PRESS RELEASE

Bringing even more joy to cooking: the new gas hobs with modern slider control

V-ZUG has combined an established, globally popular cooking method with the latest technology. The new gas hobs from the premium Swiss manufacturer are equipped with a convenient and ergonomic slider control. The modern control paired with the multitude of practical functions make cooking even more enjoyable.

For generations, people all over the world have cooked with gas. V-ZUG, the premium Swiss household appliance manufacturer, is now the first supplier on the market to combine this established cooking method with a modern form of operation and high-quality design. With multi-slider operation, each cooking zone has its own electronic slider. This means that the cook can operate each cooking zone individually and directly. A gentle slide with your finger will do the trick – simple and ergonomic, just like a smartphone. All of the gas hobs are stand-alone systems; in other words, they do not require an additional cooker. The previous gas hobs with dials (knob control) are still available in the V-ZUG range, which includes a total of 13 gas hobs with up to five cooking zones and different functional layouts.

Practical kitchen gadget

The new gas hobs from V-ZUG boast a multitude of useful functions which simplify day-to-day life and make cooking more enjoyable. The simmer function, for example, is ideal for poaching eggs or sausages, or for keeping the water temperature just below boiling point. The melting or keep-warm

functions are useful in many different situations. Cleaning is also practical – thanks to the wipe protection button, you can clean the hob without accidentally switching it on. And what's more, you can easily clean the pan supports in the dishwasher.

Safety as the number one priority

When cooking with gas, safety is always paramount and the V-ZUG developers paid particular attention to this. The gas hobs with slider control, for example, have a safety shutdown feature, which prevents a cooking zone from being left in operation unsupervised for too long. On top of this, the integrated over-heating protection, the residual heat display and the childproof lock mean that you can have peace of mind when you use a gas hob in your home.

Designs and combinations to suit every taste

The gas hobs are ideal for combining with induction hobs from V-ZUG, such as the wok or Teppan Yaki cooking zones. Incidentally, you can also use the special induction pans on the gas hobs. The gas hobs also meet the high aesthetic requirements – depending on the version, the products are available in black or chrome steel. When it comes to installation, you can choose to fit the hob flush so that it is embedded almost seamlessly into the kitchen worktop or to fit it with a frame. With their modern control, multitude of functions, safety mechanisms, and individual combination and design options, the new gas hobs from V-ZUG are the ideal companions for a modern lifestyle.

About V-ZUG

V-ZUG is the leading Swiss brand for household appliances and is based in Zug. For over 100 years, the company has developed and manufactured innovative appliances for the kitchen and washroom which simplify everyday life and provide lifelong inspiration and delight – right in the very heart of Switzerland. V-ZUG has 10 exhibition and advisory centres as well as 16 service centres in Switzerland and has representatives in 18 countries all over the world. The company employs around 1400 people globally and is training more than 70 apprentices. As the Swiss market leader, V-ZUG is committed to the economy, society and environment, stretching beyond the company itself. The owner-managed company belongs to the Metall Zug Group, together with sister company Gehrig Group AG and subsidiary SIBIRGroup AG.

About Metall Zug

Metall Zug is a Swiss industrial holding company based in Zug. It provides a wide range of innovative and sustainable premium and precision products. The Group develops, manufactures and sells technologically advanced appliances, machines and solutions in the household appliance, infection control and wire processing divisions. V-ZUG AG, Gehrig Group AG (household appliance division), Belimed Group (infection control division) and Schleuniger Group (wire processing division) all belong to the Metall Zug Group. The industrial holding company originates from Metallwarenfabrik Zug, founded in 1887, and remains largely in the hands of the founding family today. The Metall Zug Group employs around 3600 people globally and is listed on the SIX Swiss Exchange.
