

Downdraft recirculation hoods with «recirculation box»

The recirculation box is connected to the base fan for this installation variant. For example, the exhaust air can be fed back into the room through a shadow gap. Plans must include an inspection opening for replacing the filter in the recirculation box for this construction variant.

Exhaust air outlet cross section: plan min. 500 cm² for exhaust air in base area.

Requires external motor set 1012164.

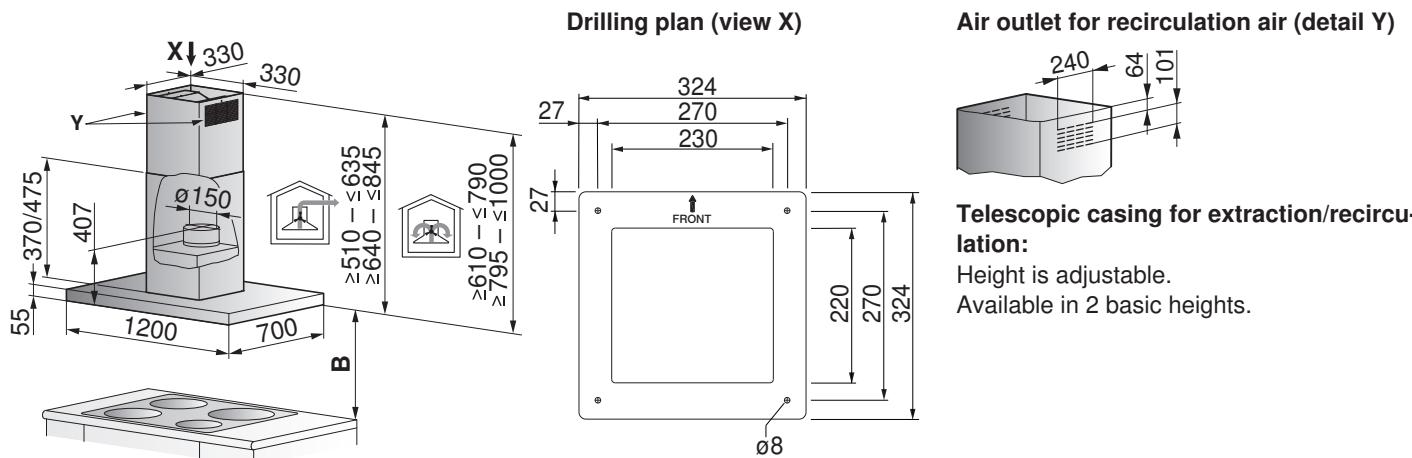

11.3 Island hoods

Applicable to the following hoods:

- Telescopic casing (adjustable) is available in various basic heights.
- Mains connection directly above range hood, connection cable 1.2 m with plug.

AiroClearIsland V6000 (63020), DI Premira (63016)

Operating mode	Extraction/recirculation	Mains connection	220–240 V~ 50-60 Hz, 138 W
Noise level	38–63 dB(A) / 41–68 dB(A)	Fuse	10 A
Illumination	4 × 2 W	Fan speeds	4
Motor	1 × 130 W	Weight	~32/35 kg
Options connection	Max. 180 W		

For recirculation air (see detail Y):
Air outlet left/right and front/back possible.

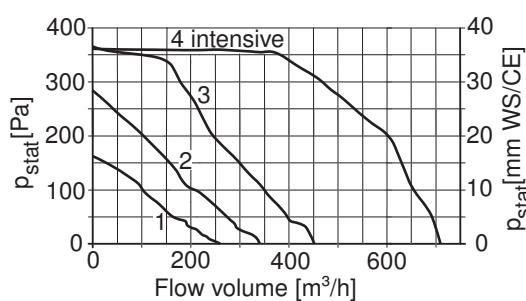

Telescopic casing for extraction/recirculation:
Height is adjustable.
Available in 2 basic heights.

Minimum distance B above hob

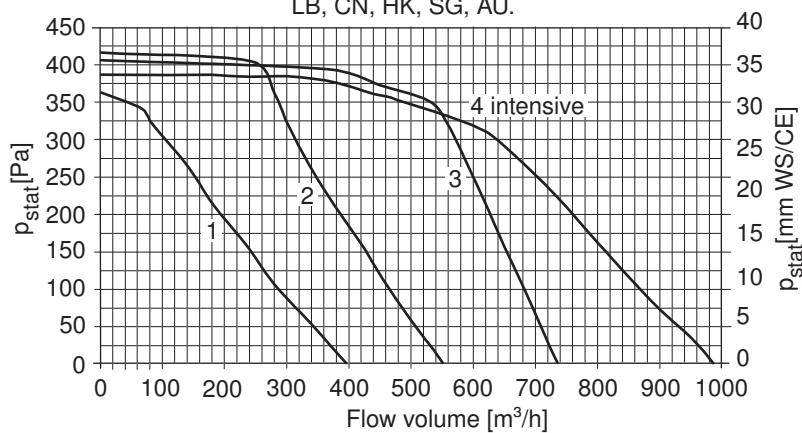

For electric hob: 500 mm

For gas hob: 750 mm

Note on minimum distance (see page 73)

LB, CN, HK, SG, AU.

11.4 Wall hoods

Applicable to the following hoods:

- Consider type of piping (straight or elbow).
- Telescopic casing (adjustable) is available in various basic heights.
- Connection directly behind telescopic casing.

Positions of electrical connections

The specified dimensions are valid for straight exhaust air piping. If exhaust air piping with an elbow are used, the dimensions must be adapted accordingly.

12 Dishwashers

12.1 General notes

Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

At any time it must be possible to pull the appliance out of the niche horizontally without dismantling any part of the cabinet.

For work surfaces that are susceptible to moisture, use work surface protection W70163.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

The appliances are designed for use up to a max. altitude of 2,000 m above sea level.

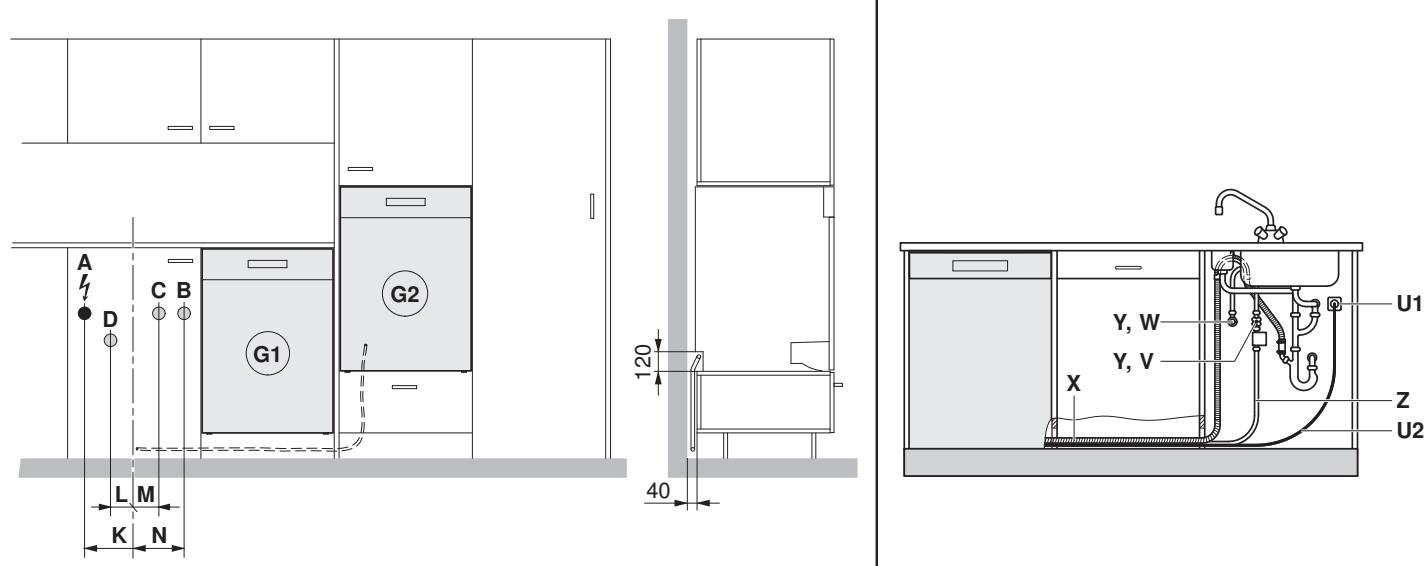

Validity

Model designation	Type	Model number
AdoraDish V2000	AS2T	41108, 41109
AdoraDish V4000	AS4T	41110, 41112, 41114
AdoraDish V6000	AS6T	41115, 41118–41120, 41125

Dishwashers with heat pump (see page 111)

12.2 Electrical connection data / plumbing in

Example of connection

Designation		Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket 230 V
B	Cold water	600 mm	N = 170 mm	G ^{3/4} "
C	Hot water *	600 mm	M = 70 mm	G ^{3/4} "
D	Outlet	400 mm	L = 110 mm	Ø56 mm
G1	Dishwasher in base unit		Connection in adjacent compartment left or right	
G2	Dishwasher in tall unit		Connection in max. 2 compartments left or right	
U1	Power socket		Yes	
U2	Connection cable		Length 1.50 m **	
V	Cold water connection		Yes	
W	Hot water connection *		Yes	
X	Drain hose		Length 1.55 m ** / internal diameter = 22 mm	
Y	Shut-off devices		Yes, G ^{3/4} "	
Z	Aquastop / water inlet with filter, G ^{3/4} "		Length 1.55 m **	

* The hot water connection can be activated for a water flow temperature of at least 45 °C to maximum 75 °C. For the "No heating" function, a water flow temperature of 60 °C is recommended.

** If the standard connection length is not long enough, order the CS set with a longer connection length (AdoraDish (see page 143)).

Special lengths must be connected directly to the appliance. Lengthening the inlet and drain hoses is not permitted.

Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Model designation	Type	Model number	Country group *	Rated load	Mains connection	Fuse
AdoraDish V6000	AS6T	41118, 41120	A, E	3200 W	230 V~ 50 Hz	16 A
			F	3200 W	220–240 V~ 50 Hz	16 A
			B	2200 W	230 V~ 50 Hz	10 A
			C, D	2200 W	220–240 V~ 50 Hz	10 A
		41119	A, E	3200 W	230 V~ 50 Hz	16 A

	123	132	142	152	162	172	182	192	202	212	222	232	15
	133	142	152	162	172	182	192	202	212	222	232	242	23
Max.	141	150	160	170	180	190	200	210	220	230	240	250	30

The permissible weights of the front panel / decor panel system **1** depend on the design variant:

Decor system	Integrated Nero, white, ChromeClass	Design integrated mirror glass	Fully integrated
Minimum weight	5.5 kg	4 kg	5 kg
Maximum weight	9 kg	7 kg	7.5 kg
Maximum weight with strong springs (special set W84604)	Up to 10 kg	Up to 8.5 kg	Up to 9 kg

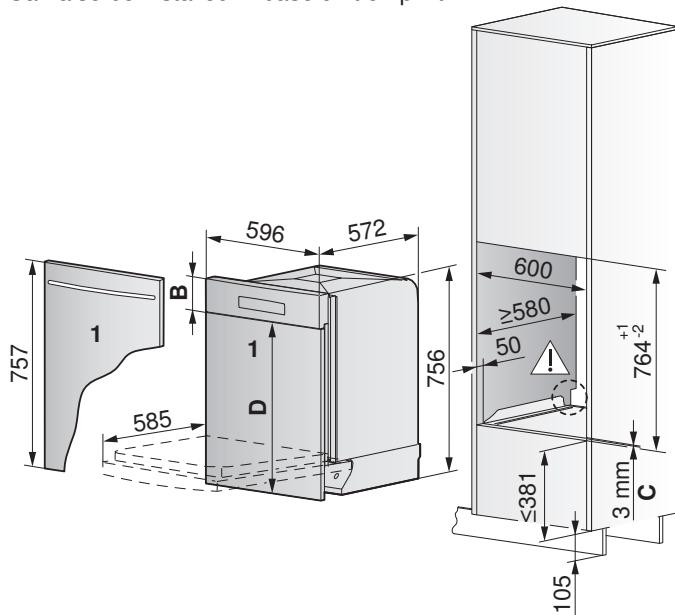

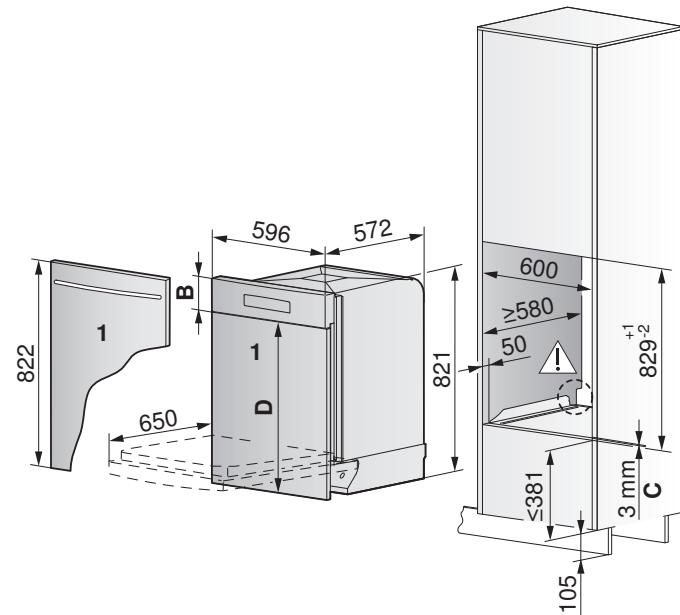

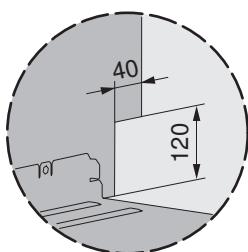

- The weight dimensions only apply to uniform decor panels up to 22 mm thick.
- For decor panel that are thick or uneven (e.g. frame constructions or bevelled glass plates), the CS set «Door hinge brake» (art. no. 1011228) can be used to provide additional stability to the appliance door when pushed open.

For different dimensions / decor panel weights, check using the “Calculation of special decor panel for dishwashers” tool: <https://www.vzug.com/b2b/gb/en/planningaid>

Tall unit «standard»

Can also be installed in base unit on plinth

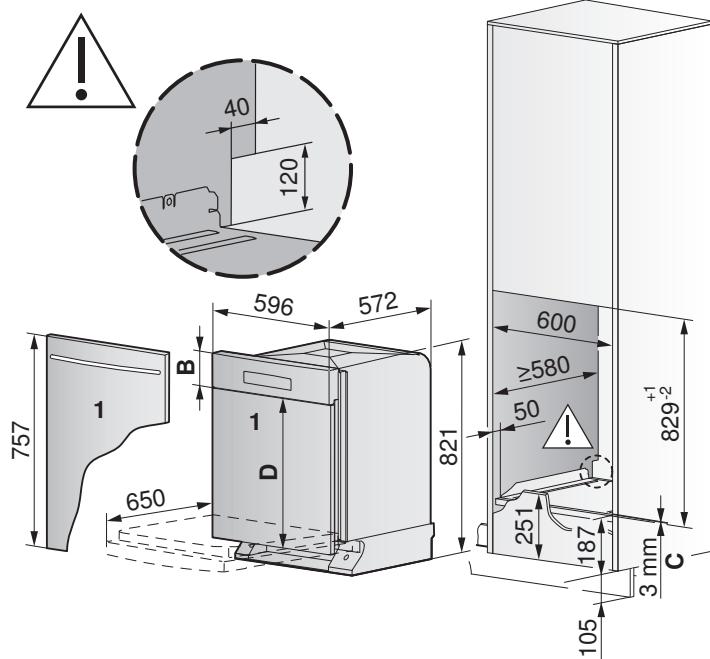

**Tall unit «extra height»****C Slide plate ***

«Standard»	Integrated Nero, white, ChromeClass	Design integrated mirror glass
Operating panel B incl. compensator	124–146 mm	124–140 mm

H Niche height

13 Dishwashers with heat pump

13.1 General notes

It must be possible to pull the appliance out of the niche horizontally at any time without dismantling any part of the cabinet.

- Screws and fasteners must be countersunk in the niche. There should be no protruding parts, screw heads, brackets, etc., otherwise parts of the appliance could become damaged (risk of water damage).
- ⇒ Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.

It must be ensured air gap remains in the shadow gap.

General operating conditions

Ambient temperature: from min. 10 °C to max. 35 °C

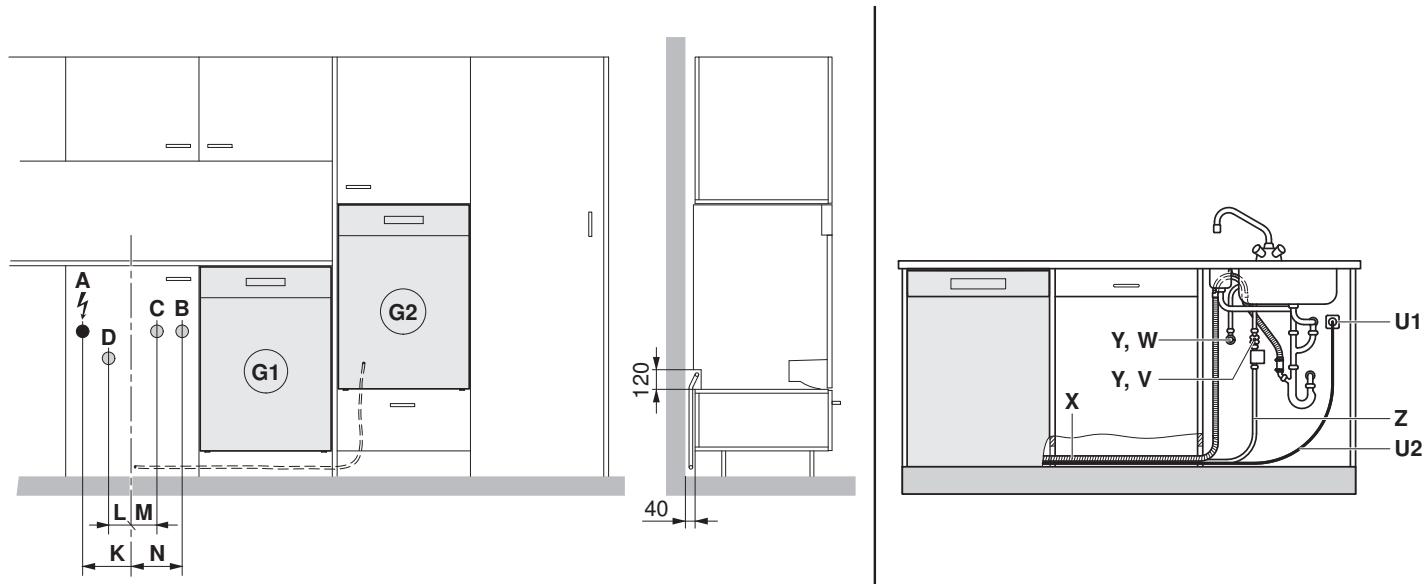

The appliances are designed for use up to a max. altitude of 2,000 m above sea level.

Validity

Model designation	Type	Model number
AdoraDish V6000	AS6T	41121

13.2 Electrical connection data / plumbing in

Example of connection

Designation		Connection from floor (plinth height 105 mm)	Connection in niche (from centre to connection)	Type of connection
A	Electrical connection	600 mm	K = 160 mm	Flush power socket 230 V
B	Cold water	600 mm	N = 170 mm	G ^{3/4} "
C	Hot water *	600 mm	M = 70 mm	G ^{3/4} "
D	Outlet	400 mm	L = 110 mm	ø56 mm
G1	Dishwasher in base unit	Connection in adjacent compartment left or right		
G2	Dishwasher in tall unit	Connection in max. 2 compartments left or right		
U1	Power socket	Yes		
U2	Connection cable	Length 1.50 m **		
V	Cold water connection	Yes		
W	Hot water connection *	Yes		
X	Drain hose	Length 1.55 m ** / internal diameter = 22 mm		
Y	Shut-off devices	Yes, 3/4"		
Z	Aquastop / water inlet with filter, G ^{3/4} "	Length 1.55 m **		

* The hot water connection can be activated for a water flow temperature of at least 45 °C to maximum 75 °C. For the "No heating" function, a water flow temperature of 60 °C is recommended.

** If the standard connection length is not long enough, order the CS set with a longer connection length (AdoraDish (see page 143)).

Special lengths must be connected directly to the appliance. Lengthening the inlet and drain hoses is not permitted.

Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Model designation	Type	Model number	Country group**	Rated load	Mains connection	Fuse
AdoraDish V6000	AS6T	41121	A, E	3200 W	230 V~ 50 Hz	16 A
			C	2200 W	220–240 V~ 50 Hz	10 A
			D	2200 W	220–240 V~ 50 Hz	10 A
			F	3200 W	220–240 V~ 50 Hz	16 A*

* Set 230 V / 16 A CH plug T23 «W85585»; only available from and must be installed by qualified service technicians from V-ZUG Ltd.

** Key (see page 2)

Plumbing-in data

For special cases with water hardness in excess of 50 °fH, an external water softener is recommended.

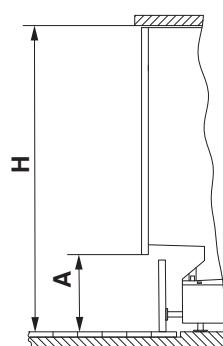

Value	Nominal value	Minimum	Maximum
Mains pressure (0.1 MPa = 1 bar)	Static	0.3–0.4 MPa	0.1 MPa
	Flowing	–	0.08 MPa
Water hardness	–	0.5 °fH	50 °fH
Water inlet temperature	–	5 °C	60 °C

13.3 Installation summary

Keep base compartment unobstructed, appliance stands on the floor.

Decor system	Fully integrated
Minimum weight	5 kg
Maximum weight	7 kg
Special set of strong springs W84603	Up to 10 kg

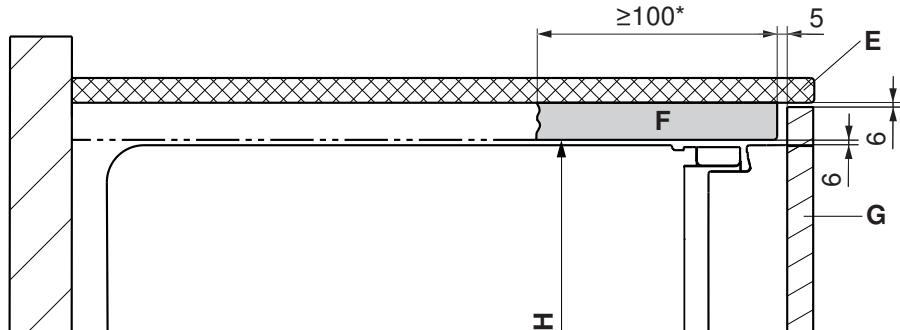

- The weight dimensions only apply to uniform decor panels up to 22 mm thick.
- For decor panel that are thick or uneven (e.g. frame constructions or bevelled glass plates), the CS set «Door hinge brake» (art. no. 1011228) can be used to provide additional stability to the appliance door when pushed open.

For different dimensions / decor panel weights, check using the “Calculation of special decor panel for dishwashers” tool: <https://www.vzug.com/b2b/gb/en/planningaid>

Tall unit**Niche floor A**

- Load-bearing capacity of niche floor **A**: 100 kg
- Given a load of 75 kg per appliance foot **G**, the niche floor may sag by a max. of 1 mm.

Installing extra-long decor panel

* A continuous soffit vent is recommended.

E Worktop
F Continuous soffit vent
G Decor panel
H Niche height

14 Refrigerators

14.1 General notes

Insufficient ventilation can cause a malfunction and shorten the life of the appliance.
 Heavy door panel weights shorten the service life of the door hinges. Observe maximum permissible weight.
 Efficient repairs can only be guaranteed if it is possible to uninstall the whole appliance at any time without causing any damage.
 In an open-plan kitchen and living room, higher noise emissions can be expected if the ventilation slits face into the room.

14.2 Electrical connection data

General information on the electrical connections and an overview of the positions can be found in section Overview of connections, ranges and dimensions (see page 5).

Appliance	Climate class	Mains connection	Fuse	Mains cable
Refrigerators				
CombiCooler V4000 (51086/51087)	SN-T	220–240 V~ 50 Hz	10 A	2.2 m, with plug
Prestige T (51081)	SN-T			2.1 m, with plug
Jumbo 60i (51078)	SN-ST			2.0 m, with plug
Jumbo 60i T (51092)	SN-T			
CombiCooler V6000 Supreme (51096)	SN-T			
Cooler V6000 Supreme (51098)	SN-T			
Winecoolers				
Winecooler 90 SL 60 (51082)	SN-ST	220–240 V~ 50 Hz	10 A	2.2 m, with plug
Winecooler UCSL 60i (51073)				2.1 m, with plug
Winecooler V6000 (51095)	SN-ST			2.1 m, with plug
Winecooler V6000 Supreme (51097)	SN-T			2.0 m, with plug
Freezers				
Iglu 60i (51077)	SN-ST	220–240 V~ 50 Hz	10 A	2.1 m, with plug
Iglu 60i T (51091)	SN-T			
Freezer V6000 Supreme (51099)	SN-T			2.0 m, with plug

14.3 Ambient conditions

Condensate may form in the appliance in tropical conditions and this has to be taken into account in the planning.

Climate class	Minimum	Maximum
SN	+10 °C:	+32 °C:
N	+16 °C:	+32 °C:
ST	+16 °C:	+38 °C:
T	+16 °C:	+43 °C:

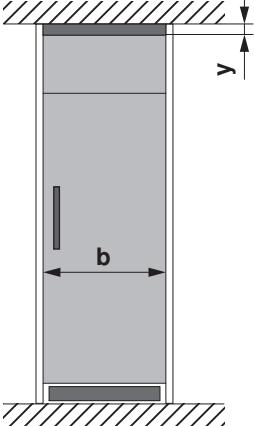

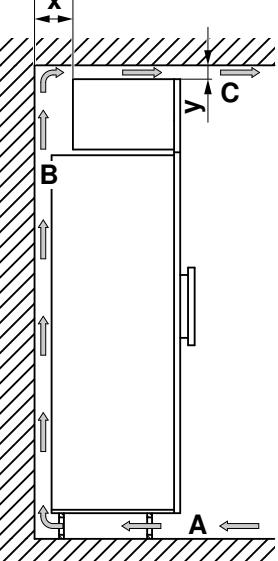

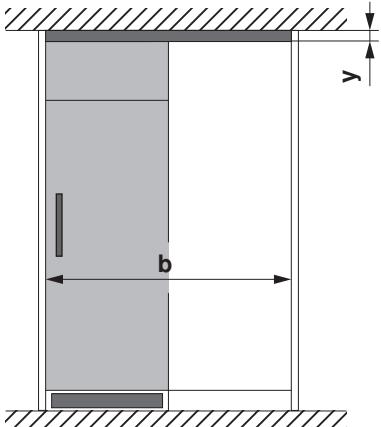

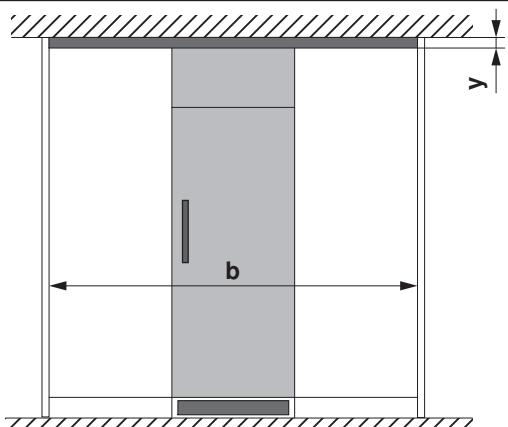

14.4 Niche ventilation

For trouble-free heat dissipation of the appliance, an air duct must be provided whose width is no greater than the width of the unit with an unobstructed passage of at least 200 cm² from the air inlet in the plinth area **A** to the air outlet at the back **B** and at the front at the top **C**.

If there are wall units the ventilation gap **x** must be selected according to the following table.

If, for design reasons, a smaller ventilation gap **y** is preferred for the front-facing air outlet at the top, then ventilation at the top must be possible across several unit widths. The dimensions for **y** are given in the following table.

If refrigerators/freezers are installed side by side, the cross-section requirements for the air duct are doubled (width **b**).

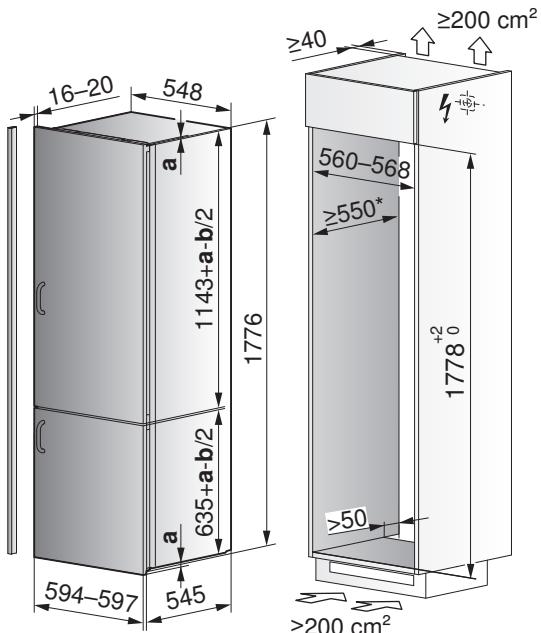

Dimensions per appliance	b (mm)	y (mm)	x (mm)	
	550–568	≥40	≥50	
	1100–1168	≥30	≥100	
	≥1650	≥20		

14.5 Refrigerators

CombiCooler V4000 (51086/51087)

(integrable)

Maximum permissible weight of door panel:
17.5 kg (top) / 12 kg (bottom)

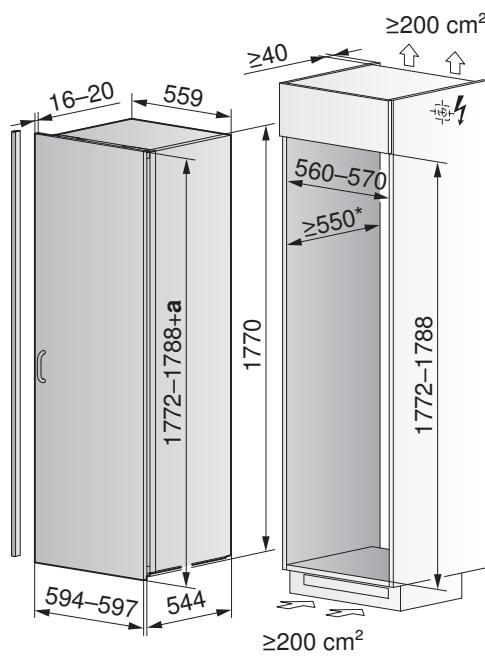

a Overlap, b Gap (≥ 4 mm)

Jumbo 60i (51078), Jumbo 60i T (51092)

14.7 Freezers

Iglu 60i (51077), Iglu 60i T (51091) (integrable)

Maximum permissible weight of door panel: 26 kg

$\geq 200 \text{ cm}^2$

a Overlap, * = Recommendation: 560 mm.

Side-by-side installation

Iglu 60i-T and Jumbo 60i-T as well as the rest of our appliances can be installed left/right or vice versa. The appliances must be installed in a separate kitchen unit.

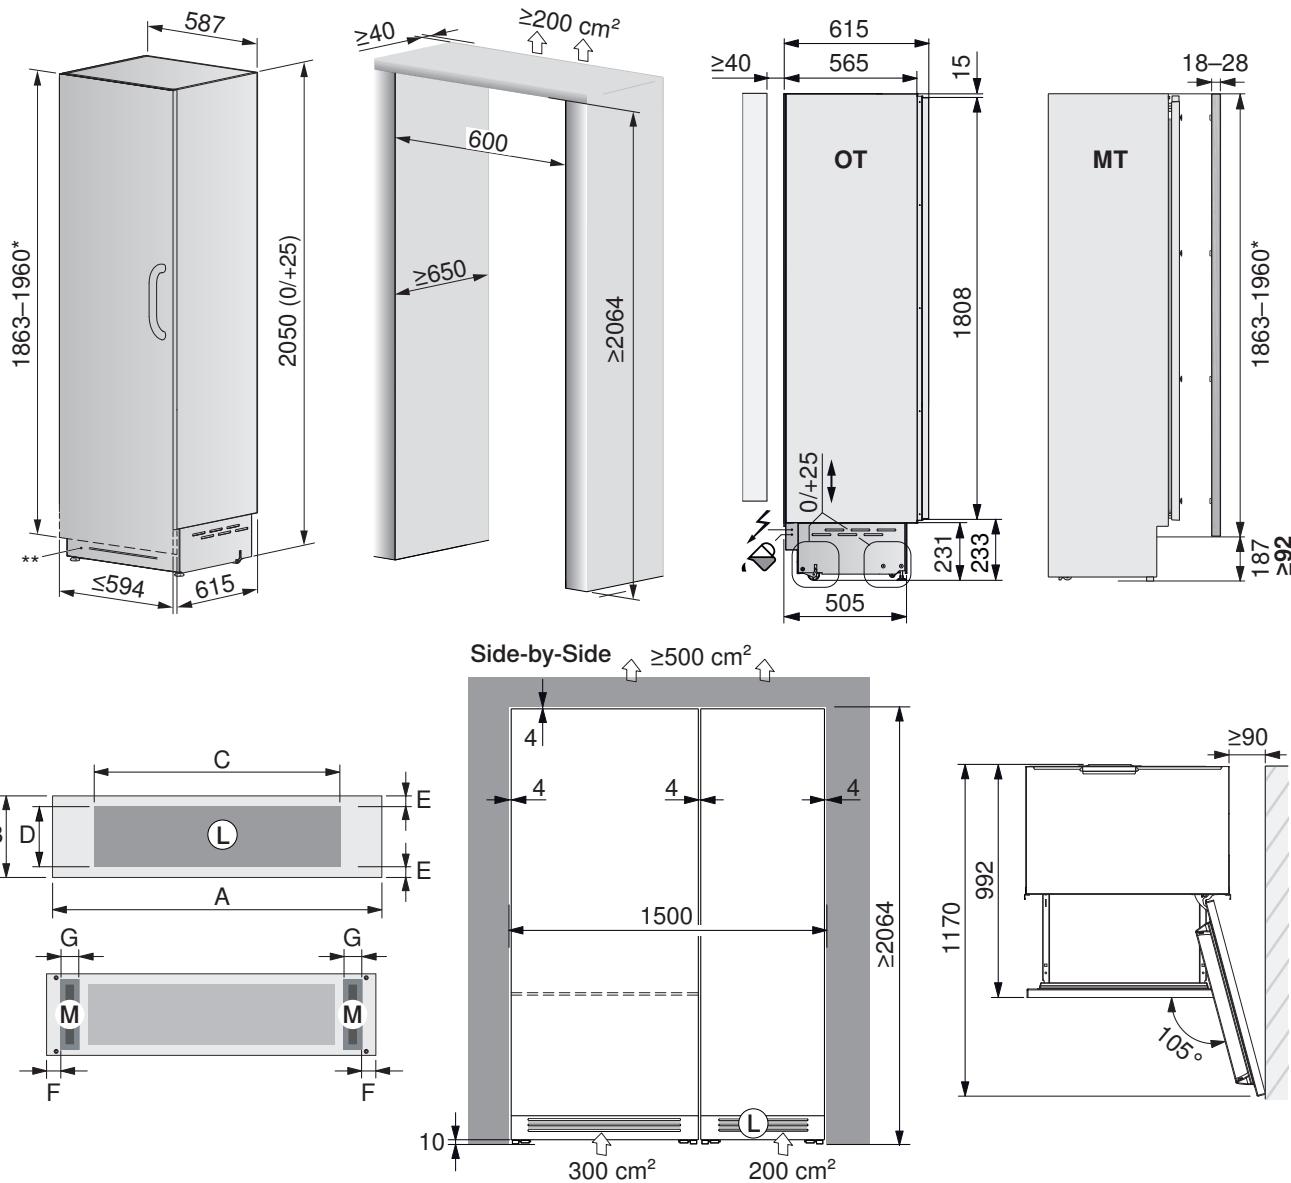

Freezer V6000 Supreme (51099) (fully integrated)

Gross weight: 153 kg. Maximum permissible weight of door panel: 34 kg.

Water connection: Length 2.5 m, a water outlet and Aquastop does not have to be provided.

Fixed water connection: 3/4" internal thread, the water connection must be accessible at all times.

Electrical connection cable: 2 m.

* = For niche height >2064, drill holes in and height of door panel must be adjusted (see installation instructions).

** = Chrome front grille can be replaced by kitchen cabinet front (for dimensions see installation instructions).

OT View without door panel, **MT** View with door panel, **L** Air inlet (at least 50% open), **M** Magnet for mounting.

Dimensions for ventilation grille and position of magnet:

A = 594, **B** = 215, **C** = 400, **D** = 200, **E** = approx. 10, **F** = 60, **G** = 15-30.

Installation accessories: Chrome steel door panel set (incl. chrome designer handle) width: 594, height: 1904.

Hinge left: Article no. **1090126**, hinge right: Article no. **1090125**.

For side-by-side installation: Lateral plastic connecting angle + lateral plastic cover strip (included in scope of delivery). Intermediate plastic cover strip (accessory available for order).

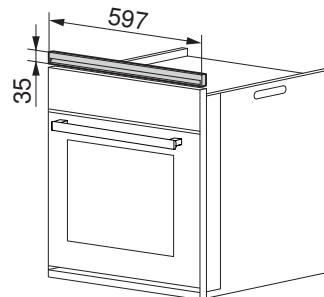

15 Accessories

15.1 Ovens / steam cookers / microwave ovens / coffee machines / vacuum drawers / warming drawers / system drawers

Compensation elements

Ventilation grille

- Ventilation grilles are needed when glass ceramic hobs are installed over ovens.
- For installation above the control panel, see installation instructions J40254.

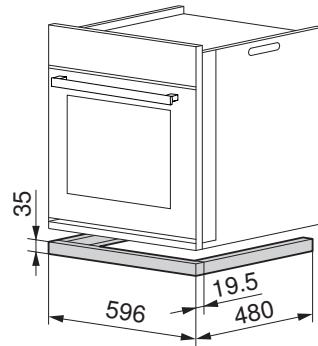

Niche width 60 cm

Designation	Appliance height	Article no.
White	60 cm	H63161
Nero	60 cm	H63163
ChromeClass	60 cm	H63256

Adapter frame

- For installation, see installation instructions J73.050.
- Installation below the appliance

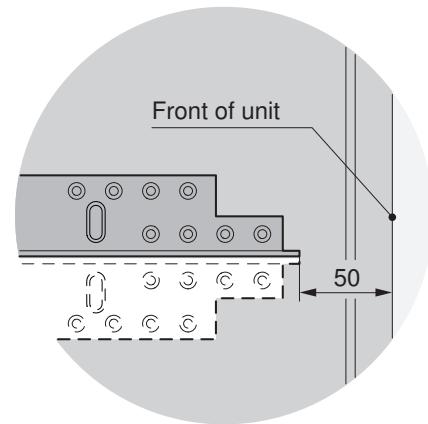

Niche width 60 cm

Designation	Appliance height	Article no.
White	38.1/60 cm	K38137
Nero	38.1/60 cm	K38136
ChromeClass	38.1/60 cm	K48135
Black glass	38.1/60 cm	K38134
AluClass	38.1/60 cm	K38133

Angle set for combination possibilities

- For installation, see installation instructions J21021050.
- In the niche mount to the wood left and right.
- The appliance is placed on the mounting angle and pushed into the niche.

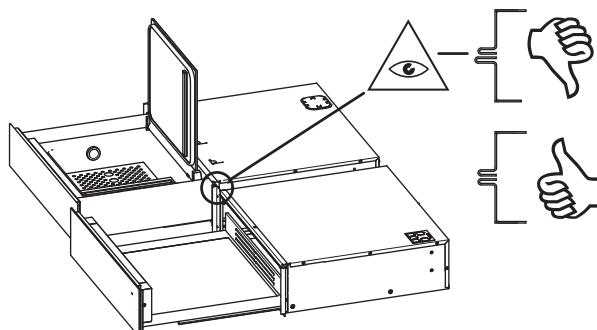

Art. no. K50572, construction type EURO

Trim kit (edge protection)

- For installation, see installation instructions: **1044771, 1044772, 1075859**.

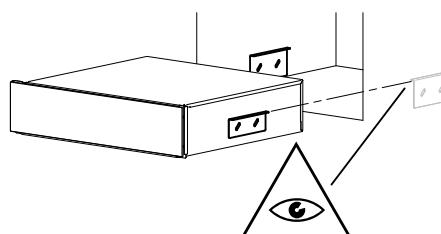

Art. no. 1056472 trim kit (edge protection)
 only needs to be ordered once.

Anti-tip set

- For installation, see installation instructions: **1044772**.

Art. no. 1016692 Anti-tip set
 only needs to be ordered once.

Design cover

The design cover covers the intermediate base for EURO niches and is for a combined installation of two appliances e.g. oven **1** and combi-steamer **2**. The cover is dimensioned for panel overlapping of 4 mm.

- For installation, see installation instructions J340050
- Depending on the thickness of the intermediate base **b**, two variants (nero) of the design cover **A** are available:

Art. no. K37158 (**b** = 16 mm / **a** = 10.5 mm)

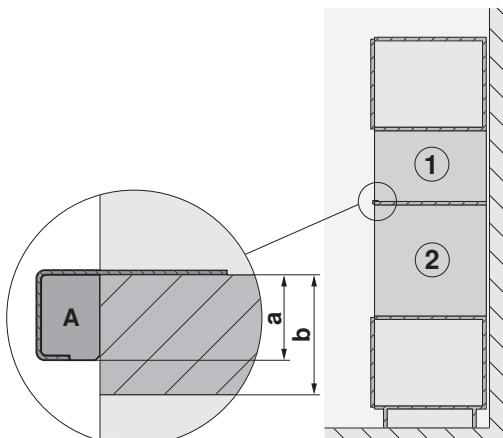

Art. no. K37159 (**b** = 19 mm / **a** = 13.5 mm)

Aesthetic profile

Assembly kit with aesthetic profile for installing Miwell next to another appliance.

- For installation, see installation instructions 1009019

Art. no. 1009179

Drain hose

5 m drain hose for steam cooker with fixed water connection CSTXSLF.

Art. no.1012933

ø125 mm

H42033

ø150 mm

Elbows

Elbow 90°

Description

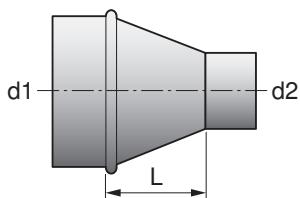

Elbow, pressed, $R = d_1$
Use with flexible and rigid pipes
Sendzimir galvanized sheet steel

Art. no.

H42034	d_1
H42036	$\varnothing 125 \text{ mm}$
	$\varnothing 150 \text{ mm}$

Reducers

Reducer

Description

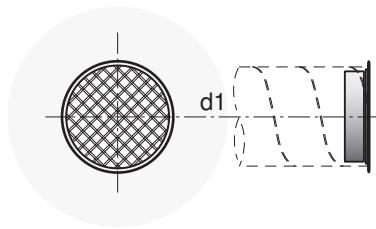

Pressed version, $L = 22 \text{ mm}$
Sendzimir galvanized sheet steel

Art. no.

H42040	d_1
	$\varnothing 150\text{--}125 \text{ mm}$

Pipe end pieces

Pipe end piece

Description

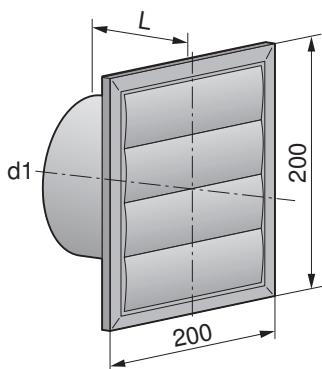

Connection with grille
Sendzimir galvanized sheet steel

Art. no.

H42048	d_1
	$\varnothing 150 \text{ mm}$

Weather protection grilles

Weather protection grille made from plastic

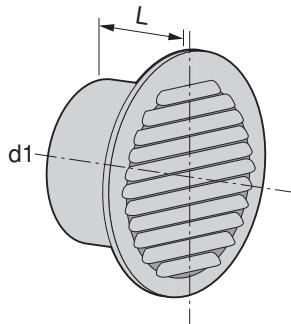

Description

Weather protection grille without a non-return flap valve, square with connection piece
weatherproof, $L = 40 \text{ mm}$

Art. no.

H42080	d_1
	$\varnothing 150 \text{ mm, white}$

Weather protection grille

Description

Weather protection grille without a non-return flap valve, round, pressed, made from aluminium

With fly screen and connection piece, L = 45 mm

Art. no.

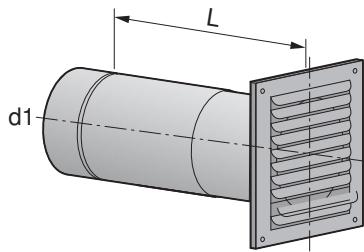

H42064

d1

Ø150 mm

Wall pipes

Telescopic wall pipe with non-return flap valve

Description

3-part set, L = Wall thickness 300–460 mm

Sendzimir galvanized sheet steel

Grille made from aluminium; can be painted

Art. no.

H42065

d1

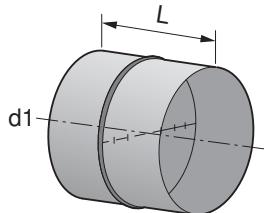

Ø125 mm

H42066

Ø150 mm

Flaps

Non-return flap valve with sealing lip

Description

Made from robust sheet steel

For flexible and rigid pipes, L = 80 mm

Art. no.

H42061

d1

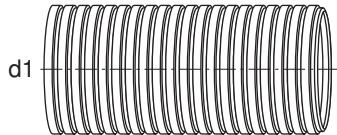

Ø125 mm

H42062

Ø150 mm

Hoses

Aluminium hose, semi-flexible

Description

Round Aluflex, semi-flexible

Dimensionally stable, flame resistant

1 à 3 m

Art. no.

H42051

d1

Ø125 mm

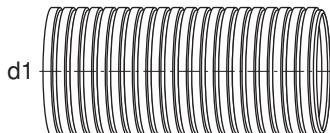

H42052

Ø150 mm

H40168

Ø160 mm

Aluminium hose, highly flexible

Description

Round Aluflex, highly flexible
Internal bending radius 30–60 mm
Dimensionally stable, flame resistant

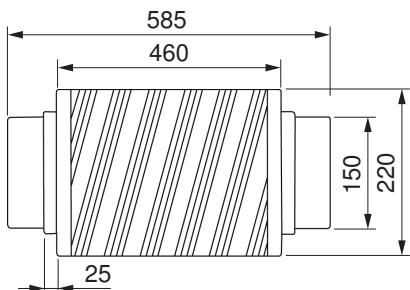

Art. no.

H42053
16955803

d_1

$\varnothing 125$ mm, 1 à 10 m
 $\varnothing 150$ mm, 1 à 15 m

Noise insulation, aluminium

Description

Noise insulation made of aluminium for $\varnothing 150$ mm pipe dimension.
Noise reduction of up to 22 dB.

Art. no.

1030591

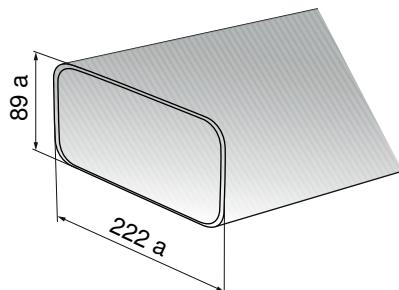

$\varnothing 150$ mm

Flat channel systems made of plastic

Accessory parts made of non-fireproof plastic.

Flat channel

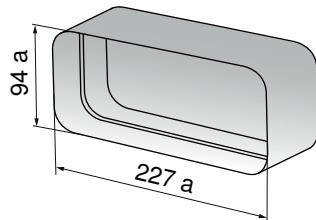

Description

Ventilation duct without sleeve
Art. no.

1012780

$L = 1000$ mm

Channel connector

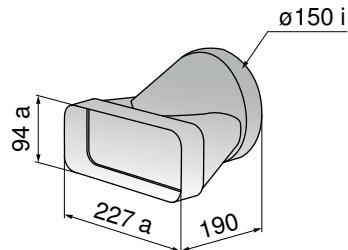

Description

For straight ventilation pipes
Art. no.

1012781

$L = 80$ mm

Transition piece for flat channel

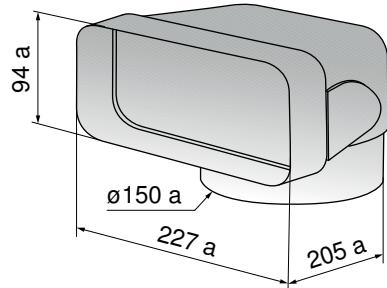

**Description**

Formed sleeve for direct transition from flat to round
Fluidically optimized

Art. no.

1012782

Diverter piece on flat channel 90°

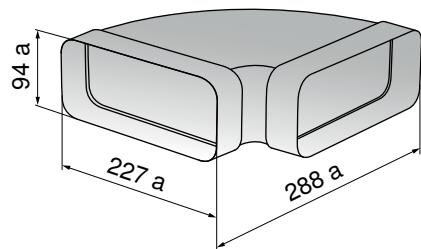

**Description**

For direct hood connection with air guides and formed sleeve at one end

Art. no.

1012783

Elbow 90°, horizontal

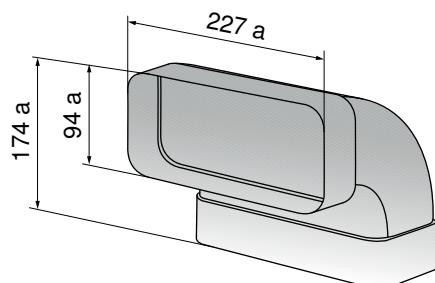

**Description**

With air guides and formed sleeve at both ends

Art. no.

1012784

Elbow 90°, vertical

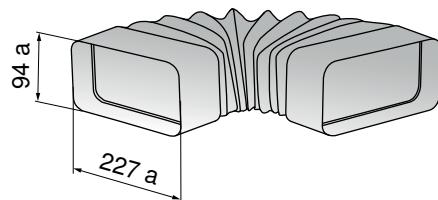

**Description**

With air guides and formed sleeve at both ends

Art. no.

1012785

Flexible elbow, flat

**Description**

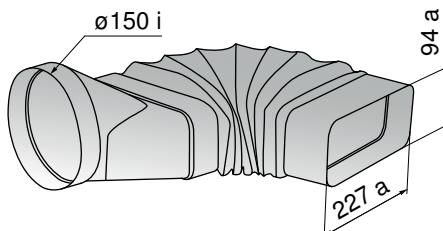

For bends and turns up to 90°

Adapter, flexible, angular to angular, with formed sleeve

Art. no.

1012786

L = 240–600 mm

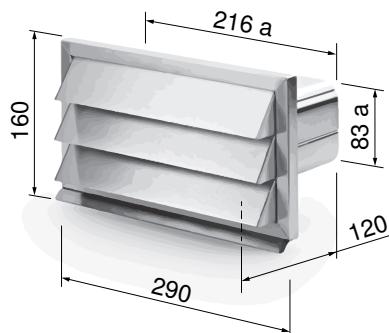

Flexible elbow, round onto flat**Description**

For bends and turns up to 90°
Adapter, flexible, round to angular, with formed sleeve

Art. no.

1012787

L = 160–550 mm

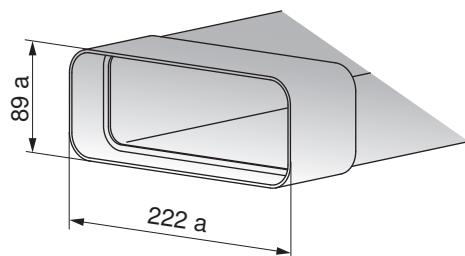

Weather protection grille for plastic flat channel**Description**

Ventilation grille for plastic flat channel, ChromeClass
with non-return flap valve. Compatible with flat channel art. no. 1012780

Art. no.

1030590

290 × 160 mm

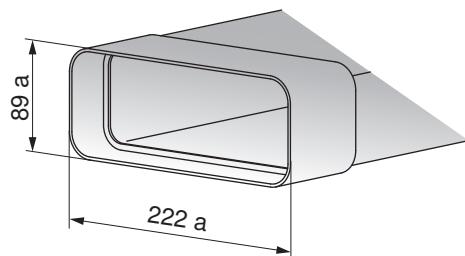

Flat channel systems made of metal**Accessory parts made of fireproof metal****Flat channel****Description**

Flat channel with seal

Art. no.

1046627

L = 500 mm

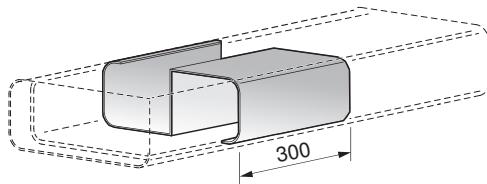

Flat channel**Description**

Flat channel with seal

Art. no.

1046628

L = 1000 mm

Reinforcing rib for embedding in concrete**Description**

Reinforcing rib for embedding in concrete (tread load of up to 100 kg)

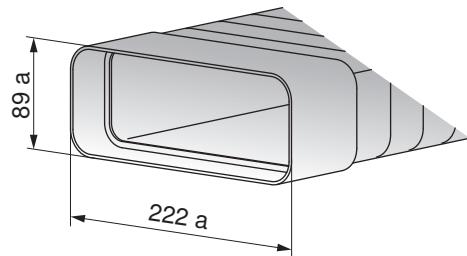

1x required for use in flat channel (L=500mm) art. no. 1046627

2x required for use in flat channel(L=1000mm) art. no. 1046628

Art. no.

1077495

L = 300 mm

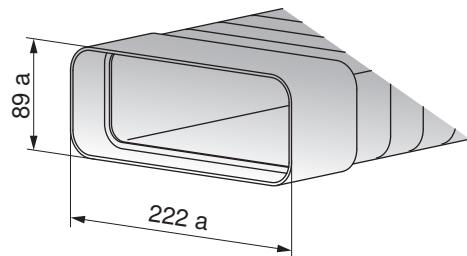

Flat channel, flexible**Description**

Flat channel, flexible, with seal

Art. no.

1046629

L = 500 mm

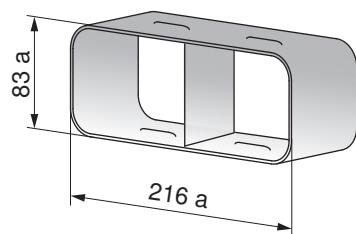

Flat channel, flexible**Description**

Flat channel, flexible, with seal

Art. no.

1046635

L = 1000 mm

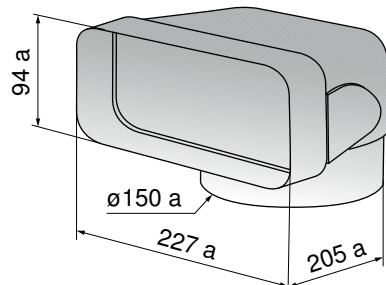

Channel connector**Description**

For straight flat channels

Art. no.

1046636

L = 100 mm

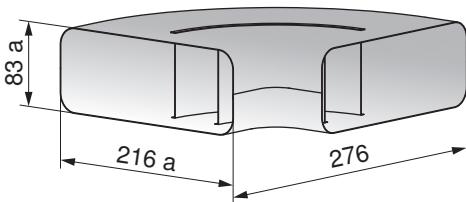

Diverter piece on flat channel 90°**Description**

For direct hood connection with air guides and formed sleeve at one end

Art. no.

1046638

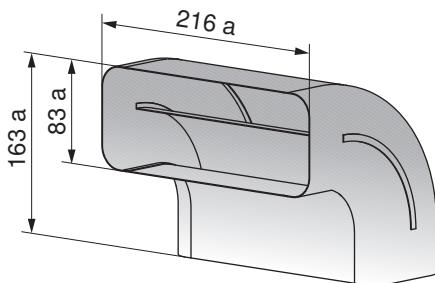

Elbow 90°, horizontal

Description
Elbow with air guides

Art. no.
1046639

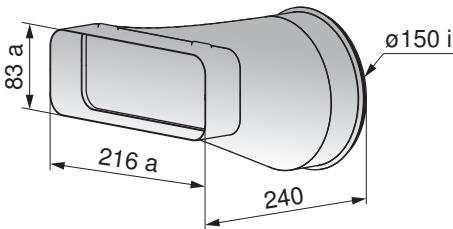

Elbow 90°, vertical

Description
Elbow with air guides

Art. no.
1046643

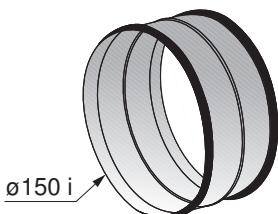

Transition piece for flat channel

Description
For direct transition from flat to round, fluidically optimized

Art. no.
1046644

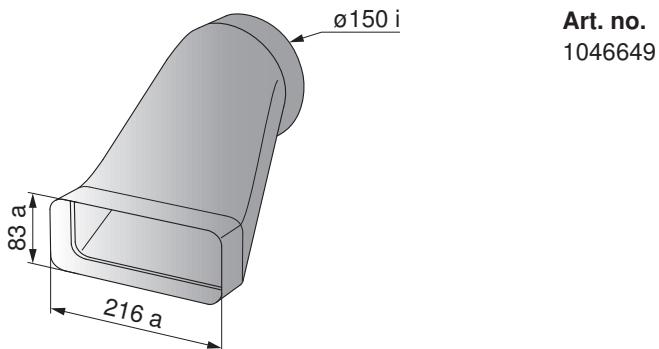

Pipe connection

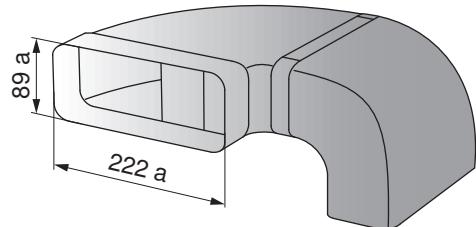

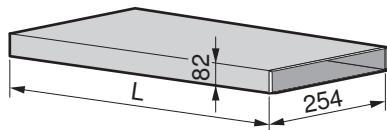

Art. no.
1046646

d = 150 mm

Offsetting end piece on base motor

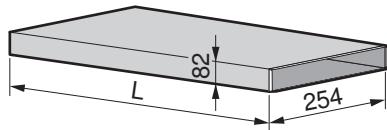

Art. no.
1046649

Pipe set for hob hoods**Art. no.**
1046650**Flat channels****Flat channel****Description**

Exhaust ducting system with very low installation height of 82 mm
Sendzimir galvanized sheet steel
Corresponds to nominal diameter ø150 mm

Art. no.

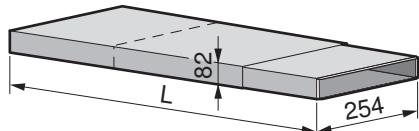

H42068	L = 1000 mm
H42069	L = 600 mm

Reinforced flat channel**Description**

Exhaust ducting system with very low installation height of 82 mm
Sendzimir galvanized sheet steel
With reinforcement for concreting in
Corresponds to nominal diameter ø150 mm

Art. no.

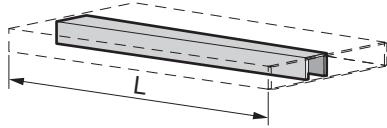

H42085	L = 600 mm
H42086	L = 1000 mm

Telescopic flat channel**Description**

Exhaust ducting system with very low installation height of 82 mm
Sendzimir galvanized sheet steel
Corresponds to nominal diameter ø150 mm

Art. no.

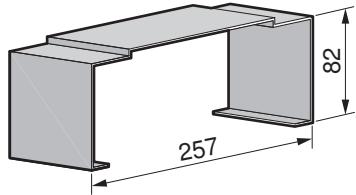

H42070	L = 275–535 mm
--------	----------------

Reinforcing rib for flat channel**Description**

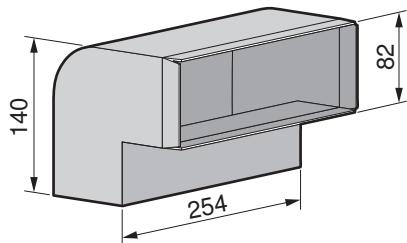

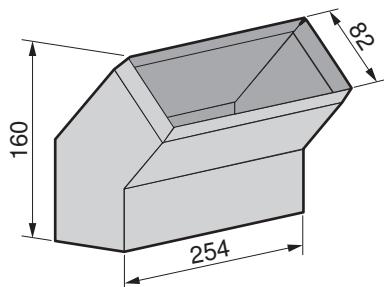

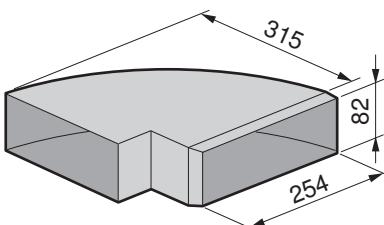

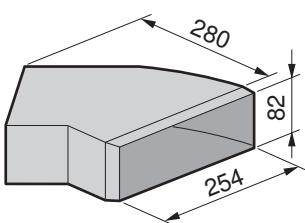

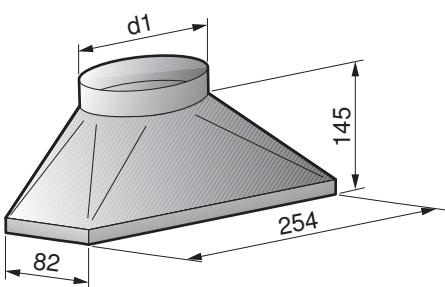

For concreting in flat channel

Art. no.

H42071	L = 600 mm
H42072	L = 1000 mm

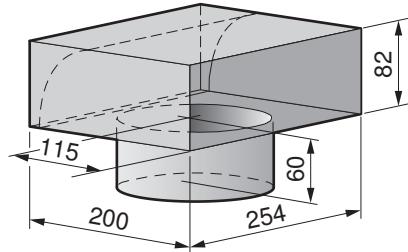

Mounting bracket for flat channel**Art. no.**

H42073

Elbow 90°, vertical, for flat channel**Art. no.**
H42074**Elbow 45°, vertical, for flat channel****Art. no.**
H42075**Elbow 90°, horizontal, for flat channel****Art. no.**
H42076**Elbow 45°, horizontal, for flat channel****Art. no.**
H42077**Transition piece for flat channel****Description**

For transition from round to flat

Art. no.
H42078d1
ø150 mm

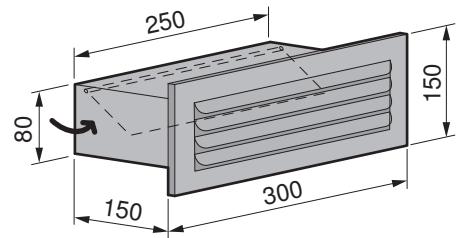

Diverter piece on flat channel**Art. no.**

H42087

H42079

Connection ø125 mm

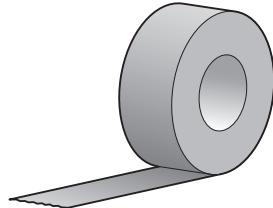

Connection ø150 mm

Flat channel wall box**Description**

With non-return flap valve and weather protection grille

Art. no.

H42054

Sealing tape**Aluminium tape****Description**

Fabric-reinforced tape, with protective film, 50 mm x 50 m roll

Art. no.

H42067

15.4 Dishwashers

AdoraDish

Mirror glass fronts (option)

Integrated	Width	Height	Depth	Article no.
Decor set 60 standard mirror glass	596 mm	632 mm	20 mm	W83526
Decor set 60 extra height mirror glass	596 mm	697 mm	20 mm	W83527

Diverse sets

Set	Article no.	Remarks
Conversion kit for slide plate	W83583	In place of the plinth runners, for the installation on a plinth or for the tall unit.
Compensator set, black	W82043	Additional order for «Black glass» appliances. The set can also be used for «ChromeClass» appliances.
Plinth runner	W82930	For height compensation in a niche
Work surface protection	W70163	Protection against escaping moisture
Set of strong tension springs for standard appliances	W84603	For heavier decor panels
Set of strong tension springs for extra height appliances	W84604	For heavier decor panels
CS set of long hoses V6000 / V4000B	1032108	Conversion to 3 m Aquastop and 3 m drain hose*
CS set of long hoses V2000 / V4000	1091481	Conversion to 3 m Aquastop and 3 m drain hose*
CS set containing door hinge brake	1011228	For very heavy decor panels for appliances with door opener

* Conversion must be carried out by qualified personnel.

15.5 Refrigerators

Designation	Article no.	Remarks
Supplementary kit 60 cm (filler strip)		
KPRI, KPRTi	H71756	Length 1780 mm
Installation kit for stone cladding		
Adapter profile KWUCSL60	1062627	Height ≥ 30 mm
Installation accessories for		
CombiCooler V6000 Supreme (51096):		
Chrome steel door panel set (incl. chrome designer handle), hinge right	1087155	Width 894 mm, Height of fridge compartment 1320 mm, Height of freezer compartment 581 mm
Chrome steel door panel set (incl. chrome designer handle), hinge left	1090119	
Cooler V6000 Supreme (51098):		
Chrome steel door panel set (incl. chrome designer handle), hinge right	1087157	Width 894 mm, Height 1904 mm
Chrome steel door panel set (incl. chrome designer handle), hinge left	1090120	
WineCooler V6000 Supreme (51097):		
Chrome steel door panel set (incl. chrome designer handle), hinge right	1087156	Width 594 mm, Height 1904 mm
Chrome steel door panel set (incl. chrome designer handle), hinge left	1090121	
Freezer V6000 Supreme (51099):		
Chrome steel door panel set (incl. chrome designer handle), hinge right	1090125	Width 594 mm, Height 1904 mm
Chrome steel door panel set (incl. chrome designer handle), hinge left	1090126	
For all V6000 Supreme appliances:		
Intermediate plastic cover strip for side-by-side installation	1101167	-
Long door handle, horizontal	1084381	Length 775 mm
Extra-long door handle, vertical	1084417	Length 1060 mm

16 V-ZUG-Home

16.1 Internet access

 **Internet access is required for use of V-ZUG-Home.**

16.2 Scope of delivery

For appliances with V-ZUG-Home, the V-ZUG-Home module is integrated in the appliance and ready for operation. Models with a V-ZUG-Home module can be connected to the home network via WLAN.

Type of appliance	Model number	Connection type
Ovens	21096–21101	WLAN
Steam cookers	23065–23081	WLAN
Dishwashers	41108–41125	WLAN
Induction hobs	31132, 31134	WLAN
Refrigerators	51086, 51087	WLAN

16.3 Connecting to the home network

WLAN connection

 **Establishing a connection between an appliance and a wireless network is described in the operating instructions for «V-ZUG-Home». These can be found at home.vzug.com.**
